Unlock the Intelligence of your Data

Your data have a story to tell. Discover patterns of suspicious/malicious behavior hidden inside your network activity.

ClearSkies™

AN ODYSSEY PRODUCT

PLATFORM

ClearSkies™ Threat & Vulnerability Management

ClearSkies™ Threat & Vulnerability Management Platform empowers you to build a cyber resilient organization by supporting you in anticipating, responding to, swiftly recovering from and adapting to cyber, insider and third-party threats. This is achieved by intelligently and swiftly associating threats with corresponding vulnerabilities, to accelerate the rate at which you identify and respond to actual threats.

The Platform is the foundation on which ClearSkies™ products and add-ons are built. The ClearSkies™ line of products and services enables organizations, as well as Managed Security Service Providers (MSSPs), to modernize their SOC capabilities by unlocking the intelligence of their data to effectively managing digital risk while meeting compliance requirements. By optimizing their overall security posture, organizations are able to safeguard the confidentiality, integrity and availability of their sensitive information.

ClearSkies™ Cloud SIEM offers an array of modern SIEM core capabilities, granting real-time visibility of your security posture as well as detection and response capabilities. Add-ons include **Active Defense, Endpoint Detection & Response (EDR), Identity & Access, Vulnerability Management** and **Third-Party Integrations "Data Enrichment"**, available to be procured at any time based on your needs and budget.

With Orchestration and Automation at the core of the investigation process, actions are prioritized according to threat and asset classifications, as well as risk classification, depending on your organization's risk appetite.

ClearSkies™ gives our Board a comprehensive bird's-eye view, with drilldown capabilities, of what is happening in our digital environment at all times.

Marlow Navigation, Cyprus

CLEARSKIES™ CLOUD SIEM

Unravel Real-Time Visibility

ClearSkies™ Cloud SIEM Stores, processes, and intelligently analyses vast volumes of heterogeneous historical and current log and event data in real time in a fraction of the time needed by traditional SIEMs. The data collected from heterogeneous sources is combined with evidence-based knowledge of emerging threats and vulnerabilities to produce actionable information.

- Timely spot suspicious/malicious threats/behaviour
- Effortlessly monitor your compliance status
- Customized working environment
- Reduce False-Positive Alerts

It streamlines your Threat Management Process by significantly accelerating your proactive threat detection and response capabilities, thus drastically reducing your "Detection Deficit" (time between breach and discovery). At the same time, it safeguards the Confidentiality, Integrity and Availability of sensitive information found within log and event data.

A well-rounded set of ServiceModules

Event Management

Efficiently and effectively monitor, classify and manage events according to their severity.

Reports

Appropriate and accurate reporting can help you keep an eye on your compliance obligations as well as your internal audit requirements.

Threat Intelligence

Optimize your security posture is an ongoing process of proactively adapting to the ever-changing information-threat landscape.

User & Entity Behavior Analysis (UEBA)

Profile/baseline user related host/network/ application activities for detecting suspicious/ malicious behavior and intrusions by identifying meaningful anomalies or deviations from "normal" patterns of behavior.

Real-Time Analysis

Search and associate through billions of current and historical log and event data, using the power of big data, to visualize your results in seconds and identify patterns of suspicious/ malicious behaviour.

SOAR

Streamline the automation, orchestration, investigation, and prioritization of response actions, to contain or intercept a threat.

Compliance

Effortlessly navigate the requirements of the Standards and Regulations, define their scope, review their status, and identify actions for timely remediation.

Dashboards

An overview of your security alerts status, performance, availability, user behavior, and other metrics that are more relevant to you.

Performance & Availability

Proactive monitoring of the performance and availability of network devices, systems and communication links by collecting and processing Netflow and SNMP log and event data.

ADD-ONS

Combine ClearSkies™ cloud-based products to minimize your digital risk

Active Defense

Lure and Trap Threat-Actors Post-Breach

Endpoint

Detect & Respond to Malware & Insider Threats Before it is too Late

Identity & Access

Stay on Top of your User Base

Vulnerability Management

Focus on real threats & reduce false positives

Since we started using ClearSkies™ products, we have improved our strategic decision-making due to the crucial security context found in the information they provide.

Nesma & Partners, Kingdom of Saudi Arabia

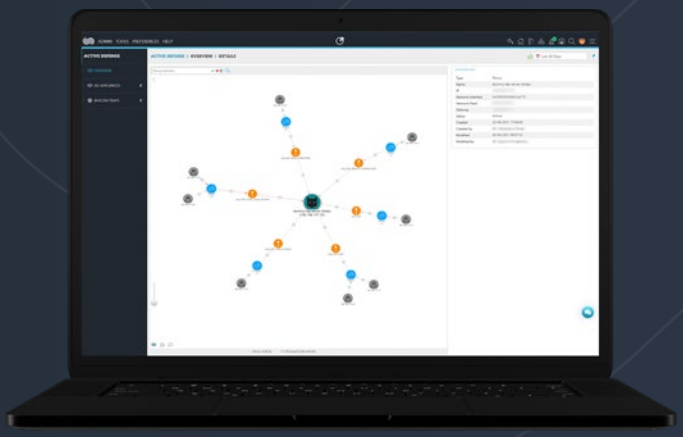
ACTIVE DEFENSE

Hunting the Attackers, not the Attacks

ClearSkies™ Active Defense, is a post-breach detection technology which deceives cybercriminals into thinking they have discovered a way to escalate their privileges, perform lateral movement, and/or access sensitive information/data towards achieving their goals.

By occupying cybercriminals for as long as possible with decoys and traps, you can delay them from achieving their real purpose, thus gaining valuable time to take necessary defensive actions.

- Lay traps to catch attackers in the event of a breach.
- Lure and deceive attackers into revealing information about them.
- Buy valuable time by delaying and misdirecting attackers in your network.



IDENTITY & ACCESS

Spot Who did What from Where and When

ClearSkies™ Identity & Access supports you in defending against Insider Threats by aggregating data relating to users' identity and access management. It delivers vital and comprehensive visibility and tracking of precisely what users are authorized to access on your organizational critical systems and resources. Such a powerful user auditing capability also helps ensure compliance with corporate policies and regulatory frameworks.

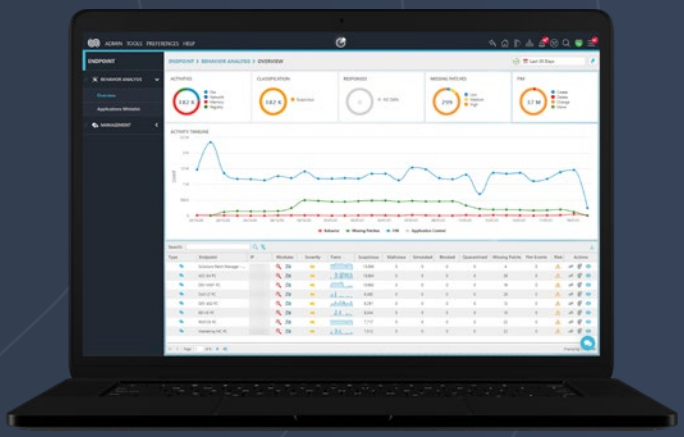
- Keep user account statuses in check.
- Easily spot suspicious or vulnerable user accounts.
- Drastically improve the auditing and insider threat detection capabilities with minimal effort.
- Aggregation, visualization and monitoring of statuses of potentially thousands of user accounts.
- Integration with and complementing of other ClearSkies™ products.

ENDPOINT

Detect and Respond to threats as they emerge

ClearSkies™ Endpoint Detection and Response (EDR) is a comprehensive Endpoint Protection solution, fully integrated with ClearSkies™ Cloud SIEM. It complements the detection and response of cyber, insider and third-party threats by utilizing Behavioral Monitoring and Analysis (BMA), which leverages ClearSkies™ advanced security analytics, and Threat Intelligence.

- Get real-time visibility for faster response
- Automate and orchestrate response actions
- Prevent data leakage
- Simplify Incident Investigation and Threat Hunting
- Identify users' suspicious/malicious behaviors by using UEBA
- Enhance and simplify compliance and auditing requirements



VULNERABILITY MANAGEMENT (VM)

Focus on real threats & reduce false positives

Provide security teams with the ability to assess, prioritize, act and managed vulnerabilities from supported Vulnerability Assessment tools (Qualys, Nessus, Nexpose, OpenVas).

- Assign vulnerabilities based on their classification and impact.
- Associate threats with vulnerabilities to help you orchestrate and automate response actions.
- Drastically reduce false positive alerts (up to 95% reduction), thus saving valuable time and resources of security teams towards focusing on real threats.

Odyssey is included in Gartner's 2021 Magic Quadrant, with ClearSkies™ Cloud SIEM.

ClearSkies™ Third-Party Integrations

Extend the power of your SIEM with best-in-class SIEM integrations (Data enrichment with Third-Party systems, applications, tools and intelligence, either through built-in integrations or via API).

Such data enrichment is categorized using a number of flag categories (i.e. database, SNMP, business applications, security, ticketing, cloud integrations etc enabling the easy identification of those integrations most relevant to your organization.

Third-Party Integrations "Data Enrichment"

Nessus Category: Vulnerability Management	**Qualys Category:** Vulnerability Scanner	**Nexpose Category:** Vulnerability Scanner
Azure Security Graph Category: Security	**Office365 Category:** Audit	**Baracuda WAF Category:** Security
Imperva Incapsula Category: Security	**Symantec Email Category:** Security	**ServiceNow Category:** Workflow Automation

MSSP PLATFORM

An Intelligent Cloud-Based Managed Security Operations Platform

Cloud-based **ClearSkies™ Cloud MSSP Platform**, together with its support and MSS training scheme, empowers you to provide top-quality Managed Security Services (MSS) that place your organization ahead of the competition.

Provide top-quality and cost-effective Managed Security Services (MSS) to your customers, positioning you as their only sensible choice.

Get peace of mind knowing that the Platform by which you offer your MSS remains constantly maintained, is continuously fed with Threat Intelligence, and remains compliant with relevant regulatory frameworks.

Stand out from the competition with your own multitenancy MSSP Platform backed by world-class cybersecurity expertise. Here's how:

- Brand your own white-label Managed Security Services (MSS)
- Provide top-notch competitive Managed Security Services (MSS)
- Reduce your operating costs through our cost-efficient licensing program
- Pay as you grow with a scalable and flexible service delivery model
- Get expert ongoing support, including onboarding, generous resources and continuous partner training

PROFESSIONAL SERVICES

Make the most out of your ClearSkies™

ClearSkies™ Professional Services provide a complete set of services revolving around the ClearSkies™ Threat & Vulnerability Management Platform.

These services help you to successfully implement and improve your organizational security posture while using ClearSkies™ products. Specifically, with ClearSkies™ Professional Services, our experts help with the design, implementation, configuration, optimization and training needed to get the most out of ClearSkies™ products.

Implementation	Configuration	Optimization	Training
• Installation and Initial Configuration • Onboarding of In-Scope Assets	• Implementation of Incident Escalation Process and Flows	• Effectiveness Assessment • Endpoint Policy Configuration • Log & Event Collection Optimization • Security Use Case Modelling and Adoption	• Endpoint Policy Configuration • Security Analyst

SERVICE DELIVERY MODEL

Take full control over your security budgets

Considering the varying sizes, needs, complexity, internal capabilities, budget constraints and cybersecurity management maturity levels of different organizations, ClearSkies™ Cloud SIEM is a flexible and scalable service delivery model offered as follows: ClearSkies™ Cloud SIEM, MS/MDR and Hybrid.

Package	ClearSkies™ Cloud SIEM	ClearSkies™ Cloud SIEM on Azure	MS/MDR	Hybrid
Log and Event Data collected daily	1, 3, 5, 10... GB	1, 3, 5, 10... GB	1, 3, 5, 10... GB	1, 3, 5, 10... GB
Real-Time Analysis	4 weeks - 12 weeks	4 weeks	4 weeks - 12 weeks	4 weeks - 12 weeks
Online Log and Event Data retention period	3 months - 12 months	3 months	3 months - 12 months	3 months - 12 months
Offline Log and Event Data retention period	Unlimited	Unlimited	Unlimited	Unlimited
Number of Secure Web Portal (SWP) users	Built-in 5 with the option for add-on	Built-in 5 with the option for add-on	Built-in 5 with the option for add-on	Built-in 5 with the option for add-on
Minimum license period	12 months	3 months	12 months	12 months
Endpoint Agent Free	Unlimited	Unlimited	Unlimited	Unlimited

Why our customers keep choosing ClearSkies™

ClearSkies™ cloud-based line of products and services offer an array of unique innovative features based on our expertise and experience, which reflect our understanding and ability to anticipate the Cloud & Information Security landscape. This allows us to develop innovation-driven products with a customer-focused approach and flexibility to reflect customer's evolving needs and budget.

Adaptability based on your needs

A flexible architecture that adapts to your special circumstances and environment regardless of the size or complexity.

Simplicity & scalability of the service delivery model

You have full control over their security budget

Ease of Deployment

Up and running in a matter of a few days with immediate results.

Innovative-driven products

We constantly develop our product to stay always one step ahead of the rapidly expanding information-threat landscape.

MOBILE APP

Real-time visibility while on the go

ClearSkies™ Mobile App's friendly intuitive interface brings your SIEM's user experience to your smart device to help you stay ahead of information-threats as they emerge, anywhere, anytime.

Your Cloud & Information Security Partner

Odyssey is a leader in Cloud & Information Security, supporting organizations around the globe into their cyber resilience journey.

For more than two decades, we continuously evolve our Cloud & Information Security solutions, services and products to support our clients in effectively managing their digital risks and adhering to compliance requirements.

Odyssey's Advisory Services empowers you to build a cyber resilient organization to effectively anticipate, respond, swiftly recover, and adapt to the emerging threats and vulnerabilities of a dynamically expanding and unpredictable threat landscape.

Our holistic approach combines the ClearSkies™ Threat & Vulnerability Management Platform, Managed Security Services (MSS), Governance, Risk & Compliance, Threat Risk Assessment services, Cloud Security and Integrated Solutions, to support your cyber resilience efforts.

Odyssey is included in **Gartner's 2021 Magic Quadrant** for Security Information and Event Management, with ClearSkies™ Cloud SIEM.

Odyssey is ISO 27001, ISO 9001 and ISO 22301 certified, and accredited by the Payment Card Industry Security Standards Council (PCI SSC) as a Qualified Security Assessor (QSA). We are also honored with the globally recognized Great Place to Work® certification, the assessment methodology used by "The Fortune 100 Best Companies to Work in America".

Gartner positions Odyssey in the Magic Quadrant due to its completeness of vision and ability to execute.
