Quality Management

NSS Data Assurance Policy

NSS places a high level of importance in protecting the data of the company and its customers as well as ensuring the quality of service it provides, according to the standards of ISO 27001:2013 and ISO 9001:2015 respectively.

NSS Quality Objectives

▷ Absolute specialization in the fields of its business activity.
▷ Continuous qualitative and quantitative improvement of the quality of products and services.
▷ Modern and responsible treatment of all customers needs.

Service Delivery Process

| GOOD STATUS	BETTER STATUS	BEST STATUS	MAINTAIN STATUS
NSS Relation with the Customer is NECESSARY	NSS Relation with the Customer is USEFUL	NSS Relation with the Customer is NOT NECESSARY	NSS Relation with the Customer is NON-EXISTENT
QUICKSTART	**ON-JOB TRAINING**	**SERVICE DELIVERY**	**QUALITY ASSURANCE**
NSS is delivering the services to the customer on behalf of the partner for a quickstart	Partners are properly trained to deliver services following the best implementation alternatives	Partner is delivering services with the help of NSS and is learning actively the implementation	NSS continuously assures that the projects are delivered according to the best practices

"We believe that Professional Services Quality is one of the most important aspects in successful business activities. We continuously try to leverage our partners' skills by continuous training, so that they can deliver excellent field services and ensuring successful implementations at the same time"

Cybersecurity As a Service

MSP
SOPHOS
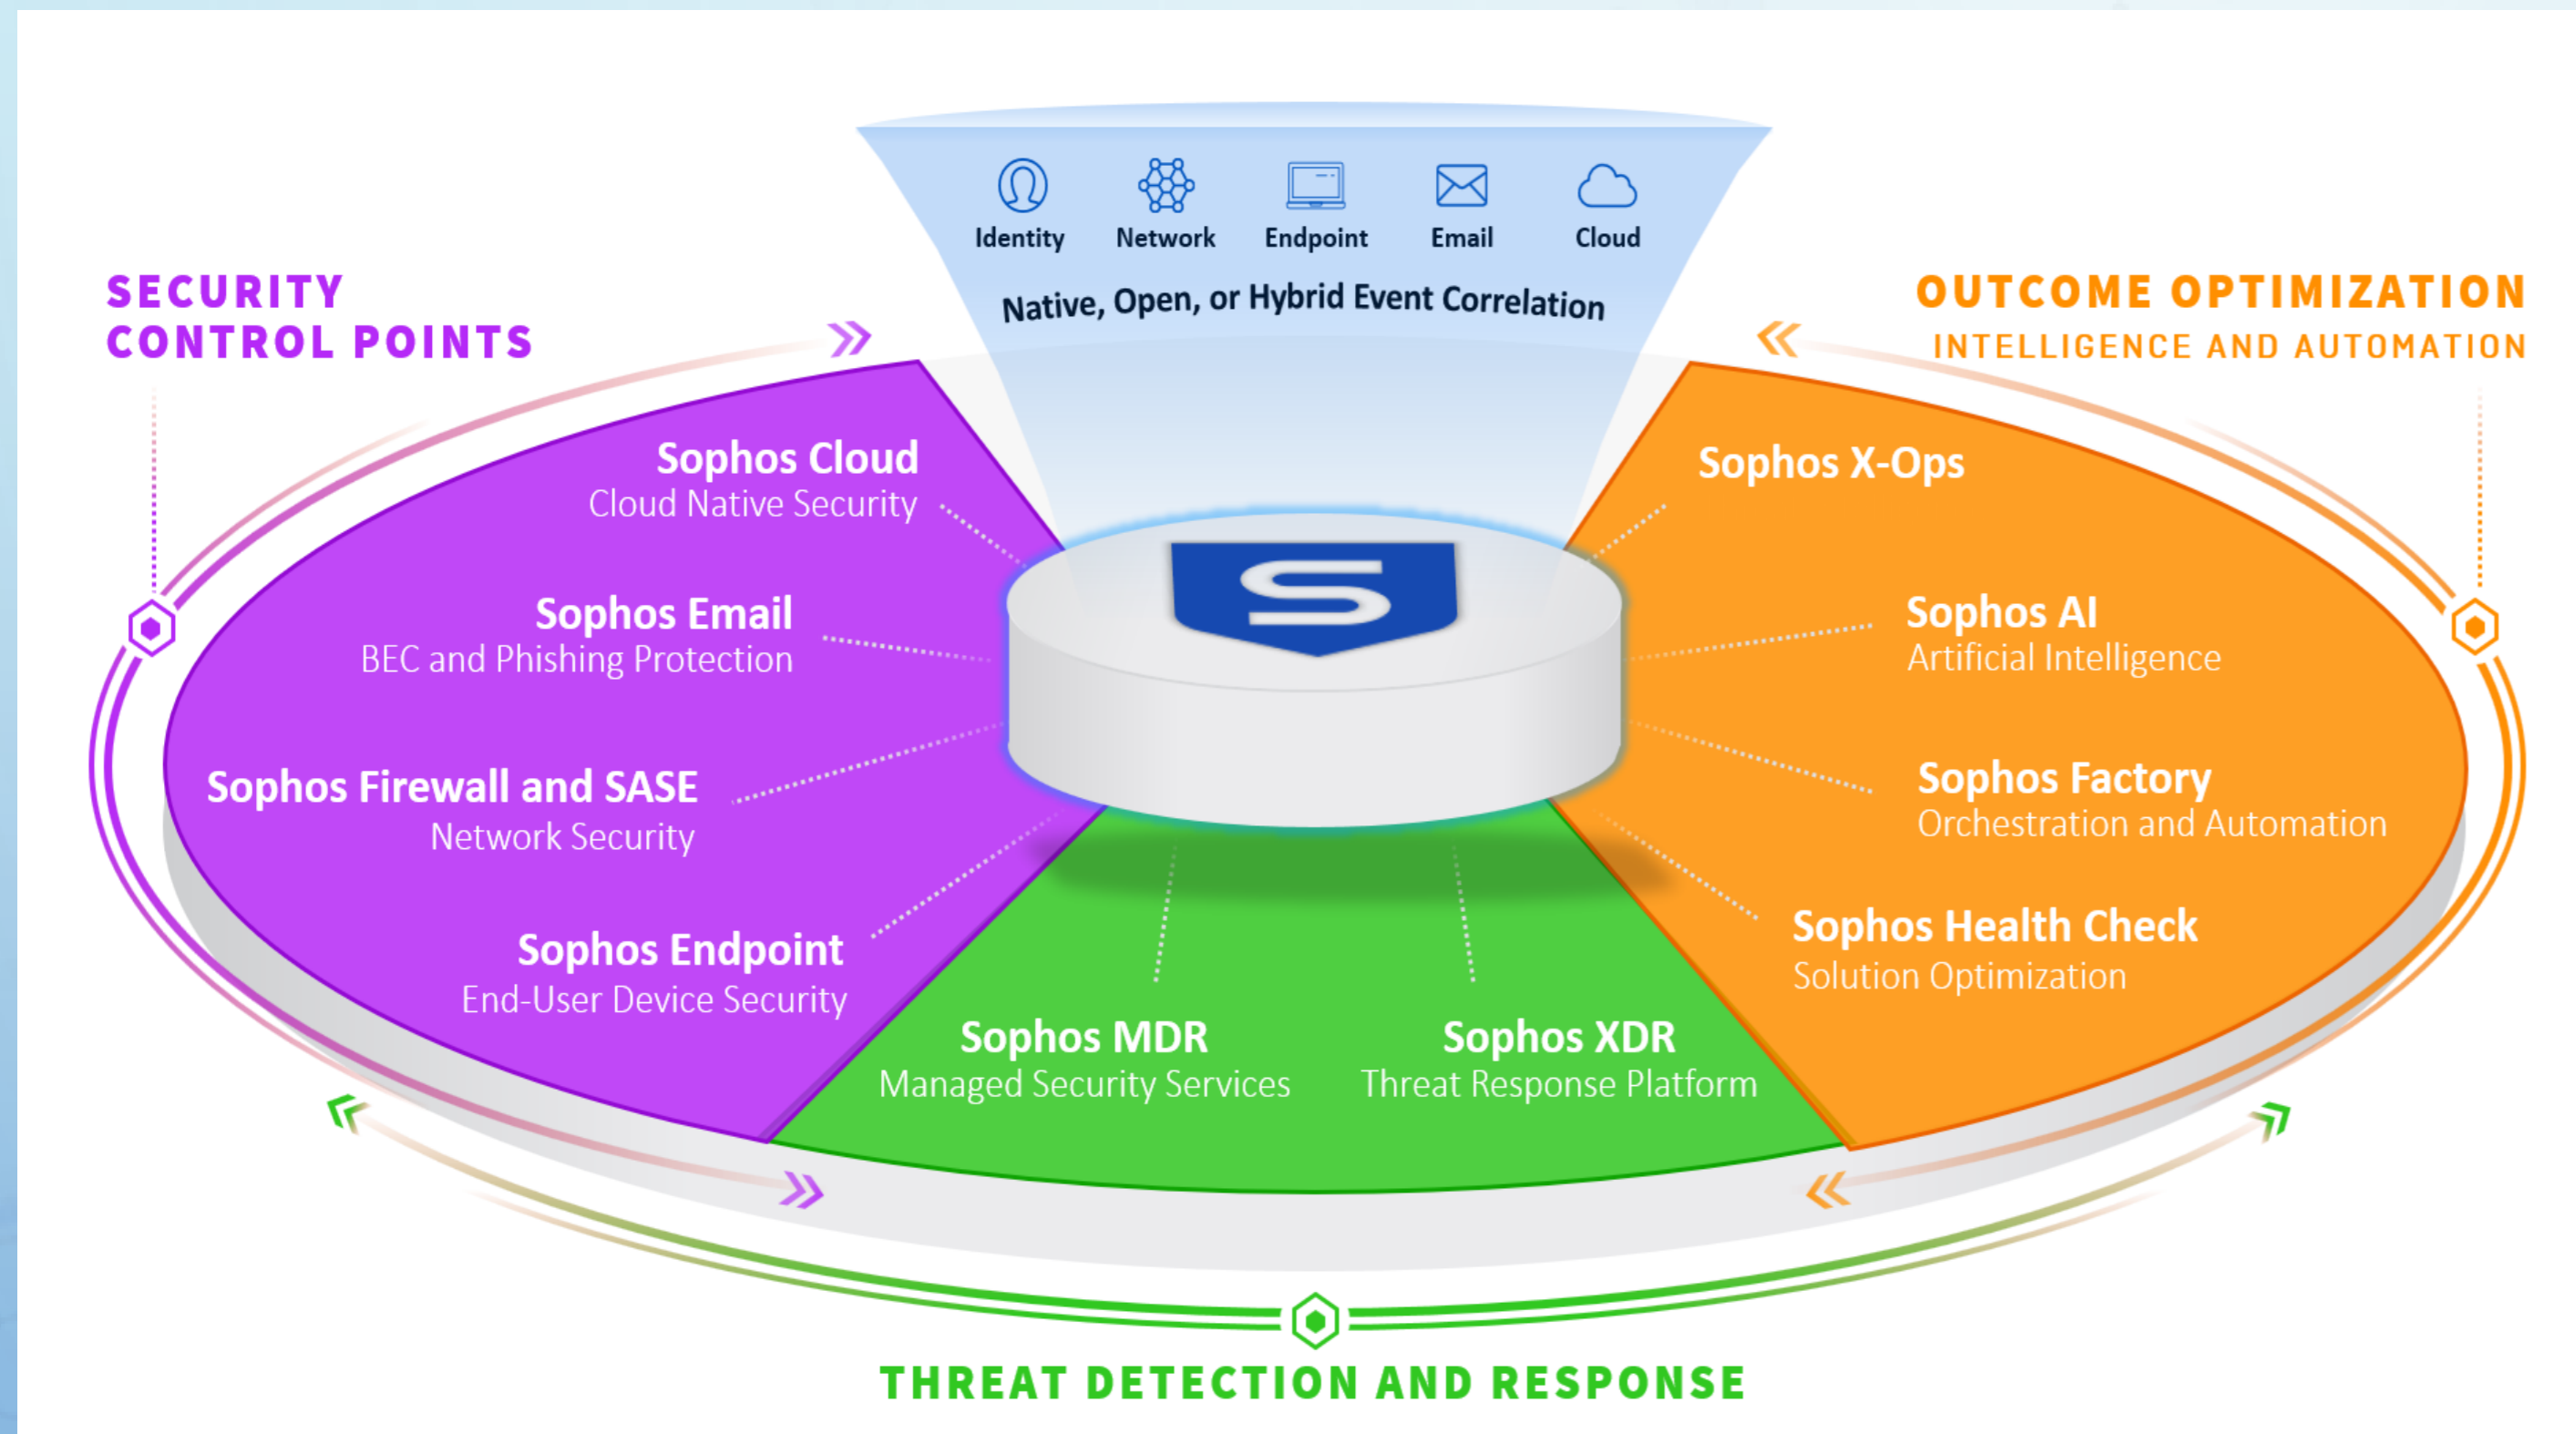

Sophos Security Products are working Simple and can be integrated, functioning together and being Synchronized working together as One

▷ Unified Security concept for all solutions

▷ Endpoint Security for Workstations & Servers

▷ Data Encryption for Media, Net Shares, Cloud

▷ Nextgen Web Security & Application Control

▷ Email Security & Data Leakage Protection

▷ Mobile Security for Phones & Tablets

▷ Support for all Operating Systems
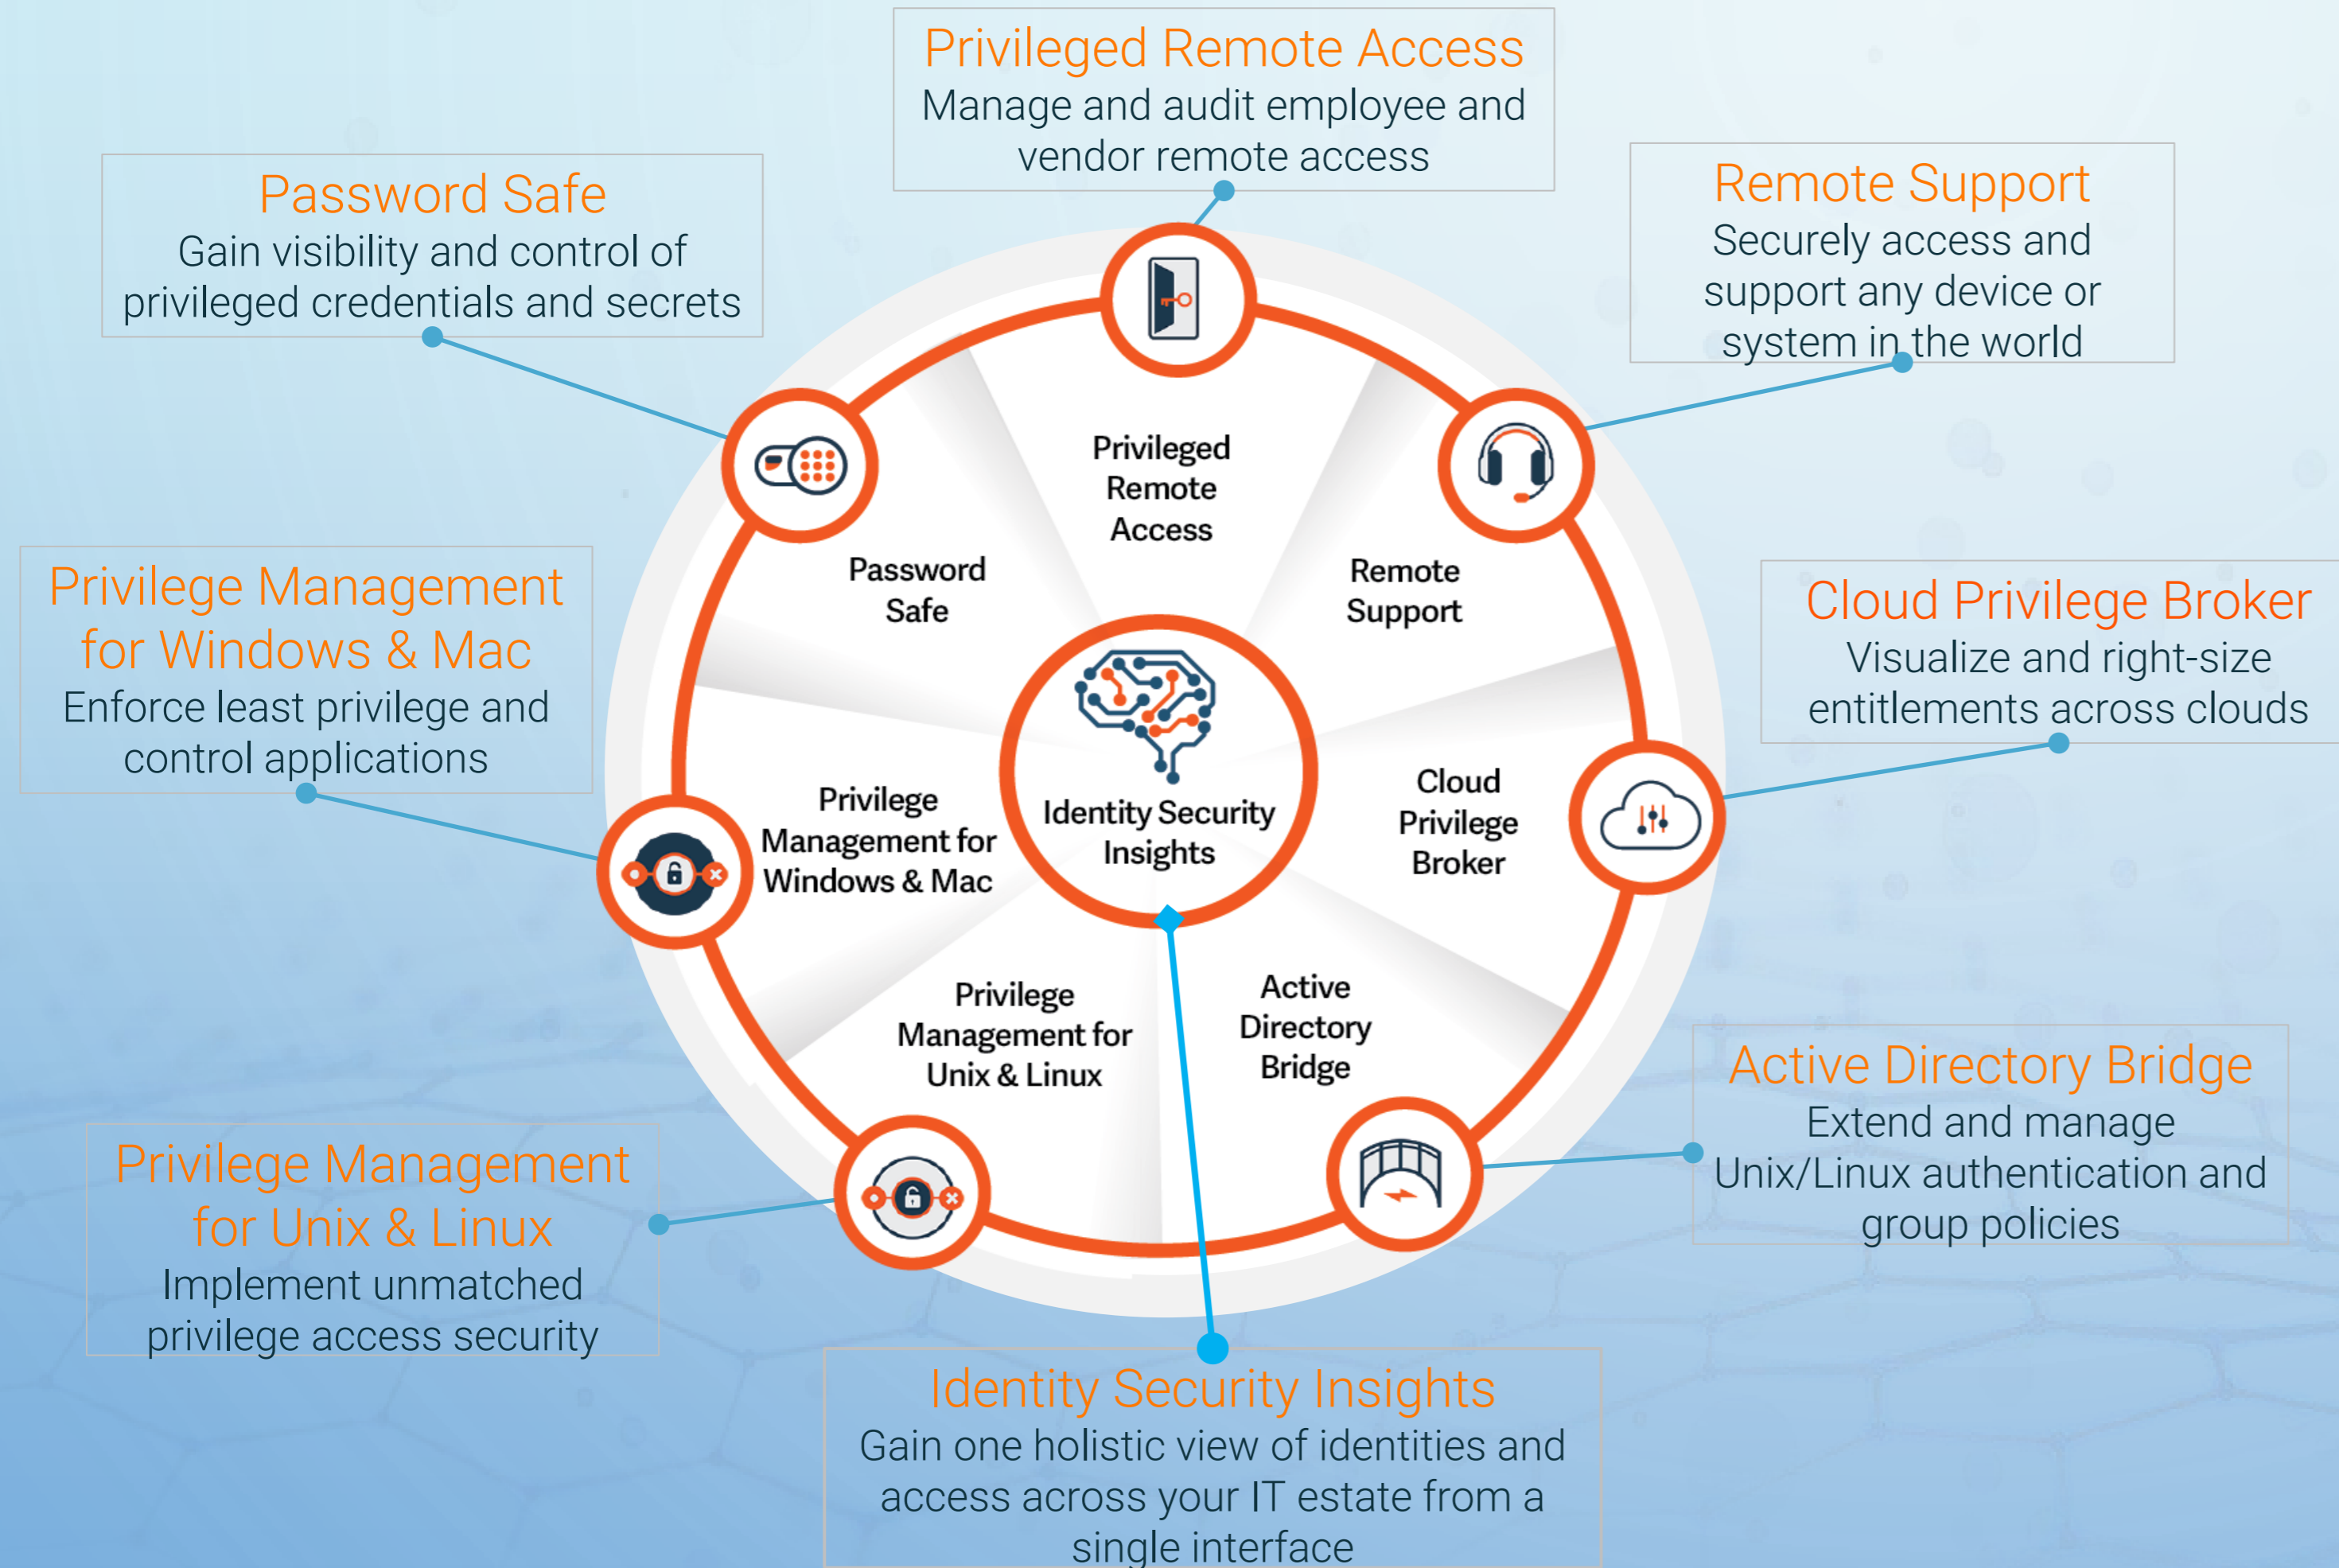

Sophos Adaptive Security Ecosystem (ACE)

Leveraging automation and human operators to deliver protection that constantly learns and improves.

▷ Enabling the shift from security management to security operations

▷ Constantly learning and improving

▷ Protecting systems and data wherever they exist

▷ Powering Synchronized Security. Delivering real business impact

▷ An open platform

▷ A system that grows with your business

Privileged Account Security

Privileged Remote Access
Manage and audit employee and vendor remote access

Password Safe
Gain visibility and control of privileged credentials and secrets

Remote Support
Securely access and support any device or system in the world

Privilege Management for Windows & Mac
Enforce least privilege and control applications

Cloud Privilege Broker
Visualize and right-size entitlements across clouds

Privilege Management for Unix & Linux
Implement unmatched privilege access security

Active Directory Bridge
Extend and manage Unix/Linux authentication and group policies

Identity Security Insights
Gain one holistic view of identities and access across your IT estate from a single interface

BeyondTrust Universal Privilege Management provides security to every user, asset, and session across your enterprise

▷ Scan, identify and profile all assets and accounts, providing full session recording and real-time visibility into privileged user behavior

▷ Eliminate unnecessary privileges and elevate rights to Windows, Mac, Unix, Linux and network devices without hindering productivity

▷ Privileged Remote Access allows you to secure, manage, and audit vendor and internal remote privileged access without VPN

nss
Affordable Cutting Edge

BeyondTrust

Data Protection

From discovery, to monitoring, to blocking

AI engine recommendations reduce business friction

Taking a Zero Trust approach to file sharing

Managing access and mitigating overall identity risk

Data Protection for Safeguarding important information from theft or loss, protecting Sensitive Data and keep users productive.

▷ DLP for immediate visibility & data security
▷ Data Classification for enhancing data security by applying visual and metadata labels
▷ Secure Collaboration solution encrypts and controls access to sensitive files
▷ IAM for provisioning, continuous compliance, and actionable analytics for improved identity governance

Secure and Streamline File Transfers with MFT

MSP

## Multi-Platform and Environment Flexibility

GoAnywhere works where and how you need it: whether it's on-premises, cloud, hybrid or SaaS.

Encrypt Sensitive Files in Motion and at Rest

GoAnywhere lets you choose the secure protocols you and your trading partners need, including HTTPS, SFTP, and FTPS.

Automate and Streamline with Triggers and Scheduling

Utilize secure workflows to easily automate and streamline your entire file transfer process.
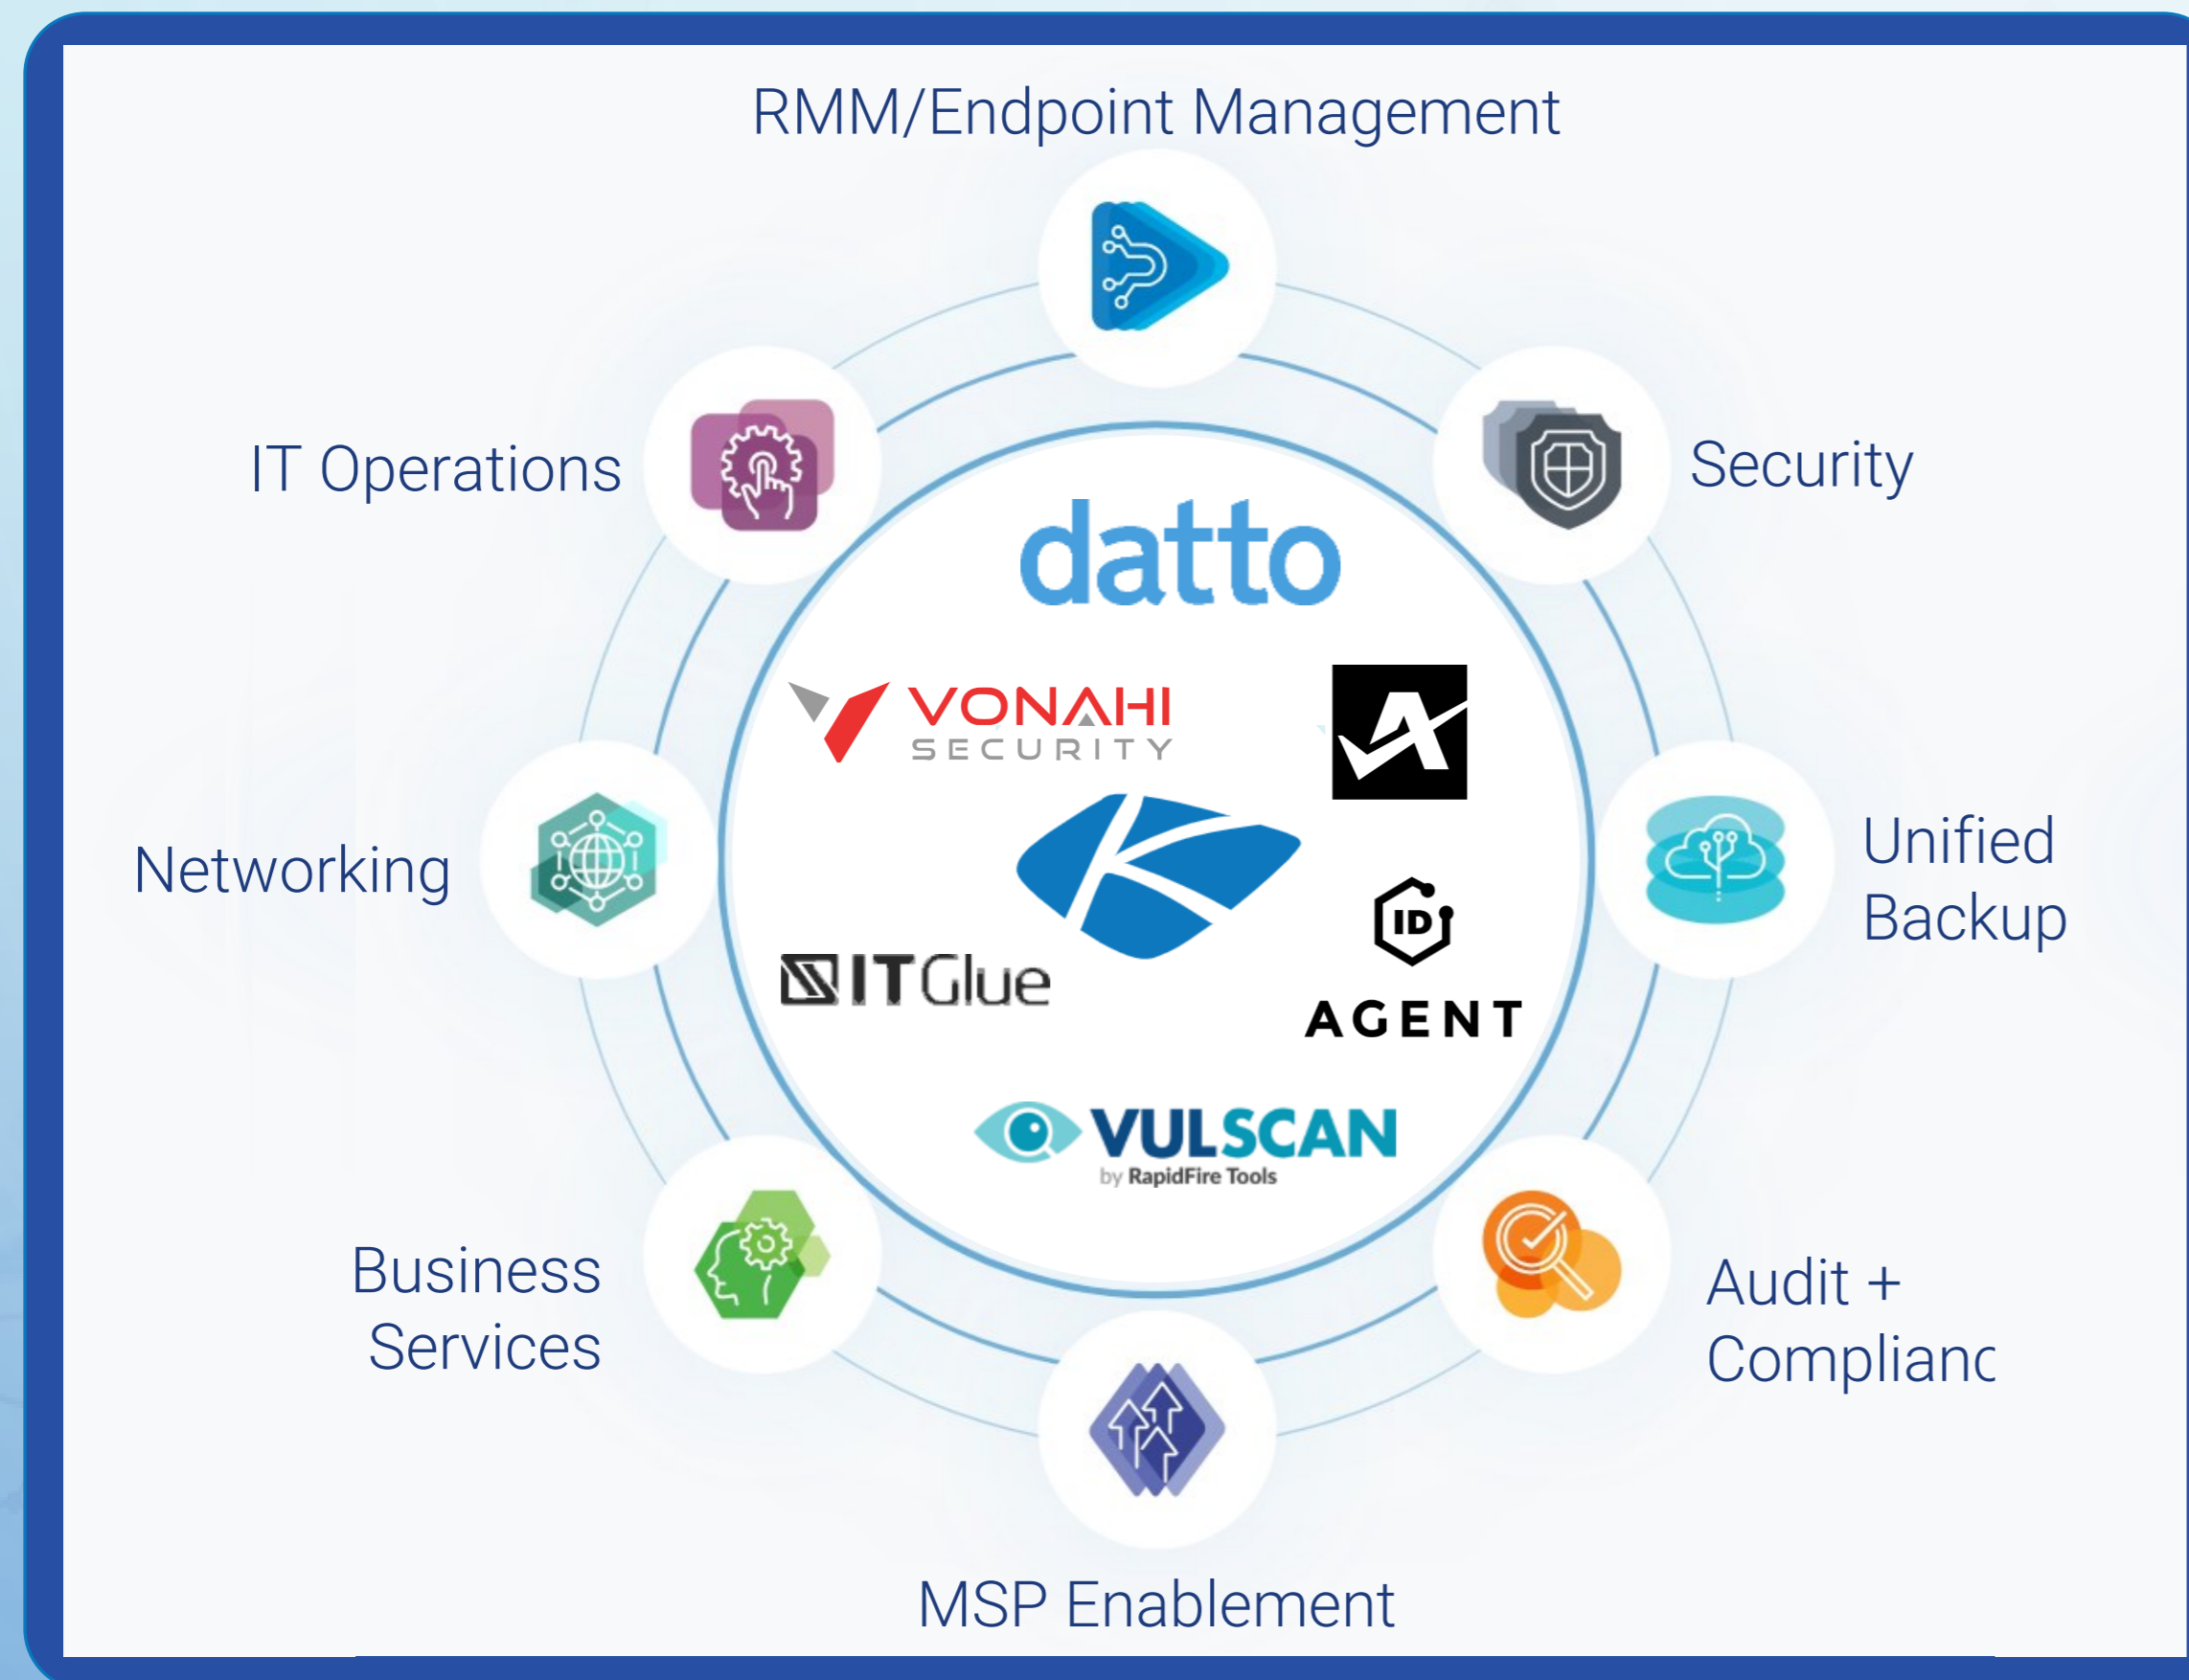

Meet Stringent Compliance Requirements

Strong encryption technology, authentication, and enterprise-level features help support HIPAA, PCI DSS, GDPR, and other compliance requirements your enterprise business faces.

Comprehensive, enterprise-level MFT designed to help you seamlessly and securely manage data transfers no matter where the data resides or where the instance is deployed.

▷ Move files with extensive security controls to meet compliance requirements
▷ Eliminate the need for custom programs/scripts, single-function tools, or manual processes
▷ Easily manage all file transfers through a modern, web-based interface
▷ Choose the best fit protocol for your transfer needs: SFTP, FTPS, AS2/3/4, HTTPS, and more

FORTRA

IT & Security Management

Kaseya's IT Complete Platform is built specifically to serve over-worked, under-resourced, under-funded and under-appreciated IT generalists.

▷ Remotely Monitor, Manage & Secure Every Endpoint in Your Network

▷ Protect Your Business Data, Digital Assets & Users From Cyberthreats

▷ Always Be in the Know of Your Network Health + Compliance

▷ Turnkey Sales & Marketing Enablement Systems for MSPs

Cyberthreat Protection for MSPs
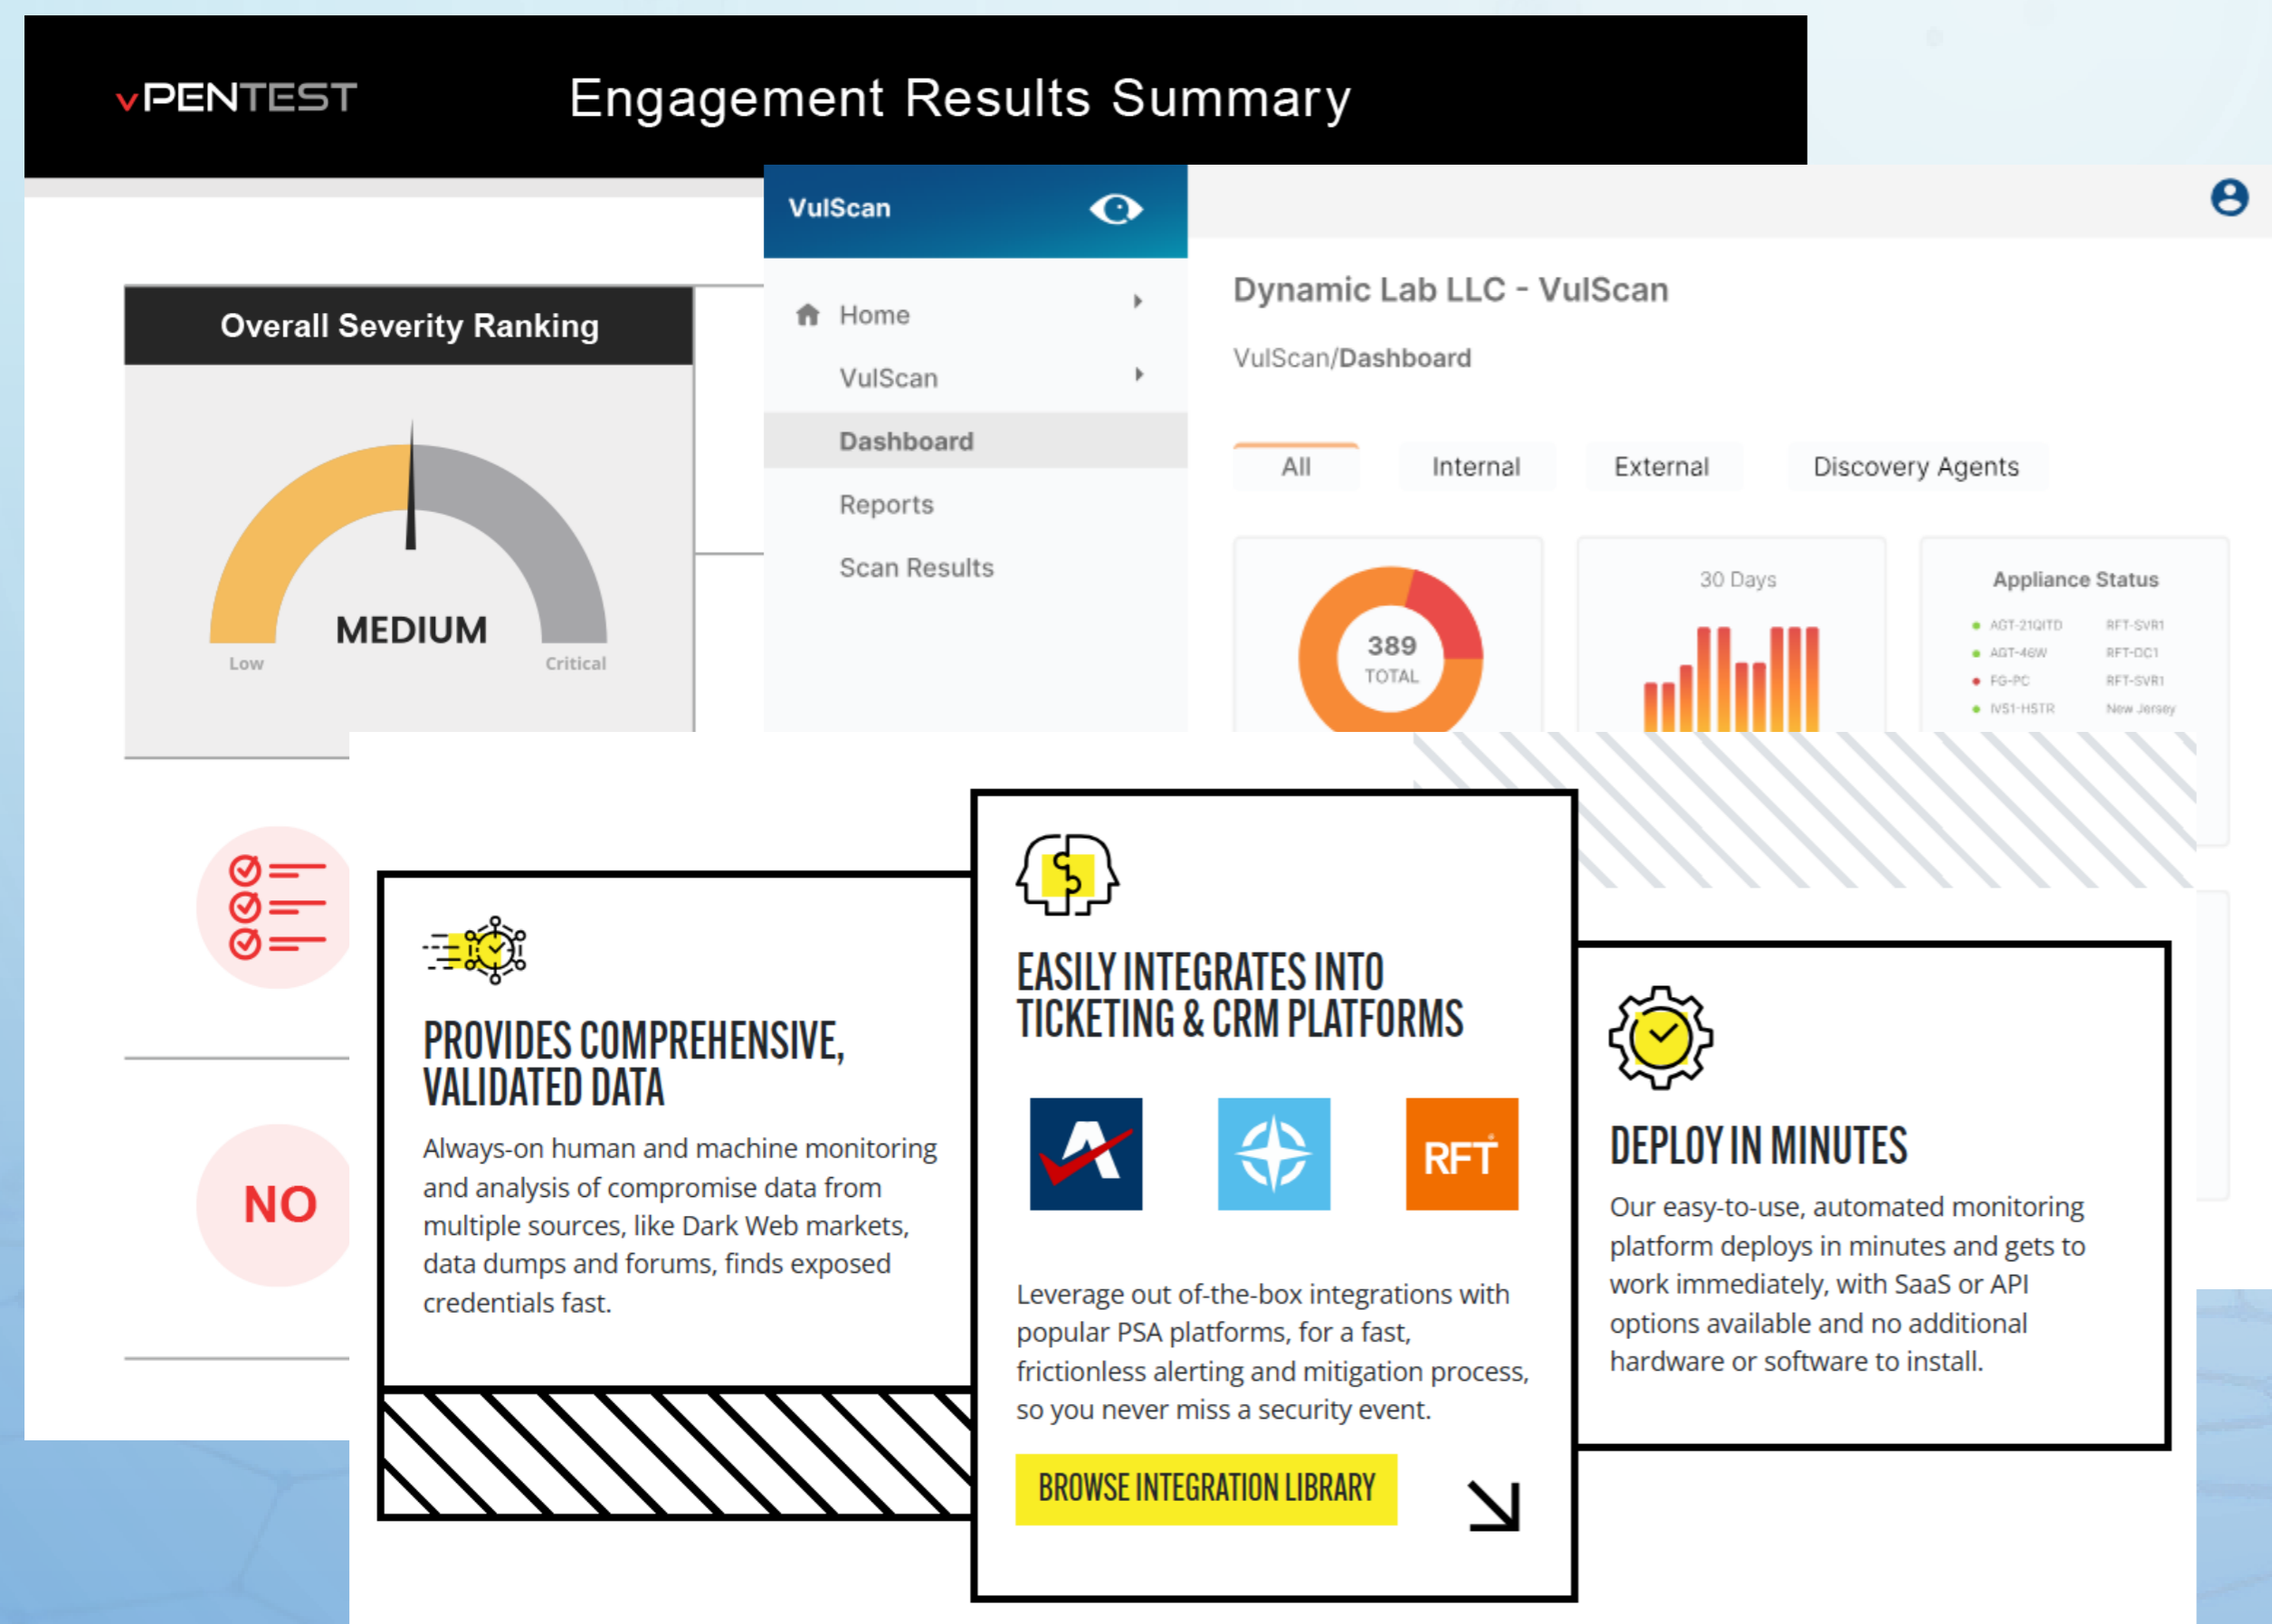

Kaseya's Security Suite provides threat protection, detection and response, consolidating your security services for greater efficiency, easy access, control and reliability.

▷ Vonahi vPenTest: Automated network penetration testing

▷ VulScan: Identify IT vulnerabilities in your network by automatically scanning and prioritizing remediations.

▷ Dark Web ID: Uncover compromised credentials from all corners of the dark web

Next-Gen Password Management Solution

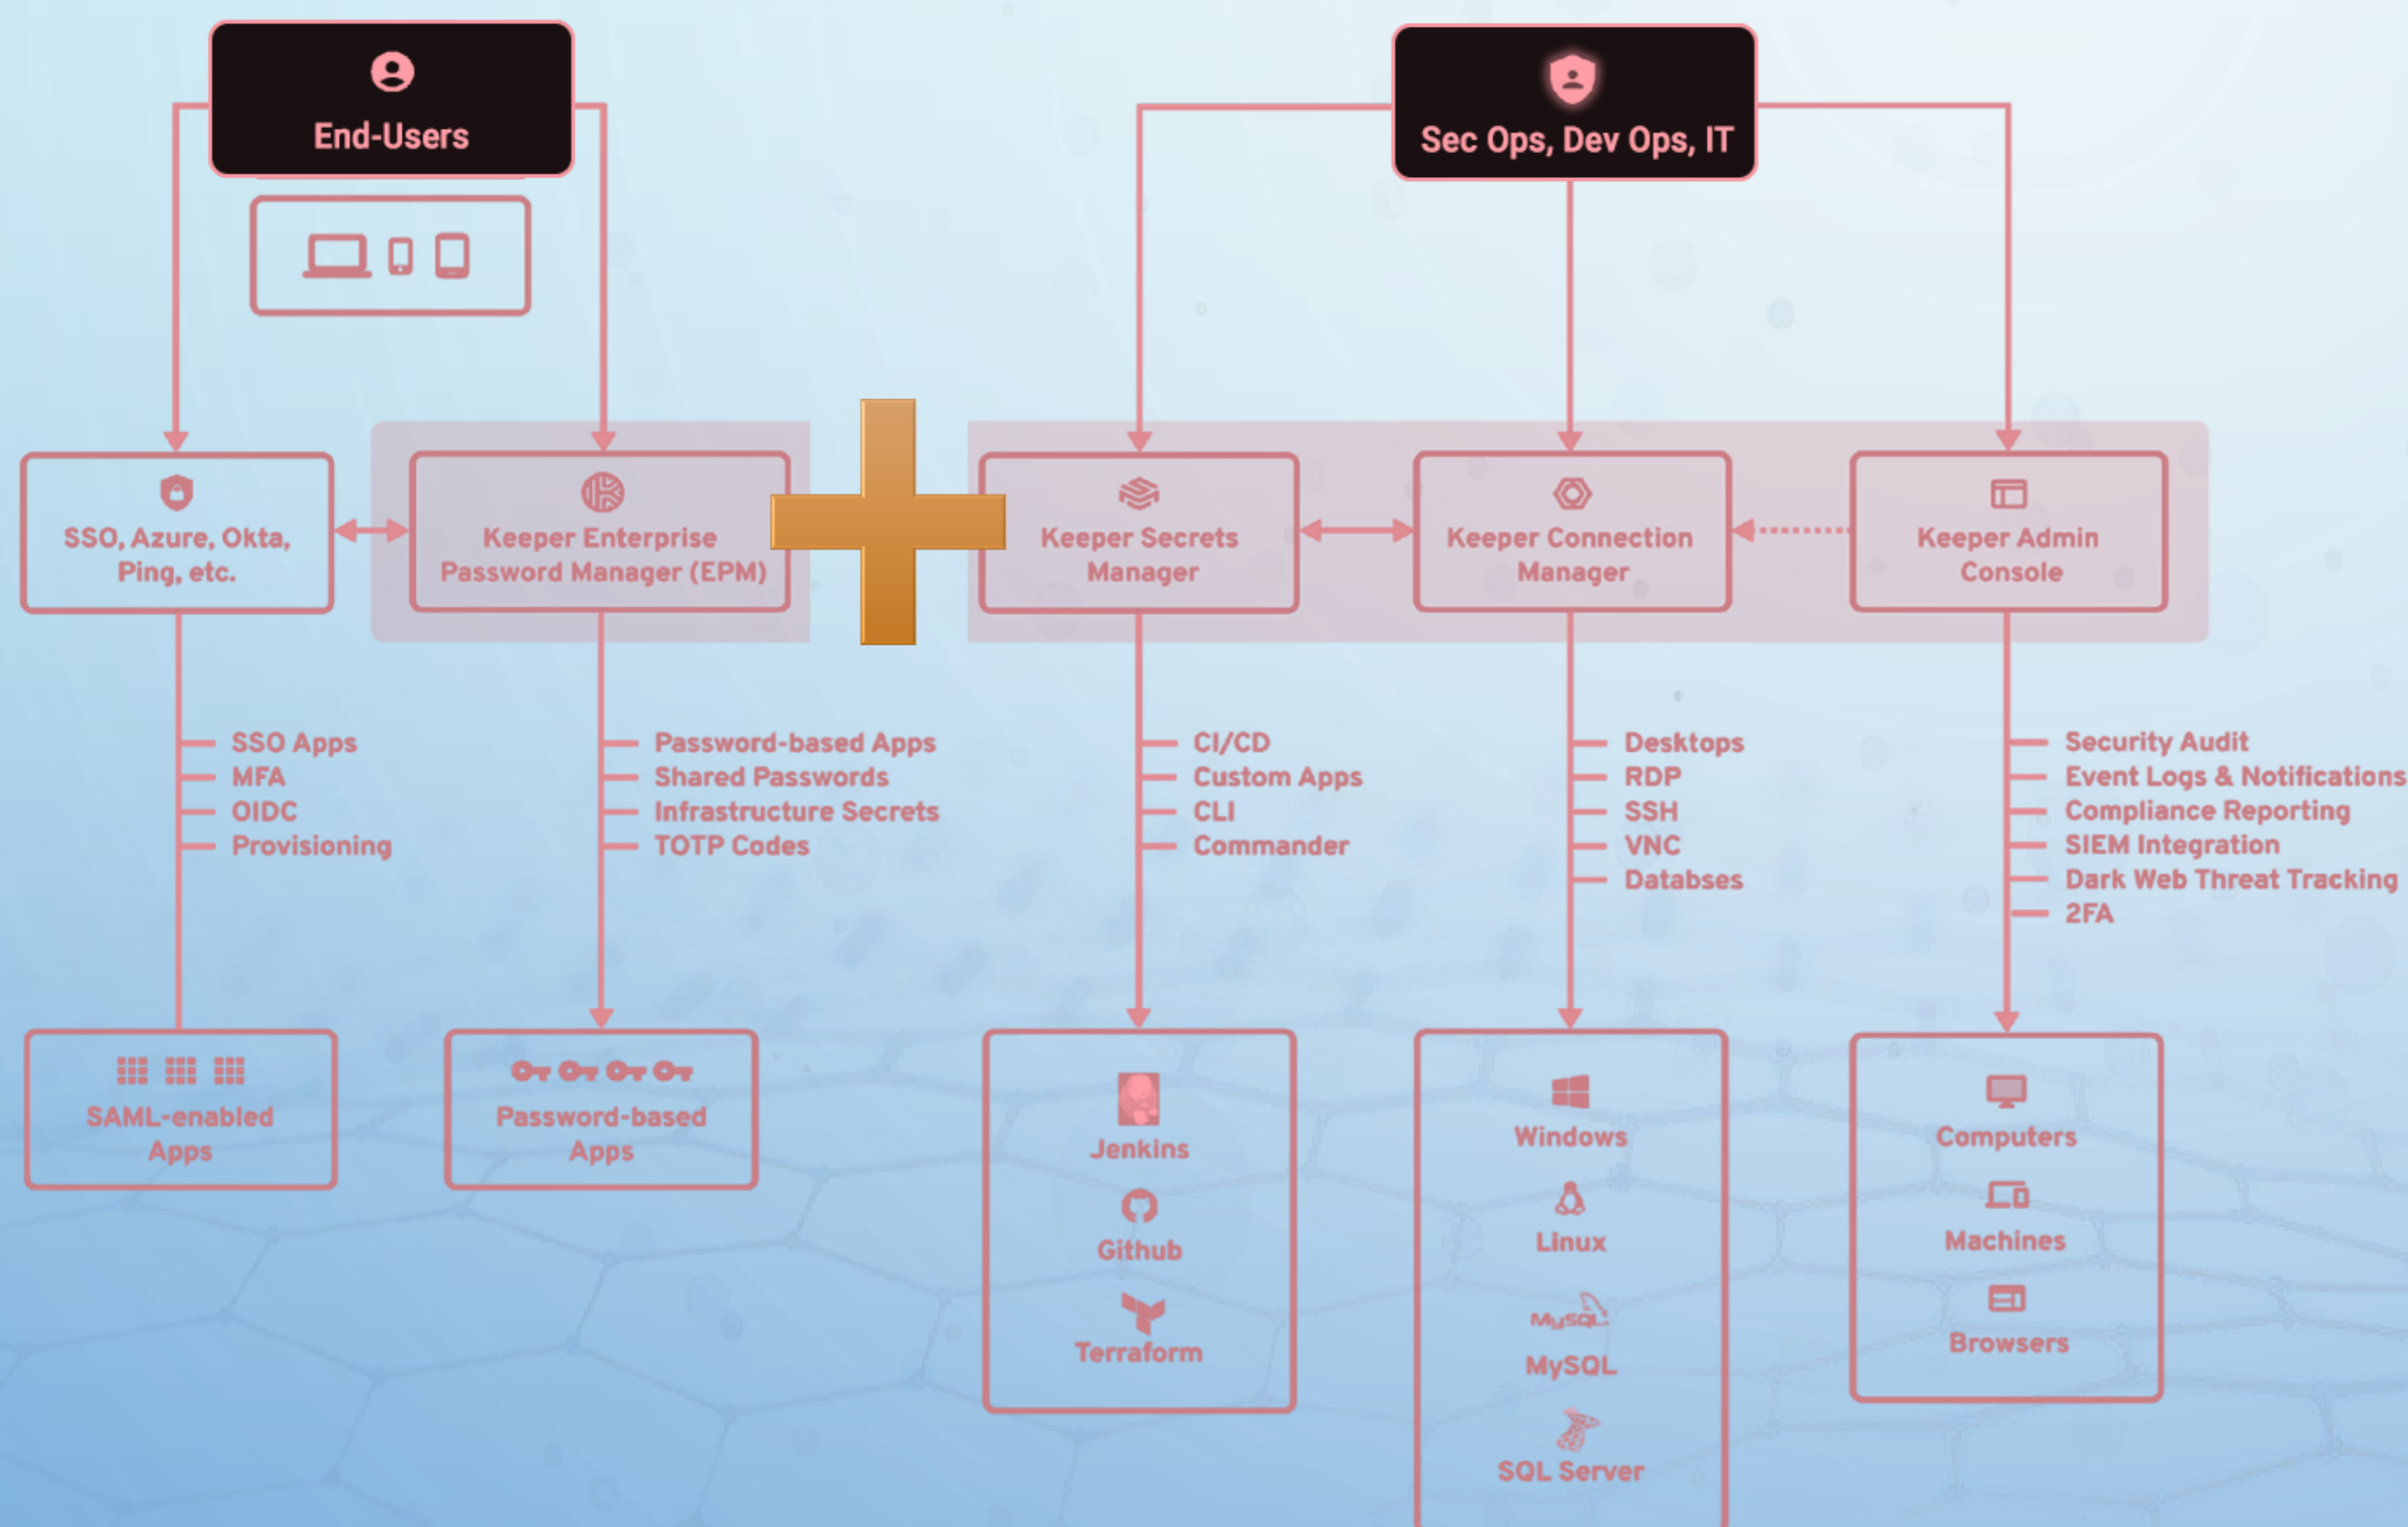

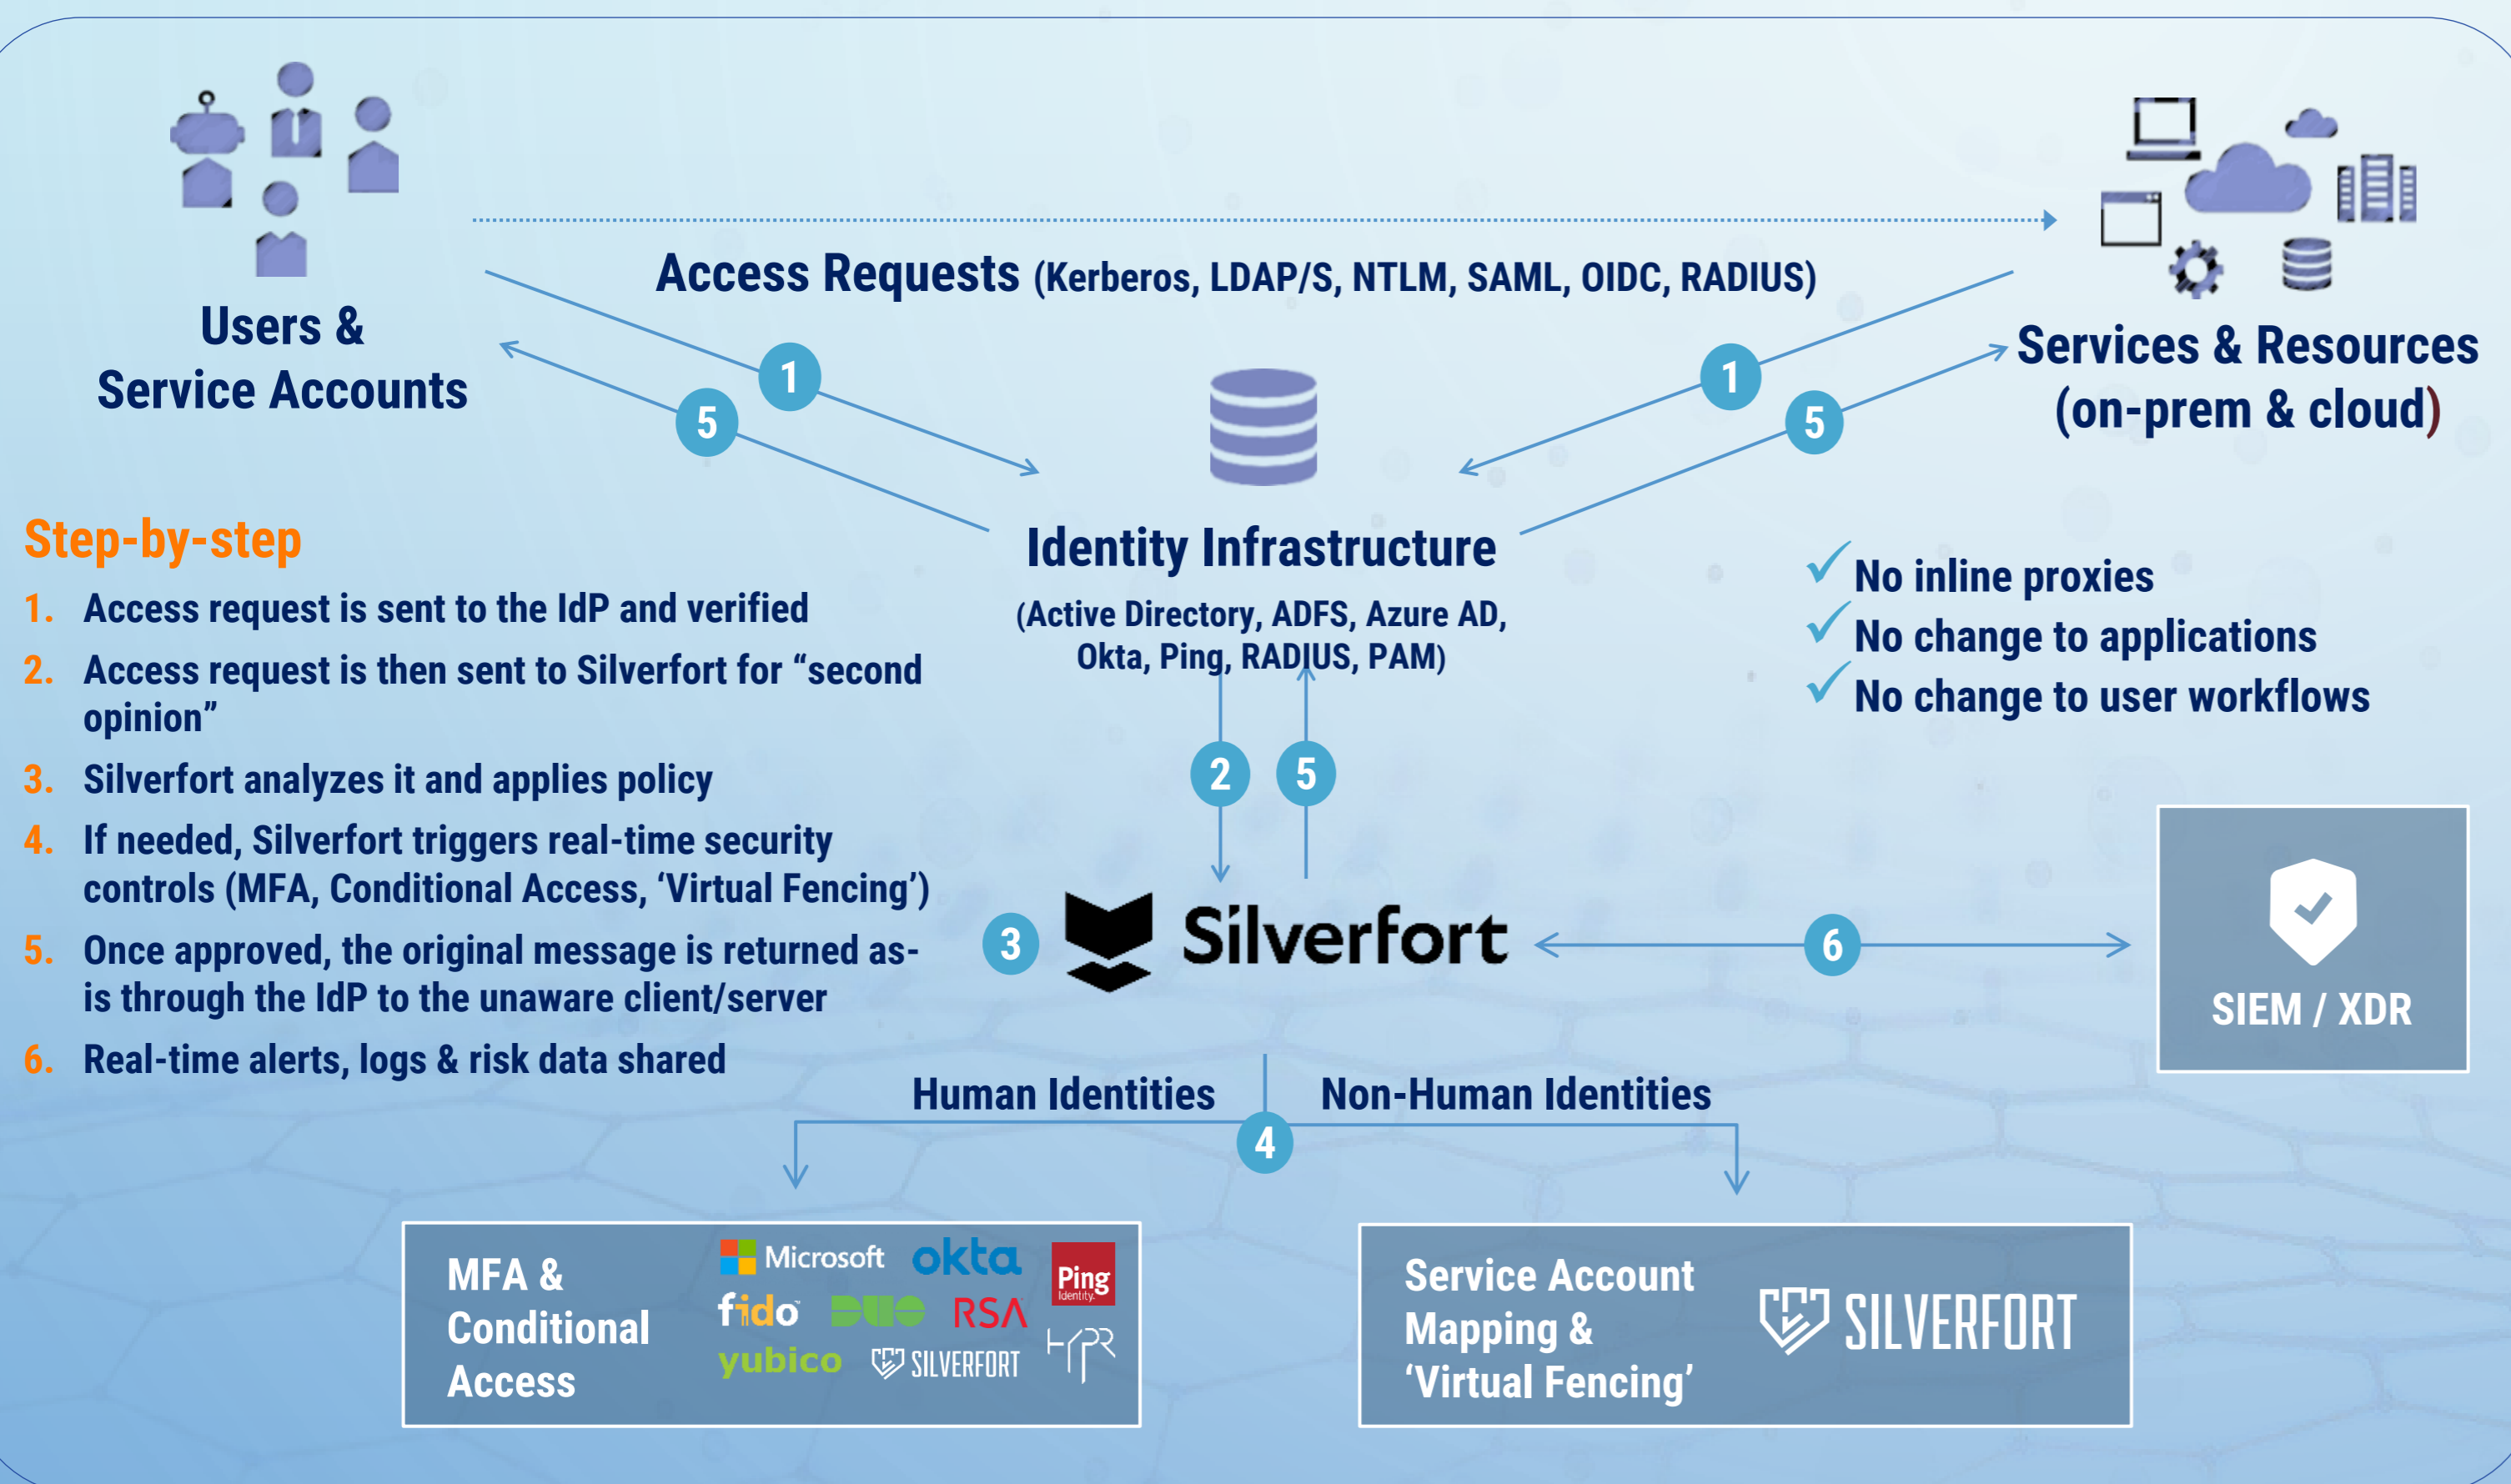

Next-Gen, Zero-Trust, Zero-Knowledge Privileged Access Management (PAM) Platform

▷ Cost Effective. Fewer products to purchase and easier for IT to manage

▷ Fast Provisioning. Seamlessly deploys and integrates with any tech

▷ Easy to Use. Unified admin console and modern UI for every employee on all device types

▷ Pervasive Visibility. Simplifies auditing and compliance

Identity Security Platform

Users & Service Accounts

Access Requests (Kerberos, LDAP/S, NTLM, SAML, OIDC, RADIUS)

Services & Resources (on-prem & cloud)

Identity Infrastructure

(Active Directory, ADFS, Azure AD, Okta, Ping, RADIUS, PAM)

✓ No inline proxies
✓ No change to applications
✓ No change to user workflows

Step-by-step

1. Access request is sent to the IdP and verified
2. Access request is then sent to Silverfort for "second opinion"
3. Silverfort analyzes it and applies policy
4. If needed, Silverfort triggers real-time security controls (MFA, Conditional Access, 'Virtual Fencing')
5. Once approved, the original message is returned as-is through the IdP to the unaware client/server
6. Real-time alerts, logs & risk data shared

SILVERFORT

A security layer on top of your existing IAM infrastructure

▷ Runtime Access Protection (RAP) technology integrates seamlessly with your IAM infrastructure to protect all identities, all environments, and all resources—all the time.

▷ Discover exposures and stop attacks before they cause damage. Enforce security controls across all IAM silos. All in a single platform.

▷ Secure every dimension of identity.

nss
Affordable Cutting Edge

Silverfort

Application Security Testing
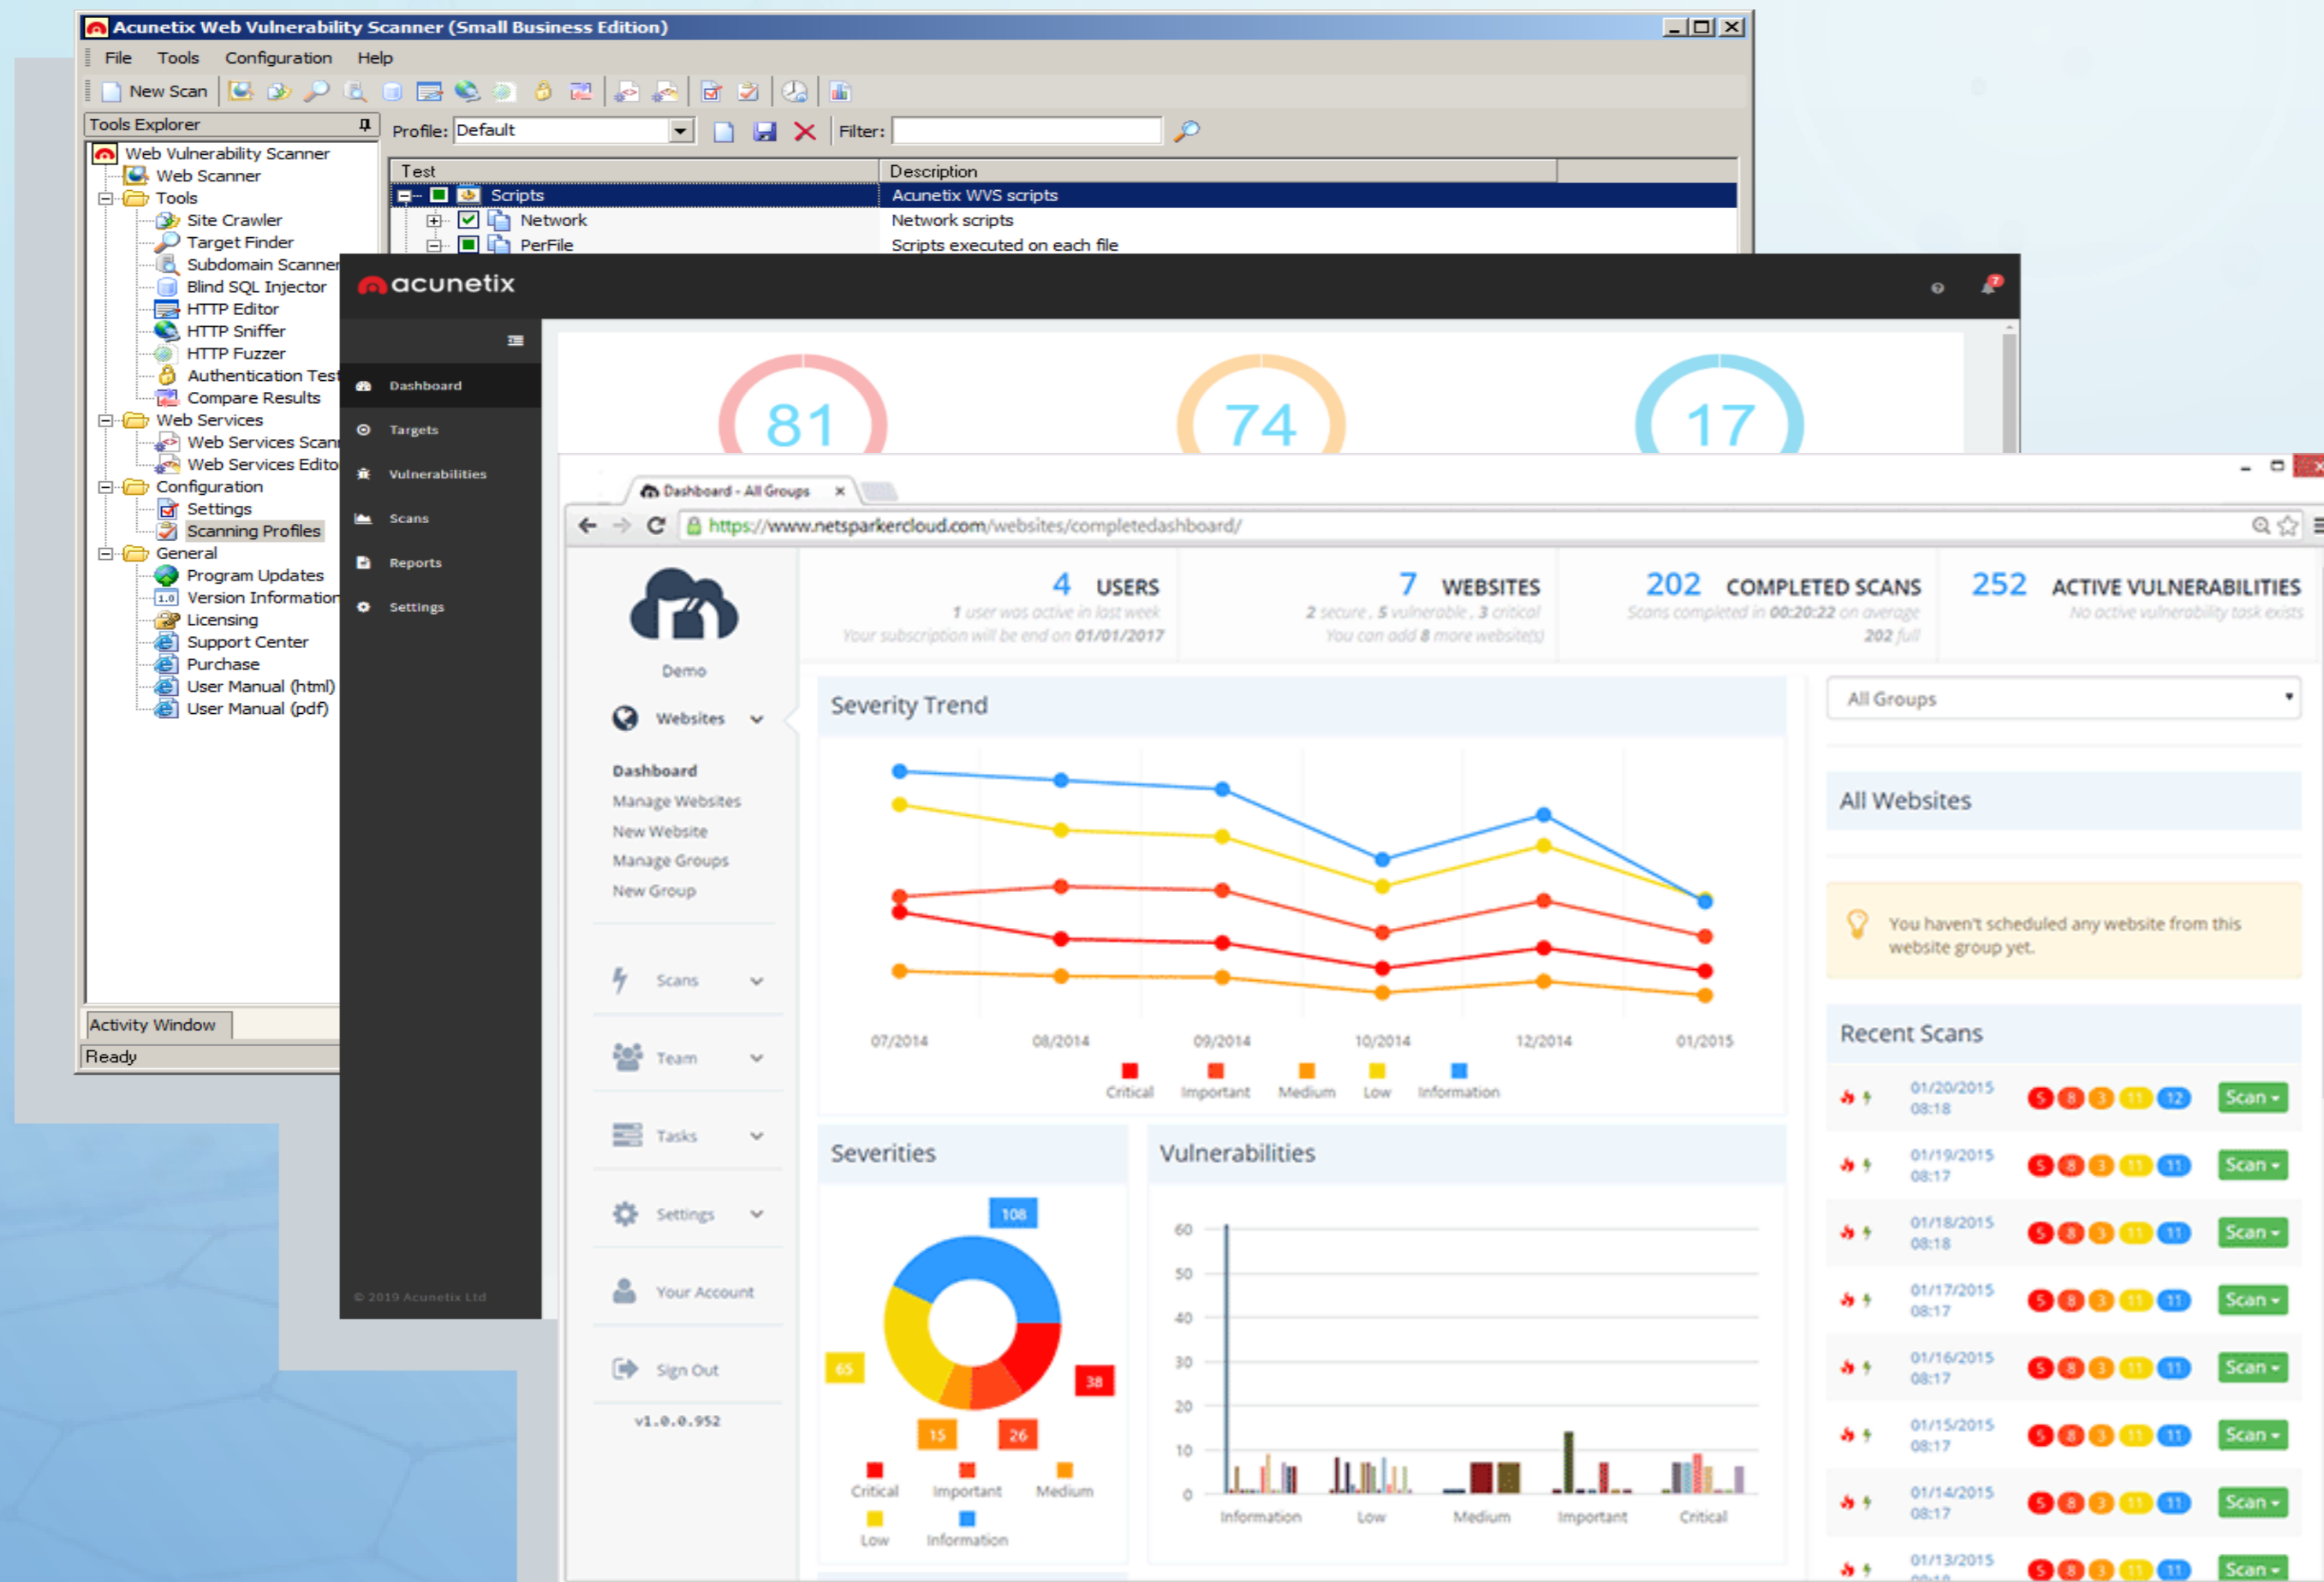

Leader in Application Security Testing. Invicti tools should be treated as part of the development and operational processes being an initial Penetration Testing tool

▷ Comprehensive multi-team solutions built to scale

▷ Built for efficiency & ease of use

▷ Ideal for complex and decentralized IT infrastructures

▷ Enable API based flexible integrations

▷ Available locally and in the cloud

Link Load Balancing, WiFi & SDWAN

Internet redundancy, WAN Link Load Balancing, Failover, High Availability, Wireless and Business Continuity solutions

▷ Load-Balancing or Speedfusion Bonding of multiple connections

▷ Easy Management without Deep Knowledge of Networking

▷ Enterprise Mobility solutions for every use

▷ Authorized Starlink Technology Provider

Backup & Recovery

WALLIX
CYBERSECURITY SIMPLIFIED

Tiered Backup Storage

The Future of Backup Storage:
Tiered Backup Storage

System scales to a 2PB full backup -
Largest in the industry

Over 400TB/hr. ingest rate at 2PB full backup –
Fastest in the industry

Restores as fast as disk,
20X faster than dedupe appliances

Backup window that is **fixed length as data grows**

Disk-cache Landing Zone (performance tier) for the fastest backups and restores

Long-term Retention Repository (retention tier) for low-cost long-term deduplicated retention

Backups as fast as disk,
3X faster than dedupe appliances

25+ supported backup applications & utilities

Scale-out of all resources as data grows

Adaptive Deduplication **for strong offsite DR RTO & RPO**

Most complete & lowest cost Ransomware recovery

Lowest cost up front and over time

Easy to use, manage, and scale

Easy remote installation – no onsite visit required

Shorter backup times that can sustain even if data grows over time ensuring efficient long-term retention

▷ Various-sized backup storage appliances that can be mixed and matched in a scale-out dedicated storage for backup systems

▷ Zone-level deduplication, for the fastest backup & restore performance at the lowest price

▷ Ransomware protection in the Retention Tier as that tier is not accessible to intruders

▷ Supporting a wide variety of backup applications, utilities, and dumps as Veeam, Veritas, Oracle etc.
