Our Concept

- **01** Founded by Engineers
- **02** Values (Flexibility, Trust, Effectiveness)
- **03** Solutions Oriented
- **04** Value Added Distributor
- **05** Method (Specialization, Improvement, Innovation)
- **06** Motto (Affordable Cutting Edge)

It's Been a Long Journey for us

Serve with heart, no matter what

NSS was created by a group of enthusiasts in IT innovation with a primary focus in IT Integrated Solutions and Services.
**JUNE 2005**

We started in a basement with 3 employees
START UP

DEC 2005

We reached 5 in December

We Love our Work
We Know our Job

Serve with heart, no matter what

NSS is a true Value-Added Distributor investing in KNOWLEDGE whereas stocking distributors invest in Inventory.

We are an active TRAINING & SUPPORT Center officially for all our Vendors

MAY 2017

Begun development of the MSP Market & Channel

Quality Management

NSS Data Assurance Policy

NSS places a high level of importance in protecting the data of the company and its customers as well as ensuring the quality of service it provides, according to the standards of ISO 27001:2013 and ISO 9001:2008 respectively.

NSS Quality Objectives

★ Absolute specialization in the fields of its business activity.
★ Continuous qualitative and quantitative improvement of the quality of products and services.
★ Modern and responsible treatment of all customers needs.

Infrastructure & Data Protection Services by NSS

Vulnerability Management	**Available both as a service or as a product to be operated by partner**
Pen Testing	**Available both as a service or as a product to be operated by partner**
Adversary Simulation	**Available both as a service or as a product to be operated by partner**
WebApp Scanning	**Available both as a service or as a product to be operated by partner**

As of 2022, we welcome our new, certified team

Synchronized Security

Sophos Security Products are working **Simple and** can be integrated, working together and being **Synchronized working together as One**

- ⦿ Unified Security concept for all solutions
- ⦿ Endpoint Security for Workstations & Servers
- ⦿ Data Encryption for Media, Net Shares, Cloud
- ⦿ Nextgen Web Security & Application Control
- ⦿ Email Security & Data Leakage Protection
- ⦿ Mobile Security for Phones & Tablets
- ⦿ Support for all Operating Systems
- ⦿ Synchronized Security and Analytics

Privileged Account Security

DISCOVERY · THREAT ANALYTICS · REPORTING · CONNECTORS · CENTRAL POLICY & MANAGEMENT

PRIVILEGED PASSWORD MANAGEMENT

Discover, manage, audit, and monitor privileged accounts and sessions of all types

ENDPOINT PRIVILEGE MANAGEMENT

Remove excessive end user privileges on Windows, Mac, Unix, Linux and network devices

SECURE REMOTE ACCESS

Secure, manage, and audit remote privileged access sessions for vendors, admins and the service desk

BEYONDINSIGHT PLATFORM

Maximize visibility, simplify deployment, automate tasks, improve security and reduce privilege-related risks with the industry's most innovative and comprehensive privileged access management platform

---------------- ON-PREMISE ----------------- CLOUD ---------------- HYBRID ----------------------

BeyondTrust **Universal Privilege Management** provides security to every user, asset, and session across your enterprise

- ◉ Scan, identify and profile all assets and accounts, providing full session recording and real-time visibility into privileged user behavior
- ◉ Eliminate unnecessary privileges and elevate rights to Windows, Mac, Unix, Linux and network devices without hindering productivity
- ◉ Privileged Remote Access allows you to secure, manage, and audit vendor and internal remote privileged access without VPN

nss
Affordable Cutting Edge

BeyondTrust

Data Security Management
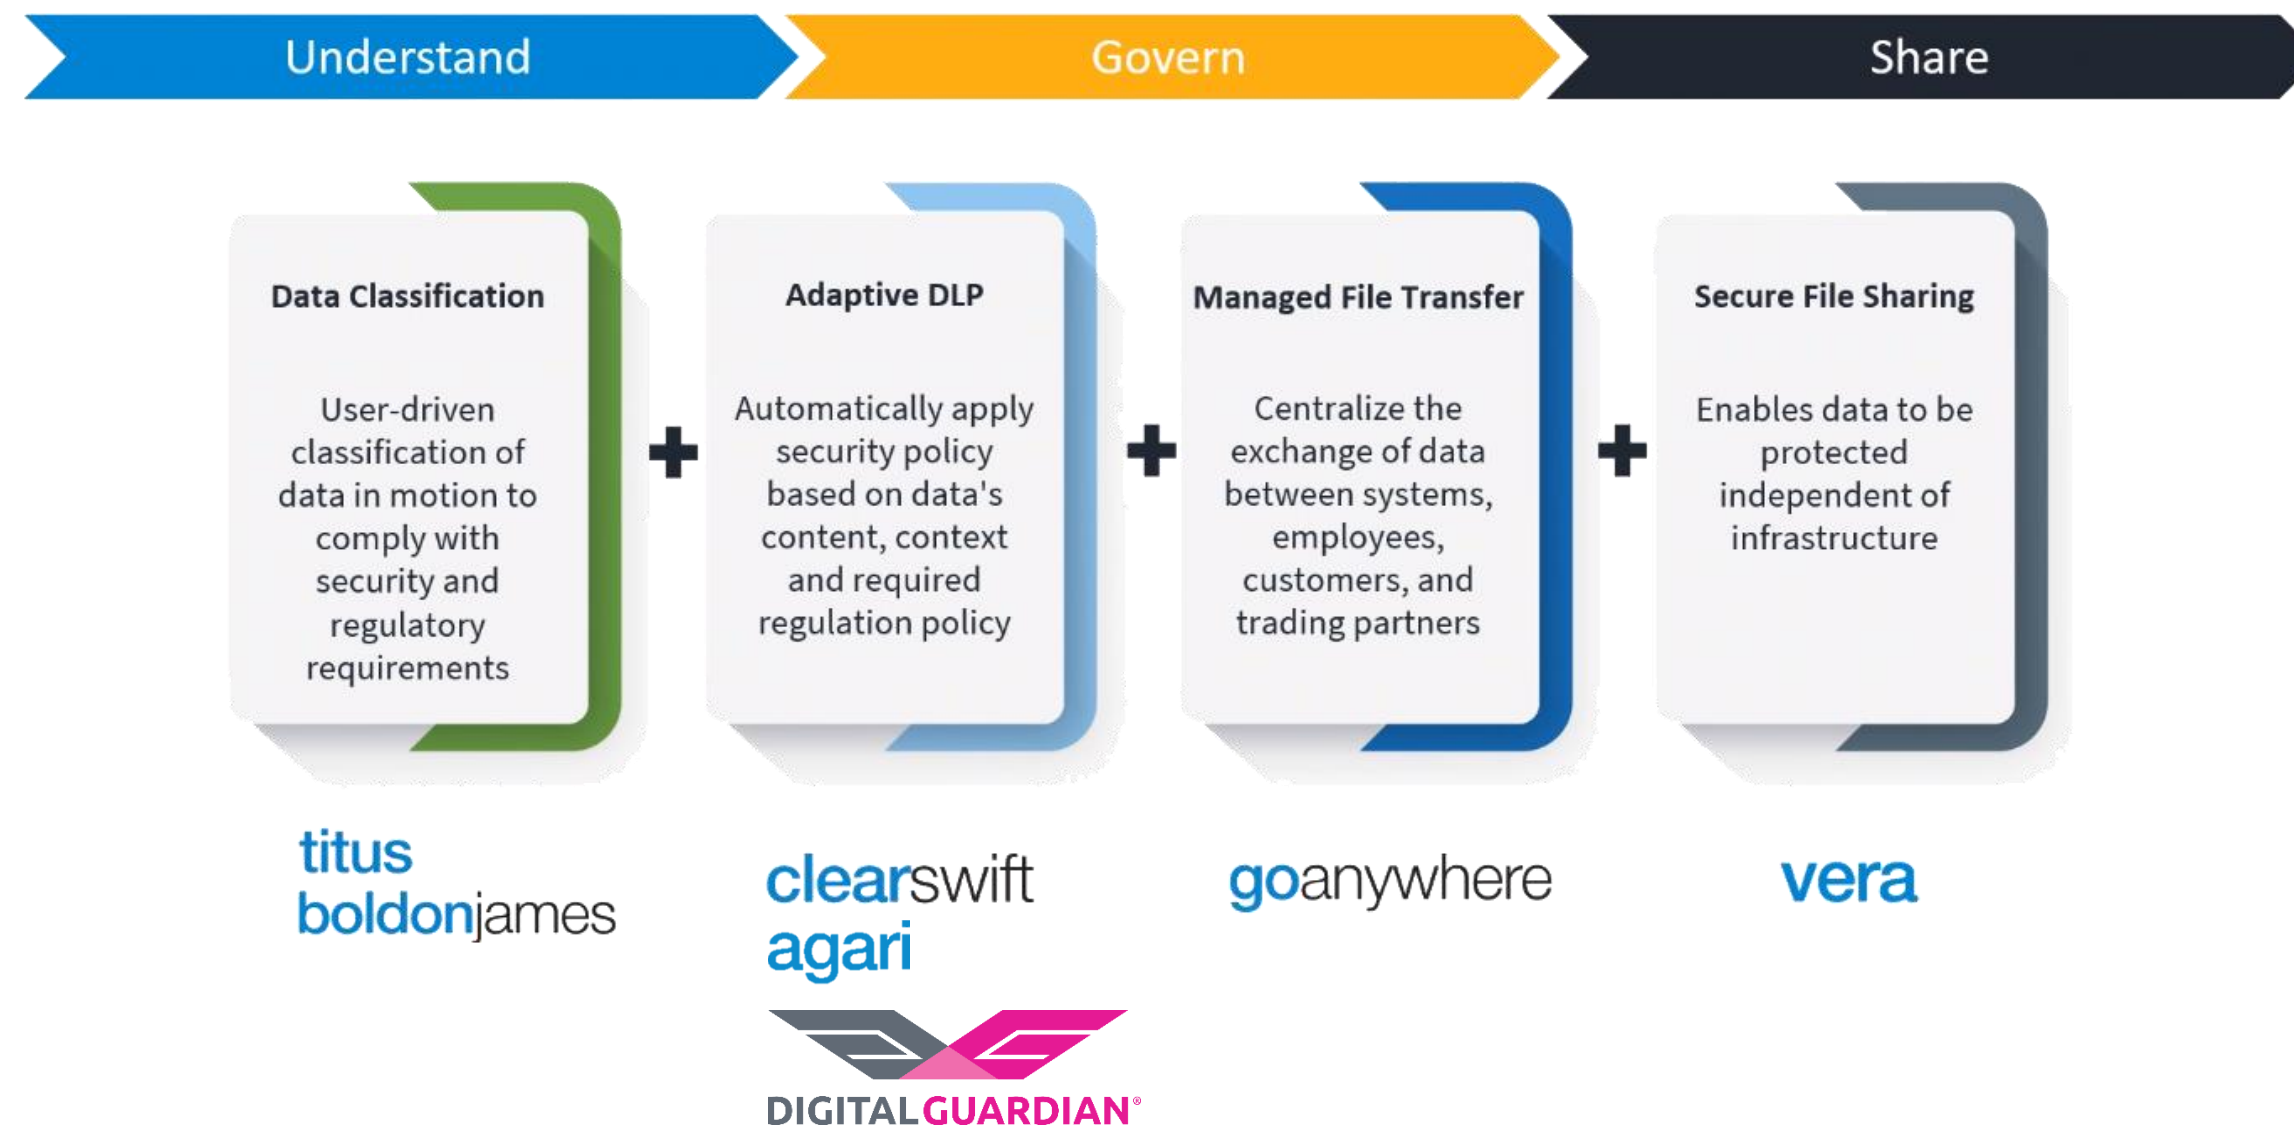

Fortra **Data Security Management** solutions can simplify and scale security, improving security controls by creating solutions to work for every modern company.

◉ Improve Data Security across all organization
◉ Enforce corporate security policy in all levels
◉ Detect, Inspect and Secure critical data across Email, Web, and the Cloud.
◉ Enable and automate Secure File Tranfers
◉ Demonstrate Regulatory Compliance
◉ Empower users and transform company security culture

Infrastructure Protection

Vulnerability Management	Pen Testing	Adversary Simulation

Identify, classify, remediate, and mitigate security weaknesses in an IT environment.

+

Safely uncover and exploit your organization's security weaknesses with penetration testing.

+

Protect sensitive data provide visibility into traffic on the system accelerate your threat response and safeguard valuable data.

digitaldefense

coresecurity

cobaltstrike

Fortra offers robust **IT Infrastructure Protection** solutions that cover all of your security needs, aiming to reduce the risk of such attacks through countermeasures like:

◉ Vulnerability Management
◉ Penetration Testing
◉ Red Teaming
◉ Intrusion Prevention and Detection
◉ Security Monitoring
◉ Configuration Management

nss

FORTRA

Document Security
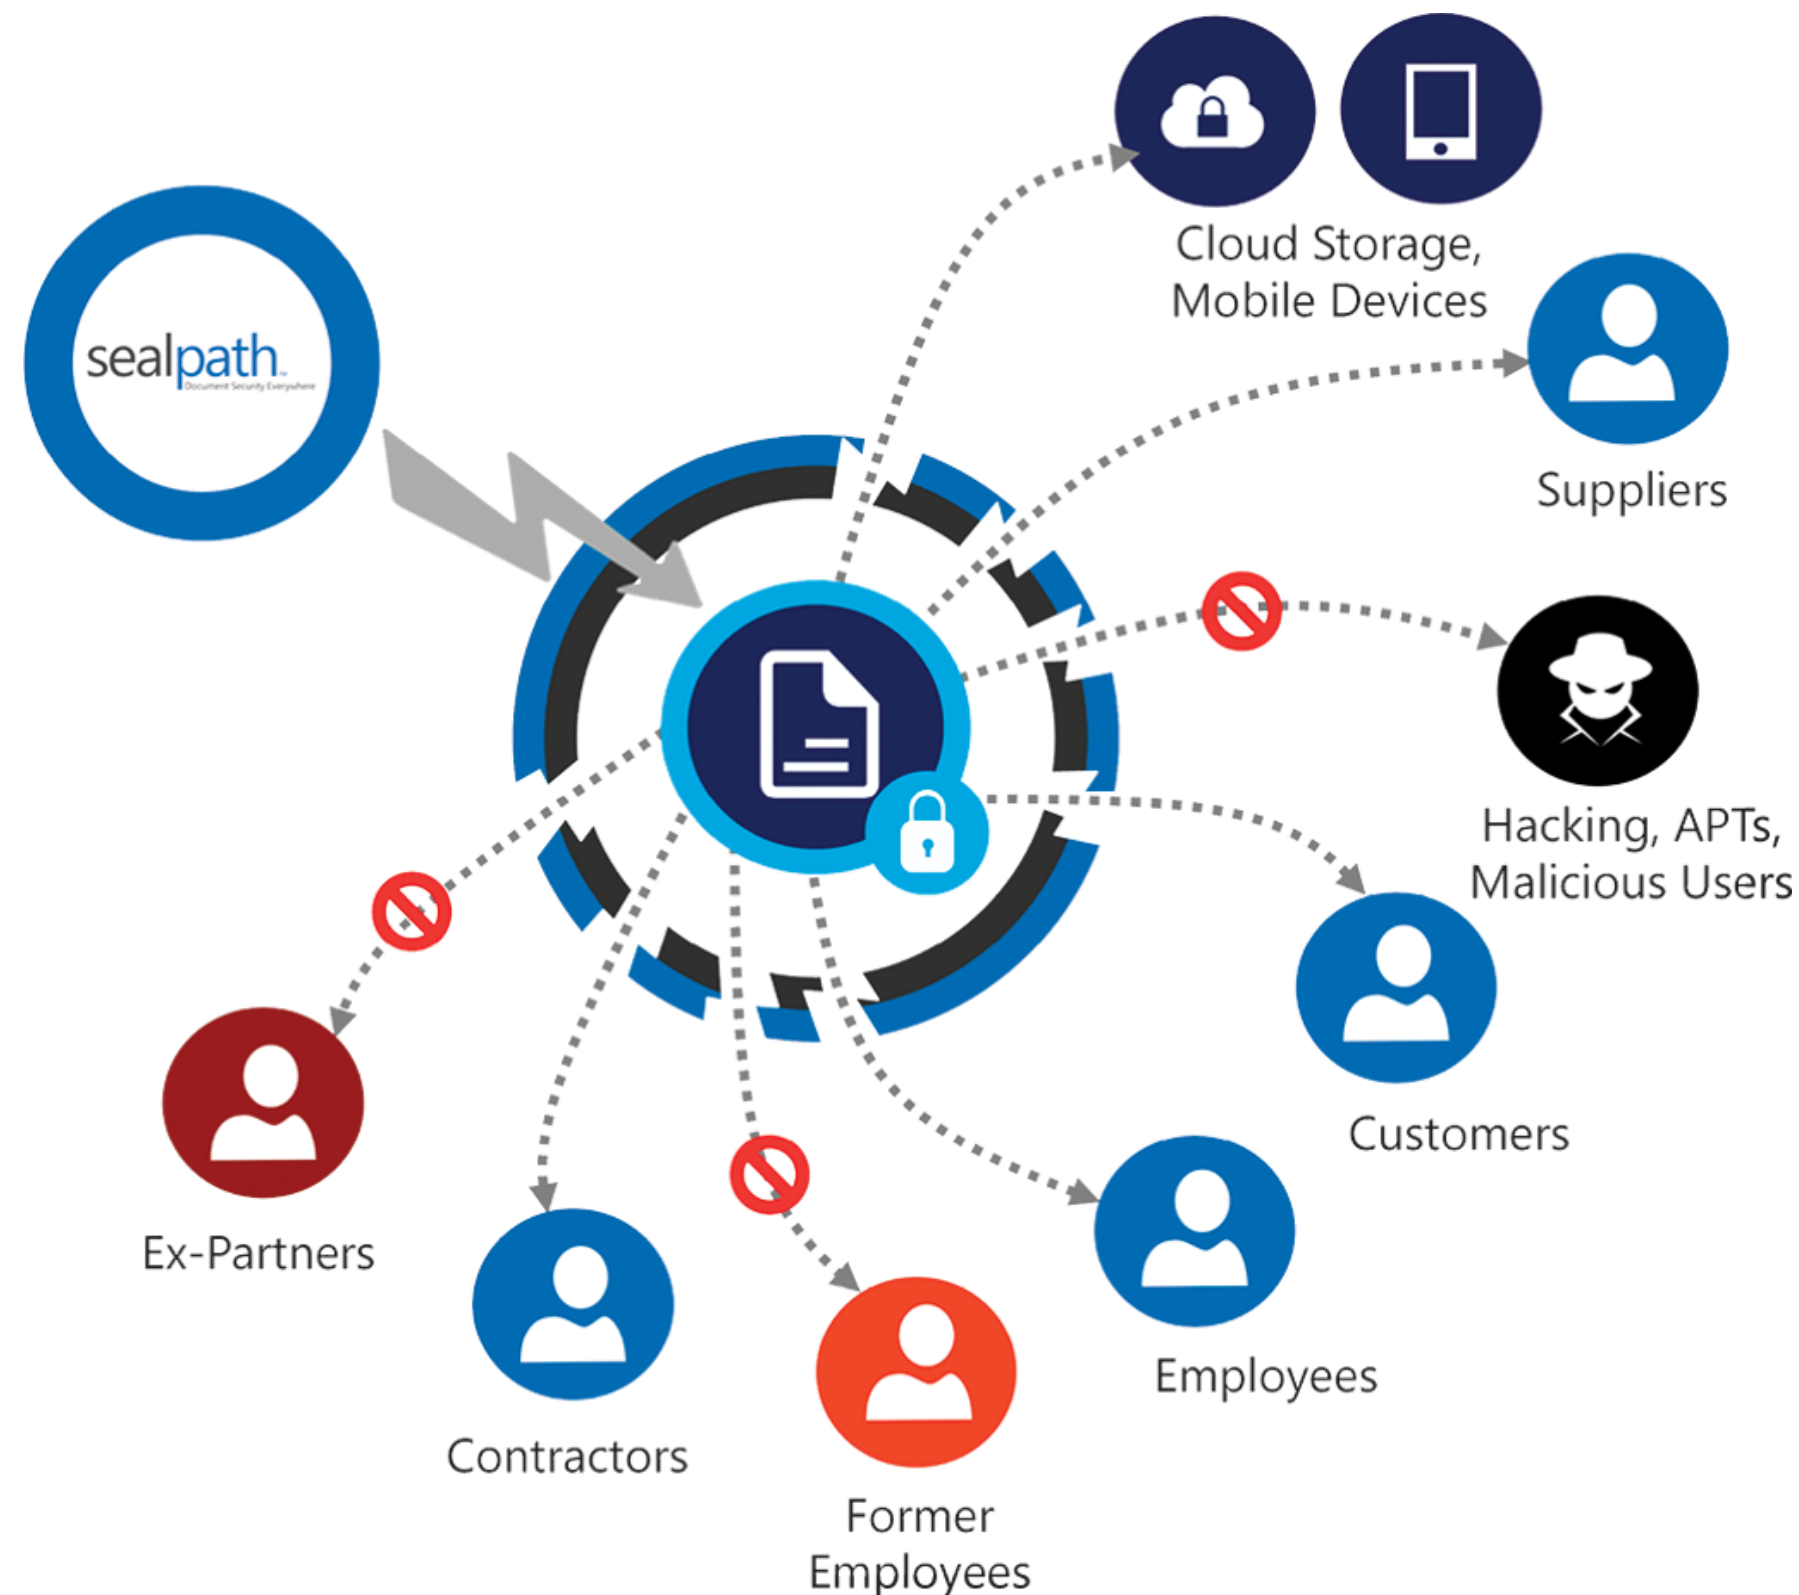

SealPath allows companies to **Protect its Critical Documents** wherever they are without high costs or complex technologies allowing them to be controlled

◉ Protect critical and confidential documents
◉ Distribution & Access monitoring of documents
◉ Private data environment controlled globally
◉ Modify restriction policies dynamically
◉ Revoke access to the documents in real time, whenever & wherever they are

sealpath

PKI Solutions & Identity Services

GlobalSign **Identity and Security Solutions** enable enteprises around the world to conduct secure online communications

- ◉ Globalsign Certificates are trusted by any Browser, OS, Device and Application and are used for Server Identification, Digital Document Signing, Digital IDs, Timestamping etc.
- ◉ GlobalSign Access Control & Authentication Control which users, machines and devices can access corporate networks and services
- ◉ Code Signing certificates certify that a signed application is legitimate and comes from a known software vendor

SIEM & Log Management
LogPoint is a simple but super powerful **SIEM platform**, with a straightforward architecture, categorization and a simple search language

- ◉ Easy Integration & High Performance
- ◉ Supporting many Vendor Devices by Templates including Normalizations & Dashboards
- ◉ Complex Processing with Simple Methodology
- ◉ Easy deployment and Maintenance
- ◉ High availability, Scalability & Decentralization
- ◉ Affordable in Price

Application Security Testing
Invicti Security is a leader in **Application Security Testing**. Invicti tools should be treated as part of the development and operational processes being your initial penetration testing tool

- ⊙ Comprehensive multi-team solutions built to scale
- ⊙ Built for efficiency & ease of use
- ⊙ Ideal for complex and decentralized IT infrastructures
- ⊙ Enable API based flexible integrations
- ⊙ Available locally and in the cloud

Invicti

Password Management
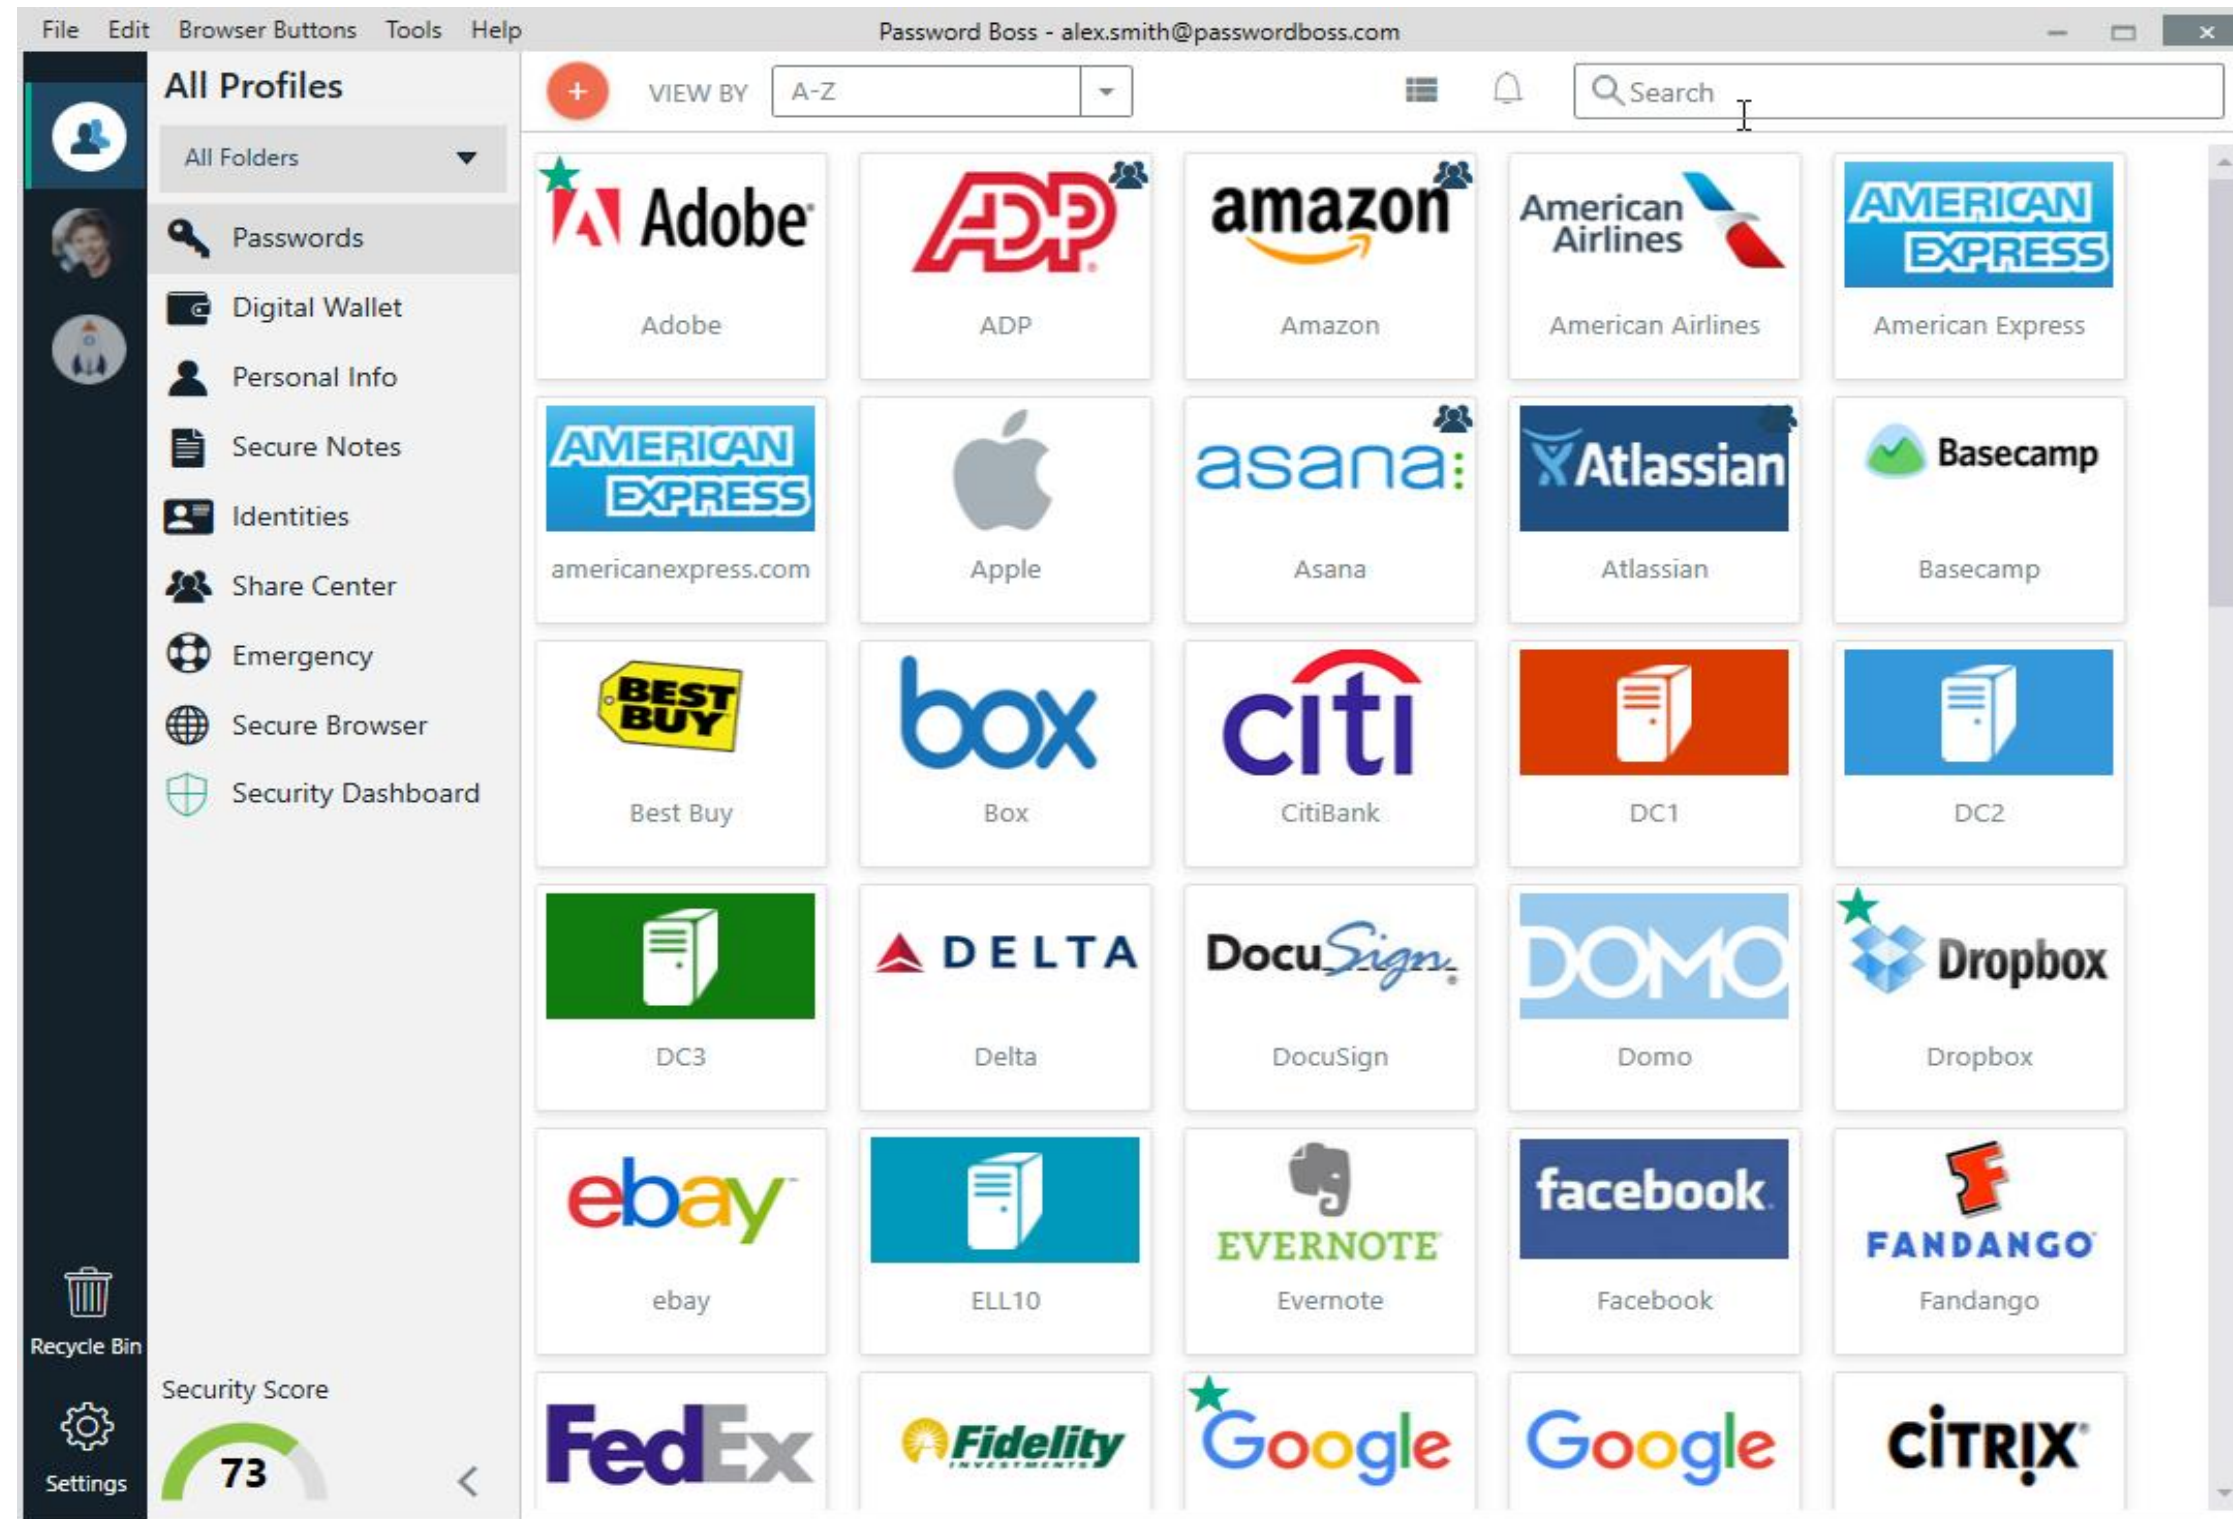

Password Boss **Password Management** solution helps companies to increase security while reducing their risks from security breaches, specifically designed for MSPs to support their clients effectively

◉ Secure Password Sharing within your team
◉ Centralized Dashboards and Reporting
◉ Multi-Devices Access
◉ Two Factor Authentication
◉ Multiple Integrations out of the box
◉ Designed for MSPs

Physical / Virtual Backup & Disaster Recovery
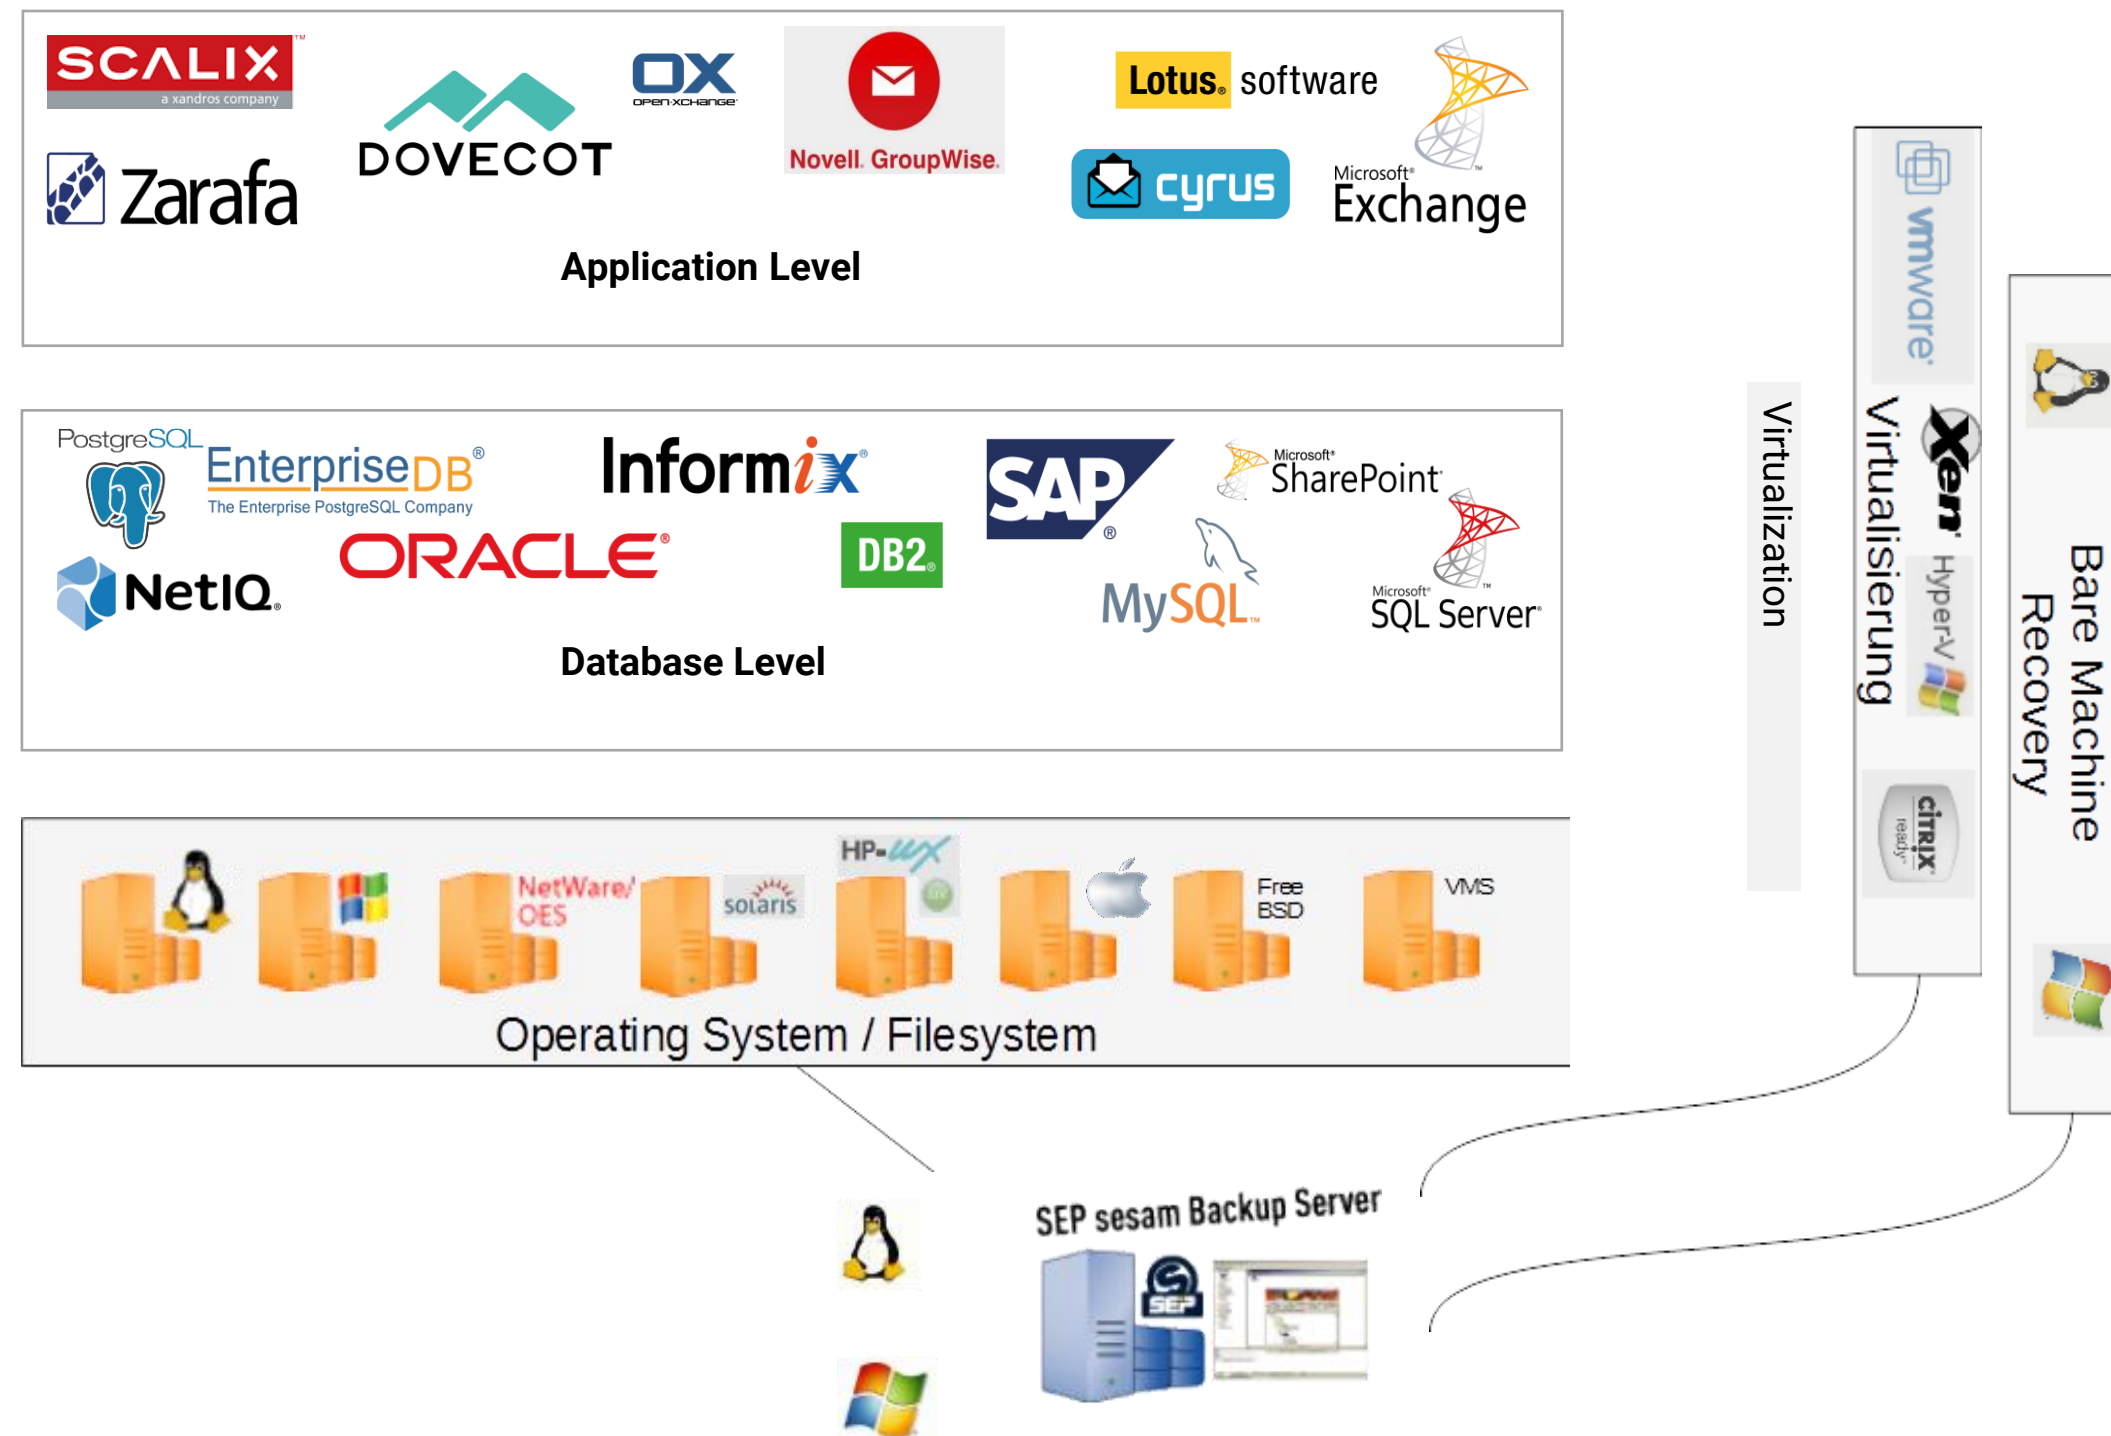

SEP provides a comprehensive and highly **Scalable Backup and Disaster Recovery** solution, supporting all OS architectures of various sizes and diversity

- ◉ Platform Independent supporting Windows, Linux, UNIX, MacOS X and more
- ◉ Multi-Streaming Technology
- ◉ VMware, RHV, Hyper-V and Citrix Virtual Support
- ◉ Data Deduplication & Replication
- ◉ Supporting backup for Exchange, GroupWise, Lotus Notes, Scalix, Zarafa, OX and more
- ◉ Bare Metal Disaster Recovery

Email Archiving

All versions of
Exchange Server

All IMAP or POP3
e-mail servers

Microsoft Office 365
and G Suite

PST, EML and
other e-mail files

MDaemon, IceWarp
and Kerio Connect

E-mail clients such as
Outlook, Thunderbird etc.

Mailstore **Email Archiving** solution guarantees the security and availability of business sensitive data in your Emails for the years to come.

◉ Allows existing emails to be archived from different sources like existing mailboxes, email clients, PST files etc.

◉ Using deduplication to reduce the total storage requirements, saving up to 70% Storage Space

◉ MailStore Web Access allows users to easily access the archive from anywhere including mobile devices

MAIL STORE™

Link Load Balancing, Wifi & SDWAN

PePLink specializes in Internet redundancy, **WAN Link Load Balancing**, Failover, High Availability, Wireless and **Business Continuity** solutions

◉ PePLink Load Balancers enable the combination of multiple lower-cost internet connections

◉ All devices are easily managed and can be setup without deep knowledge of networking

◉ PePLink creates wireless mobility solutions for business or large city-wide deployments

◉ MediaFast Content Caching Technology enables on-the-fly content delivery and downloads.

Tiered Backup Storage

The Future of Backup Storage:
Tiered Backup Storage

System scales to a 2PB full backup -
Largest in the industry

Over 400TB/hr. ingest rate at 2PB full backup –
Fastest in the industry

Restores as fast as disk,
20X faster than dedupe appliances

Backup window that is **fixed length** as data grows

Disk-cache Landing Zone
(performance tier)
for the fastest backups and restores

Long-term Retention Repository
(retention tier)
for low-cost long-term deduplicated retention

Backups as fast as disk,
3X faster than dedupe appliances

25+ supported backup applications & utilities

Scale-out of all resources as data grows

Adaptive Deduplication **for strong offsite DR RTO & RPO**

Most complete & lowest cost Ransomware recovery

Lowest cost up front and over time

Easy to use, manage, and scale
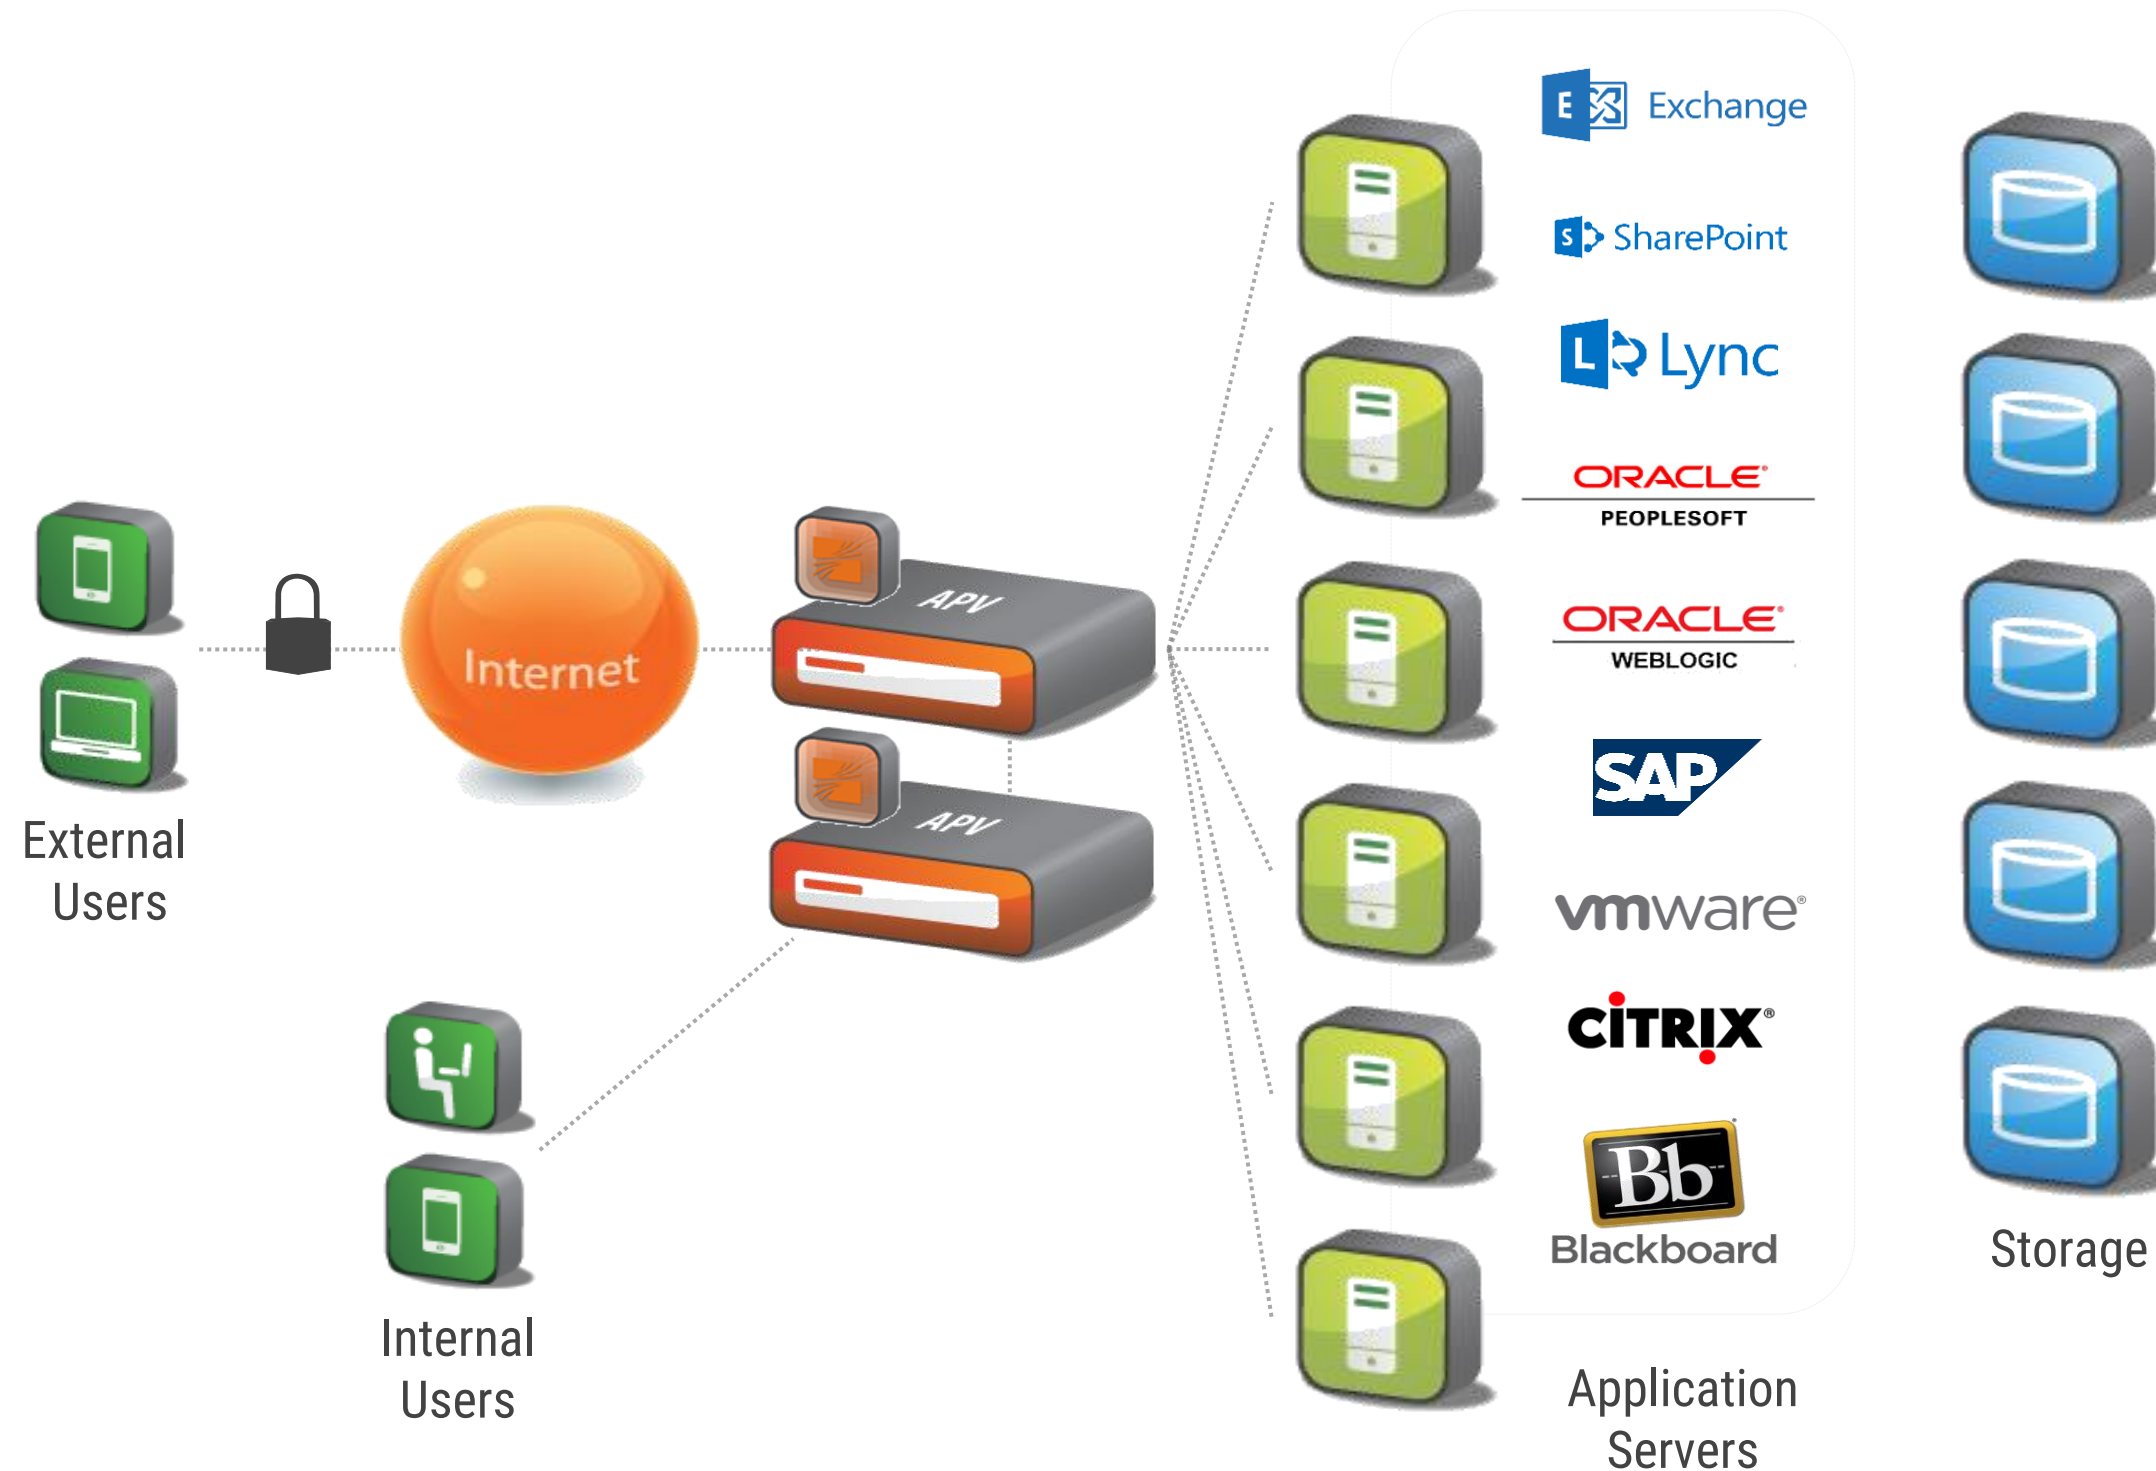

Easy remote installation – no onsite visit required

Using Exagrid **Tiered Backup Storage**, shortest backup times can be sustained even if data grows over time ensuring efficient long-term retention

◉ Various-sized backup storage appliance models that can be mixed and matched in a scale-out dedicated storage for backup systems

◉ Zone-level deduplication, resulting in the fastest backup & restore performance at the lowest price

◉ Ransomware protection in the Retention Tier as that tier is not accessible to intruders

◉ Supporting a wide variety of backup applications, utilities, and dumps as Veeam, Veritas, Oracle etc.
