

DATASHEET

Managed PKI Platform

Support and Manage Enterprise-wide Certificate Needs

GlobalSign's cloud-based certificate management platform significantly reduces the effort, cost and time associated with issuing and managing multiple enterprise Digital Certificates. The GlobalSign Managed PKI platform is a cost-effective solution for simplifying PKI deployments and eliminates the need to run an in-house CA.

Support for multiple entities under one account and delegated user administrator offer complete, centralized control of certificate needs across your entire organization.

All domains and profiles in the Managed PKI platform are pre-vetted so certificates are issued immediately after they are requested. Certificate lifecycle, billing and user management are all contained within one easy-to-use, cloud-based platform.

Secure SaaS-based Platform

Our Managed PKI platform and CA services are delivered via a WebTrust audited robust infrastructure with global data centers, redundancy, high availability, world-class instrumentation protecting the network and massive scalability demanded by the emerging \$14.4 trillion IoT market.

MANAGED PKI USE CASES

- **SSL / TLS CERTIFICATES**
 Secure your internal and public networks with our full range of SSL Certificates - OV, EV, Wildcard and SANs - and certificates issued from non-public CAs for special internal uses cases
- **TRUSTED DIGITAL SIGNATURES**
 Replace wet ink signatures and enable electronic workflows with digital signatures for PDF and Microsoft Office documents
- **EMAIL SECURITY (S/MIME)**
 Encrypt and digitally sign sensitive internal communications and mitigate phishing threats with S/MIME
- **USER AUTHENTICATION**
 Strengthen or replace passwords with cost-effective and user friendly certificate-based authentication
- **MACHINE & DEVICE AUTHENTICATION**
 Ensure only approved machines and devices can access your corporate networks and resources
- **MOBILE DEVICES**
 Prevent unauthorized device access and transfer desktop-based identities to mobile devices for authentication to applications and networks and email encryption and signing

MANAGED PKI FEATURES

GlobalSign's secure SaaS-based platform offers unique features and functionality that give you complete control of your certificate needs from one centralized account. APIs, inventory tools and Active Directory and Mobile Device Management (MDM) integrations make it easy to automate and track certificate deployments.

■ INSTANT ISSUANCE OF MULTI-USE DIGITAL CERTIFICATES

Pre-vetted company profiles and domains mean you can immediately issue certificates to accommodate specific department or project needs - SSL, digitally sign and encrypt email (S/MIME), authenticate users and devices, enable mobile security and authentication, digitally sign Microsoft Office and PDF documents, and SmartCard Logon

■ AUTOMATION AND INTEGRATION

Automate certificate lifecycles and workflows with APIs and integrations with Active Directory and MDM platforms. Support mixed environments and provision certificates to Windows and Apple OSX endpoints, Linux servers and mobile and networking devices

■ FLEXIBLE BUSINESS TERMS AND UNLIMITED ISSUANCE LICENSES

Managed PKI offers significant volume discounts over purchasing individual certificates. You can choose from various purchasing options, including Pay as You Go, deposit method and unlimited issuance licenses for increased flexibility with budget planning

■ MULTIPLE ORGANIZATION PROFILES

Register multiple companies or departments (profiles) under one account. Ideal for umbrella entities needing to manage certificates for several subgroups, all certificate activity can be monitored, managed and centralized from just one account

■ GRANULAR USER PERMISSIONS

Account administrators can control which staff members can apply for, approve, renew and revoke certificates at the domain or profile level, ensuring only approved staff can access certificate activity

■ NO HIDDEN FEES

You only pay for certificates. There are no setup, hosting, or re-issuance fees and we do not charge for multiple profiles or extended key usages

About NSS

NSS is an international Value Added Distributor of leading edge IT solutions, covering technology areas including information security, networking, unified communications, data storage, virtualization and data centre infrastructure systems. Through high technology and deep knowledge of the marketplace, NSS executes the due diligence to select leading edge strategic partnerships with superior vendors and leading technologies that give our channel an opportunity to differentiate from the competition in a crowded market through first class proven solutions.
