

Affordable Cutting Edge

Revolutionizing Value Added Distribution

Affordable Cutting Edge

Our Concept

Our History

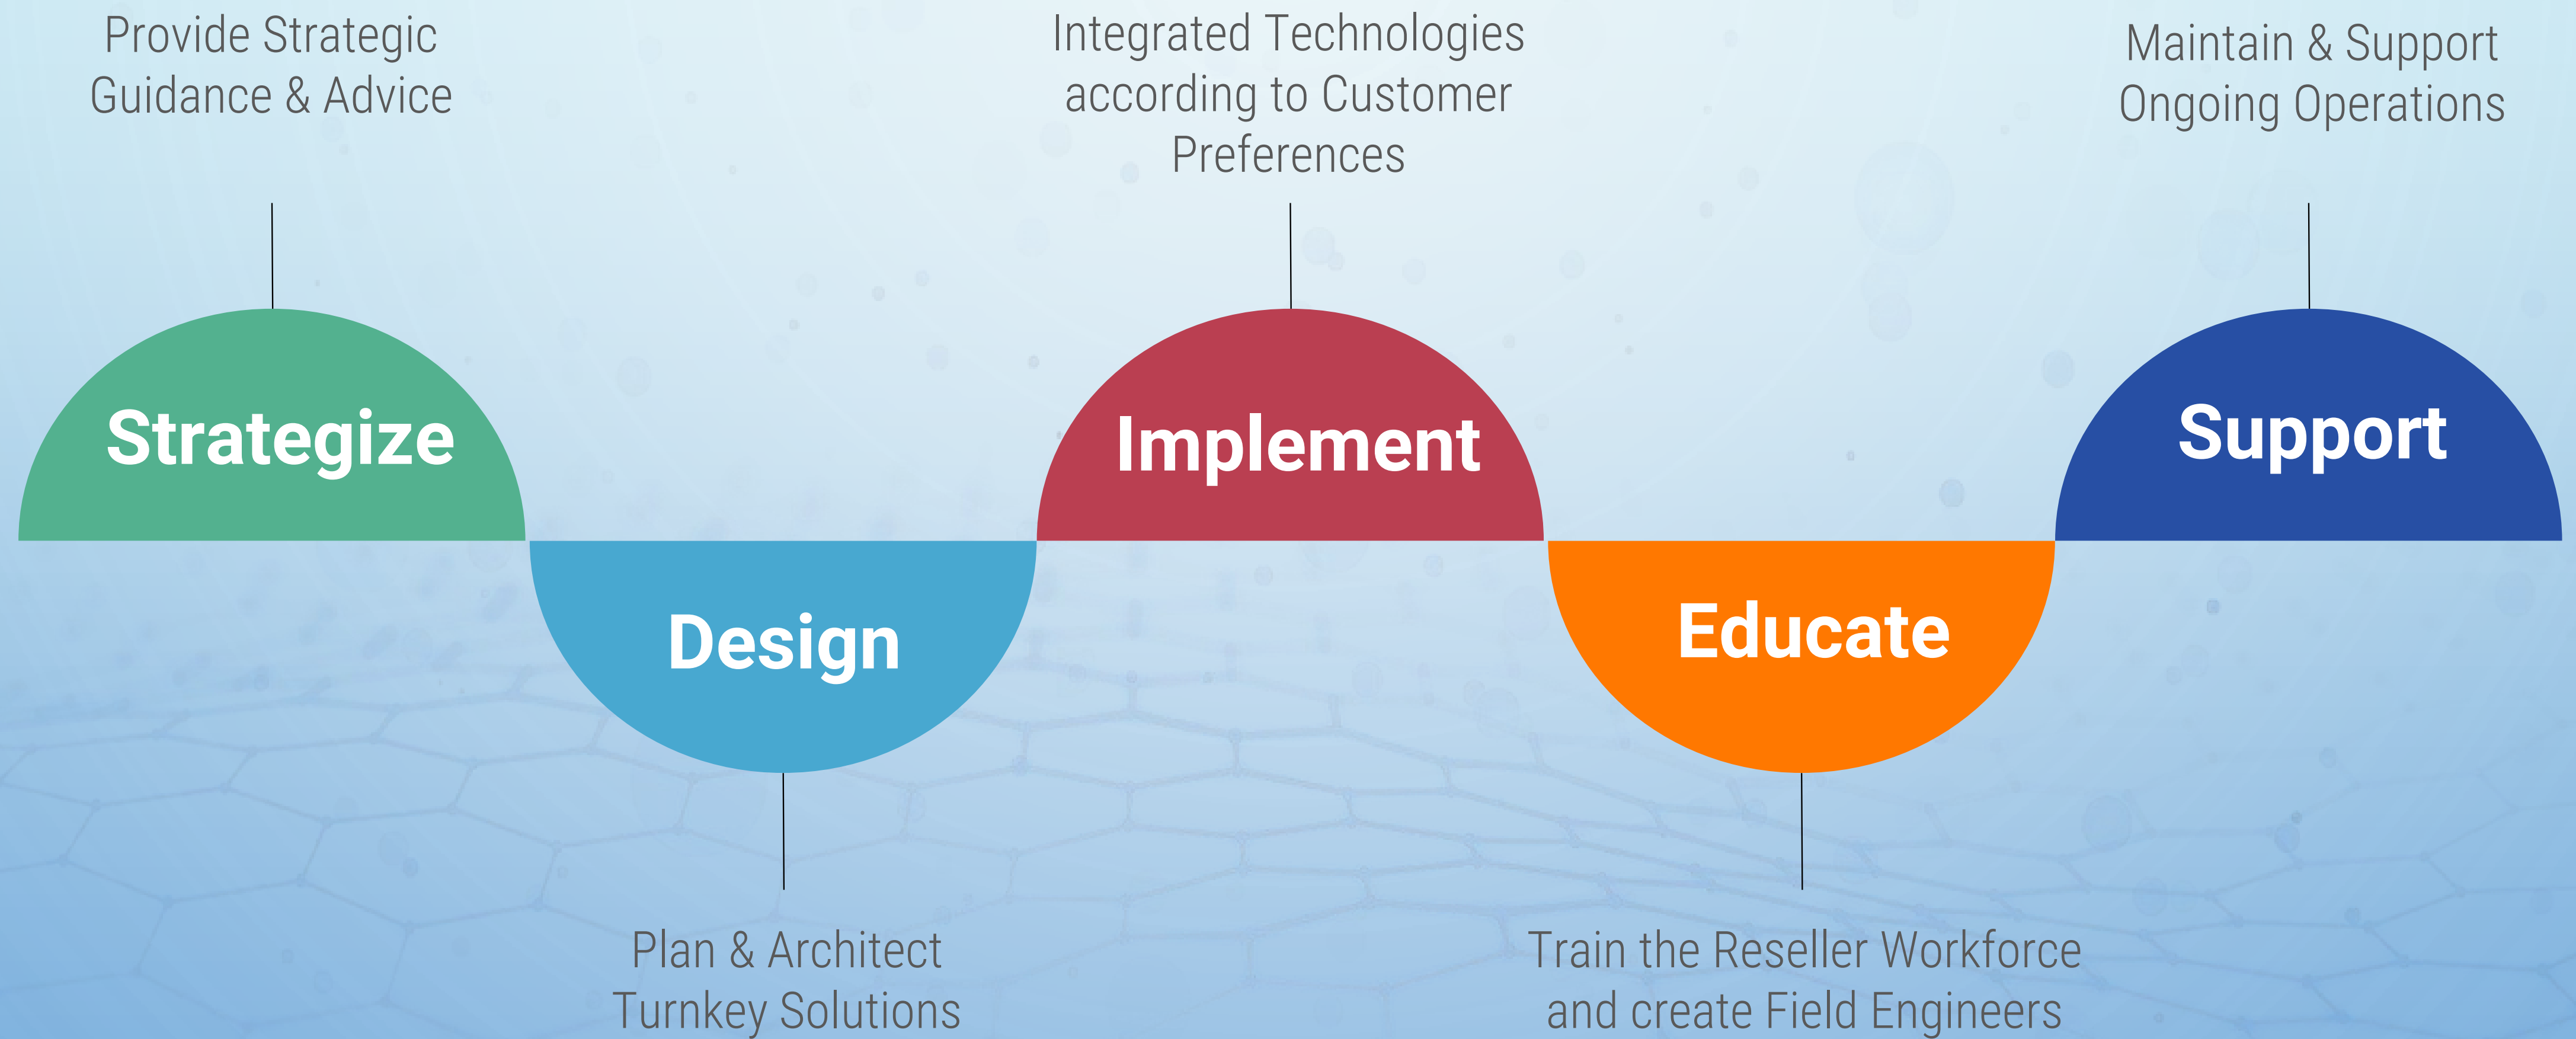

NSS is a true Value-Added Distributor investing in KNOWLEDGE whereas stocking distributors invest in Inventory

We are an active TRAINING & SUPPORT Center officially for all our Vendors

Serve with HEART, no matter WHAT !

Our Added Value

Quality Management

NSS Data Assurance Policy

NSS places a high level of importance in protecting the data of the company and its customers as well as ensuring the quality of service it provides, according to the standards of ISO 27001:2022 and ISO 9001:2015 respectively.

NSS Quality Objectives

- ▷ Absolute specialization in the fields of its business activity.
- ▷ Continuous qualitative and quantitative improvement of the quality of products and services.
- ▷ Modern and responsible treatment of all customers needs.

AI-Native Cybersecurity Defense System

SOPHOS
FUSION
AI-Native Cybersecurity Defense System

Sophos Fusion brings security technologies, data, AI, and human expertise together in one coordinated defense system.

- ▷ Detect multi-stage attacks across the entire environment
- ▷ Coordinate response across Sophos and third-party technologies
- ▷ Reduce complexity, alert noise, and operational workload
- ▷ Use agentic AI with expert human oversight
- ▷ Strengthen protection as more solutions and intelligence are connected

Protecting the new attack surface

Sophos AI Defense

VISIBILITY

See every AI tool across the environment

Shadow AI discovery
AI usage dashboard
Endpoint + Network + Browser
multi-layer detection

CONTROL

Enforce AI policy without slowing innovation

Granular access management
Global policy enforcement
Role-based controls
Prompt monitoring

PROTECTION

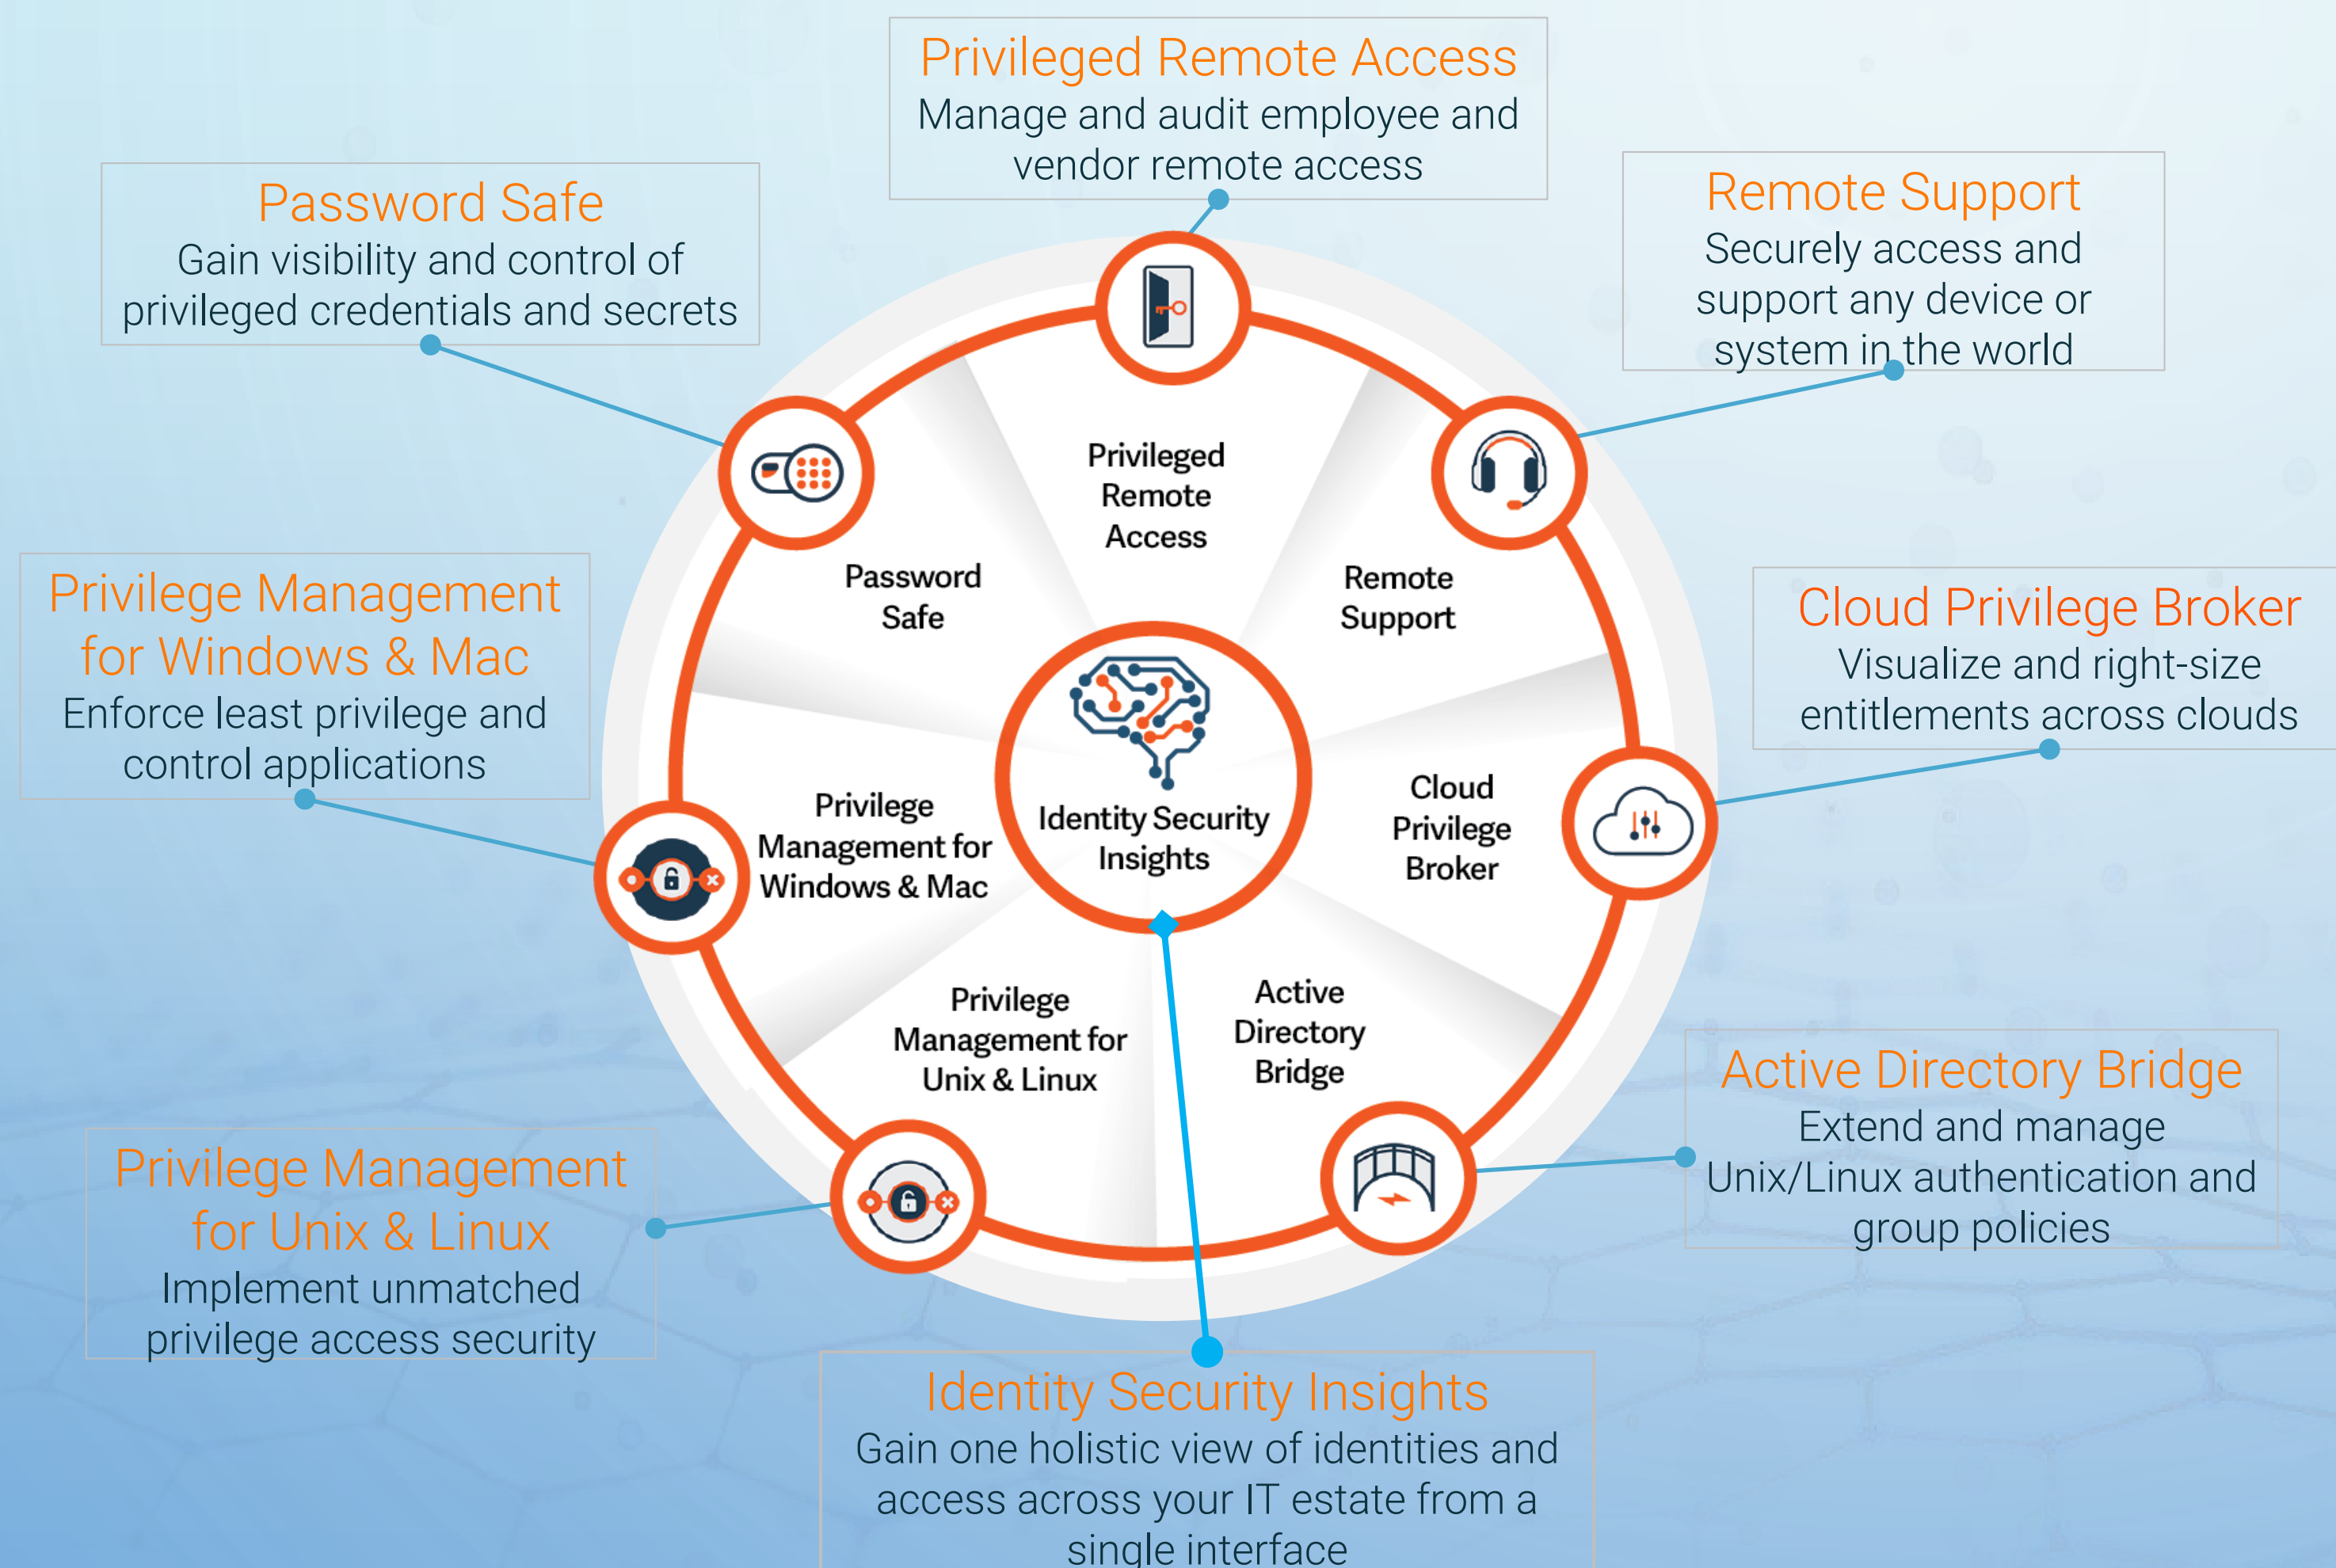

Defend data and block high-risk AI behavior

Input sanitization
Output interception
DLP for AI prompts
MDR-managed AI risk 24/7

Sophos AI Defense helps organizations discover, govern, and protect AI usage across their environment, combining visibility, policy control, and protection within the same connected defense system.

- ▷ Discover Shadow AI
- ▷ Control AI access and usage
- ▷ Protect sensitive data
- ▷ Connect AI risk with the wider security environment
- ▷ Extend protection with Sophos MDR

Privileged Account Security

BeyondTrust helps organizations control privileged access, reduce identity risk and secure every user, asset and session across the enterprise.

- ▷ Secure privileged users, accounts and sessions
- ▷ Enforce least privilege across major operating systems
- ▷ Manage and audit third-party remote access
- ▷ Protect credentials, secrets and service accounts
- ▷ Improve visibility, compliance and access control

Data Protection

From discovery, to monitoring, to blocking

AI engine recommendations reduce business friction

Taking a Zero Trust approach to file sharing

Managing access and mitigating overall identity risk

Fortra helps organizations protect sensitive data wherever it lives, moves or is shared, without slowing down business productivity.

- ▷ Discover, classify and protect sensitive data
- ▷ Apply labels, policies and access controls
- ▷ Secure collaboration and file sharing
- ▷ Monitor, block and reduce data exposure
- ▷ Support compliance and Zero Trust data security

Red Team
Premium
Software

Fortra enables proactive security by helping organizations find, test and validate weaknesses before attackers exploit them, with tools for vulnerability assessment, penetration testing, adversary simulation and red teaming.

- ▷ Vulnerability assessment and risk prioritization
- ▷ Penetration testing and attack path validation
- ▷ Red team and adversary simulation capabilities
- ▷ Advanced offensive security tooling
- ▷ Strong foundation for proactive risk reduction

Security Awareness Training

Terranova Security helps organizations turn employees into a stronger line of defense through awareness training and phishing simulation.

- ▷ Engaging security awareness training
- ▷ Realistic phishing simulations
- ▷ Behavior change analytics and reporting
- ▷ Gamified learning for better retention
- ▷ Continuous education for lower human risk

Secure and Streamline File Transfers with MFT

Multi-Platform and Environment Flexibility

GoAnywhere works where and how you need it: whether it's on-premises, cloud, hybrid or SaaS.

Encrypt Sensitive Files in Motion and at Rest

GoAnywhere lets you choose the secure protocols you and your trading partners need, including HTTPS, SFTP, and FTPS.

Automate and Streamline with Triggers and Scheduling

Utilize secure workflows to easily automate and streamline your entire file transfer process.

Meet Stringent Compliance Requirements

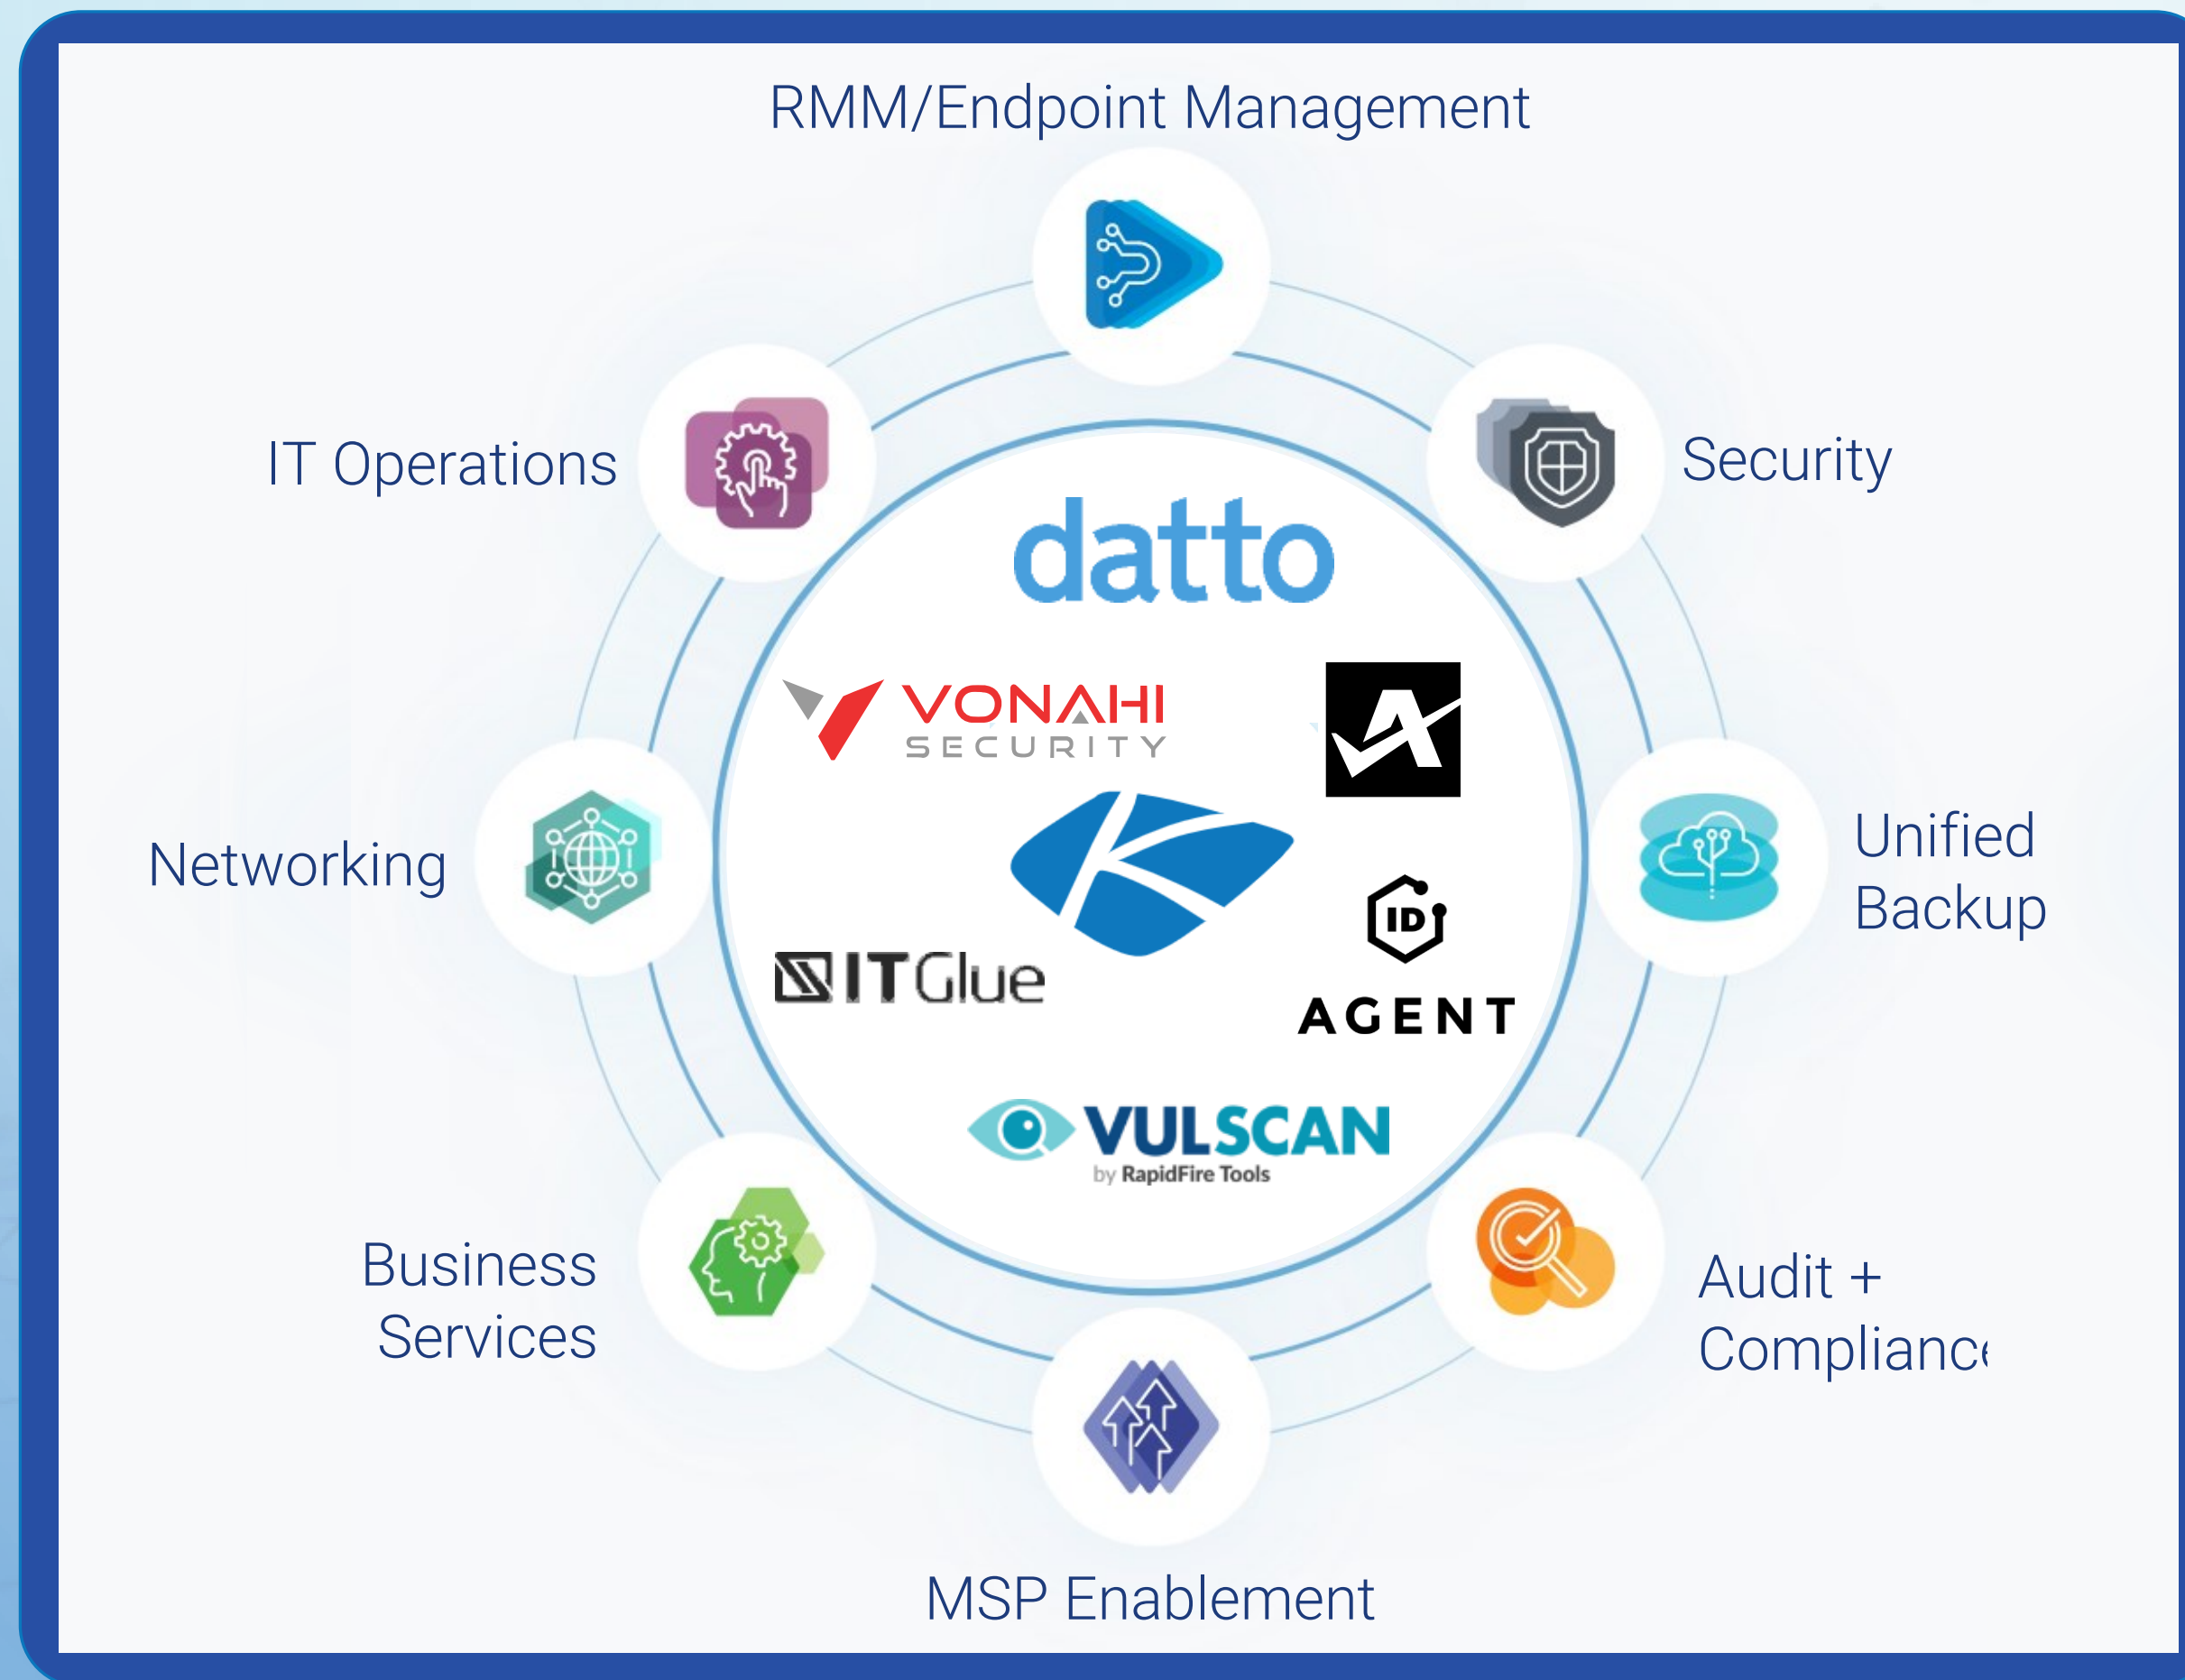

Strong encryption technology, authentication, and enterprise-level features help support HIPAA, PCI DSS, GDPR, and other compliance requirements your enterprise business faces.

Fortra MFT solutions secure, automate and control business-critical file transfers across hybrid and complex environments.

- ▷ Secure file movement with encryption and access control
- ▷ Automate manual transfer processes
- ▷ Support SFTP, FTPS, HTTPS, AS2 and more
- ▷ Centralize monitoring and management
- ▷ Meet compliance needs for sensitive data exchange

IT & Security Management

MSP
OFFENSIVE

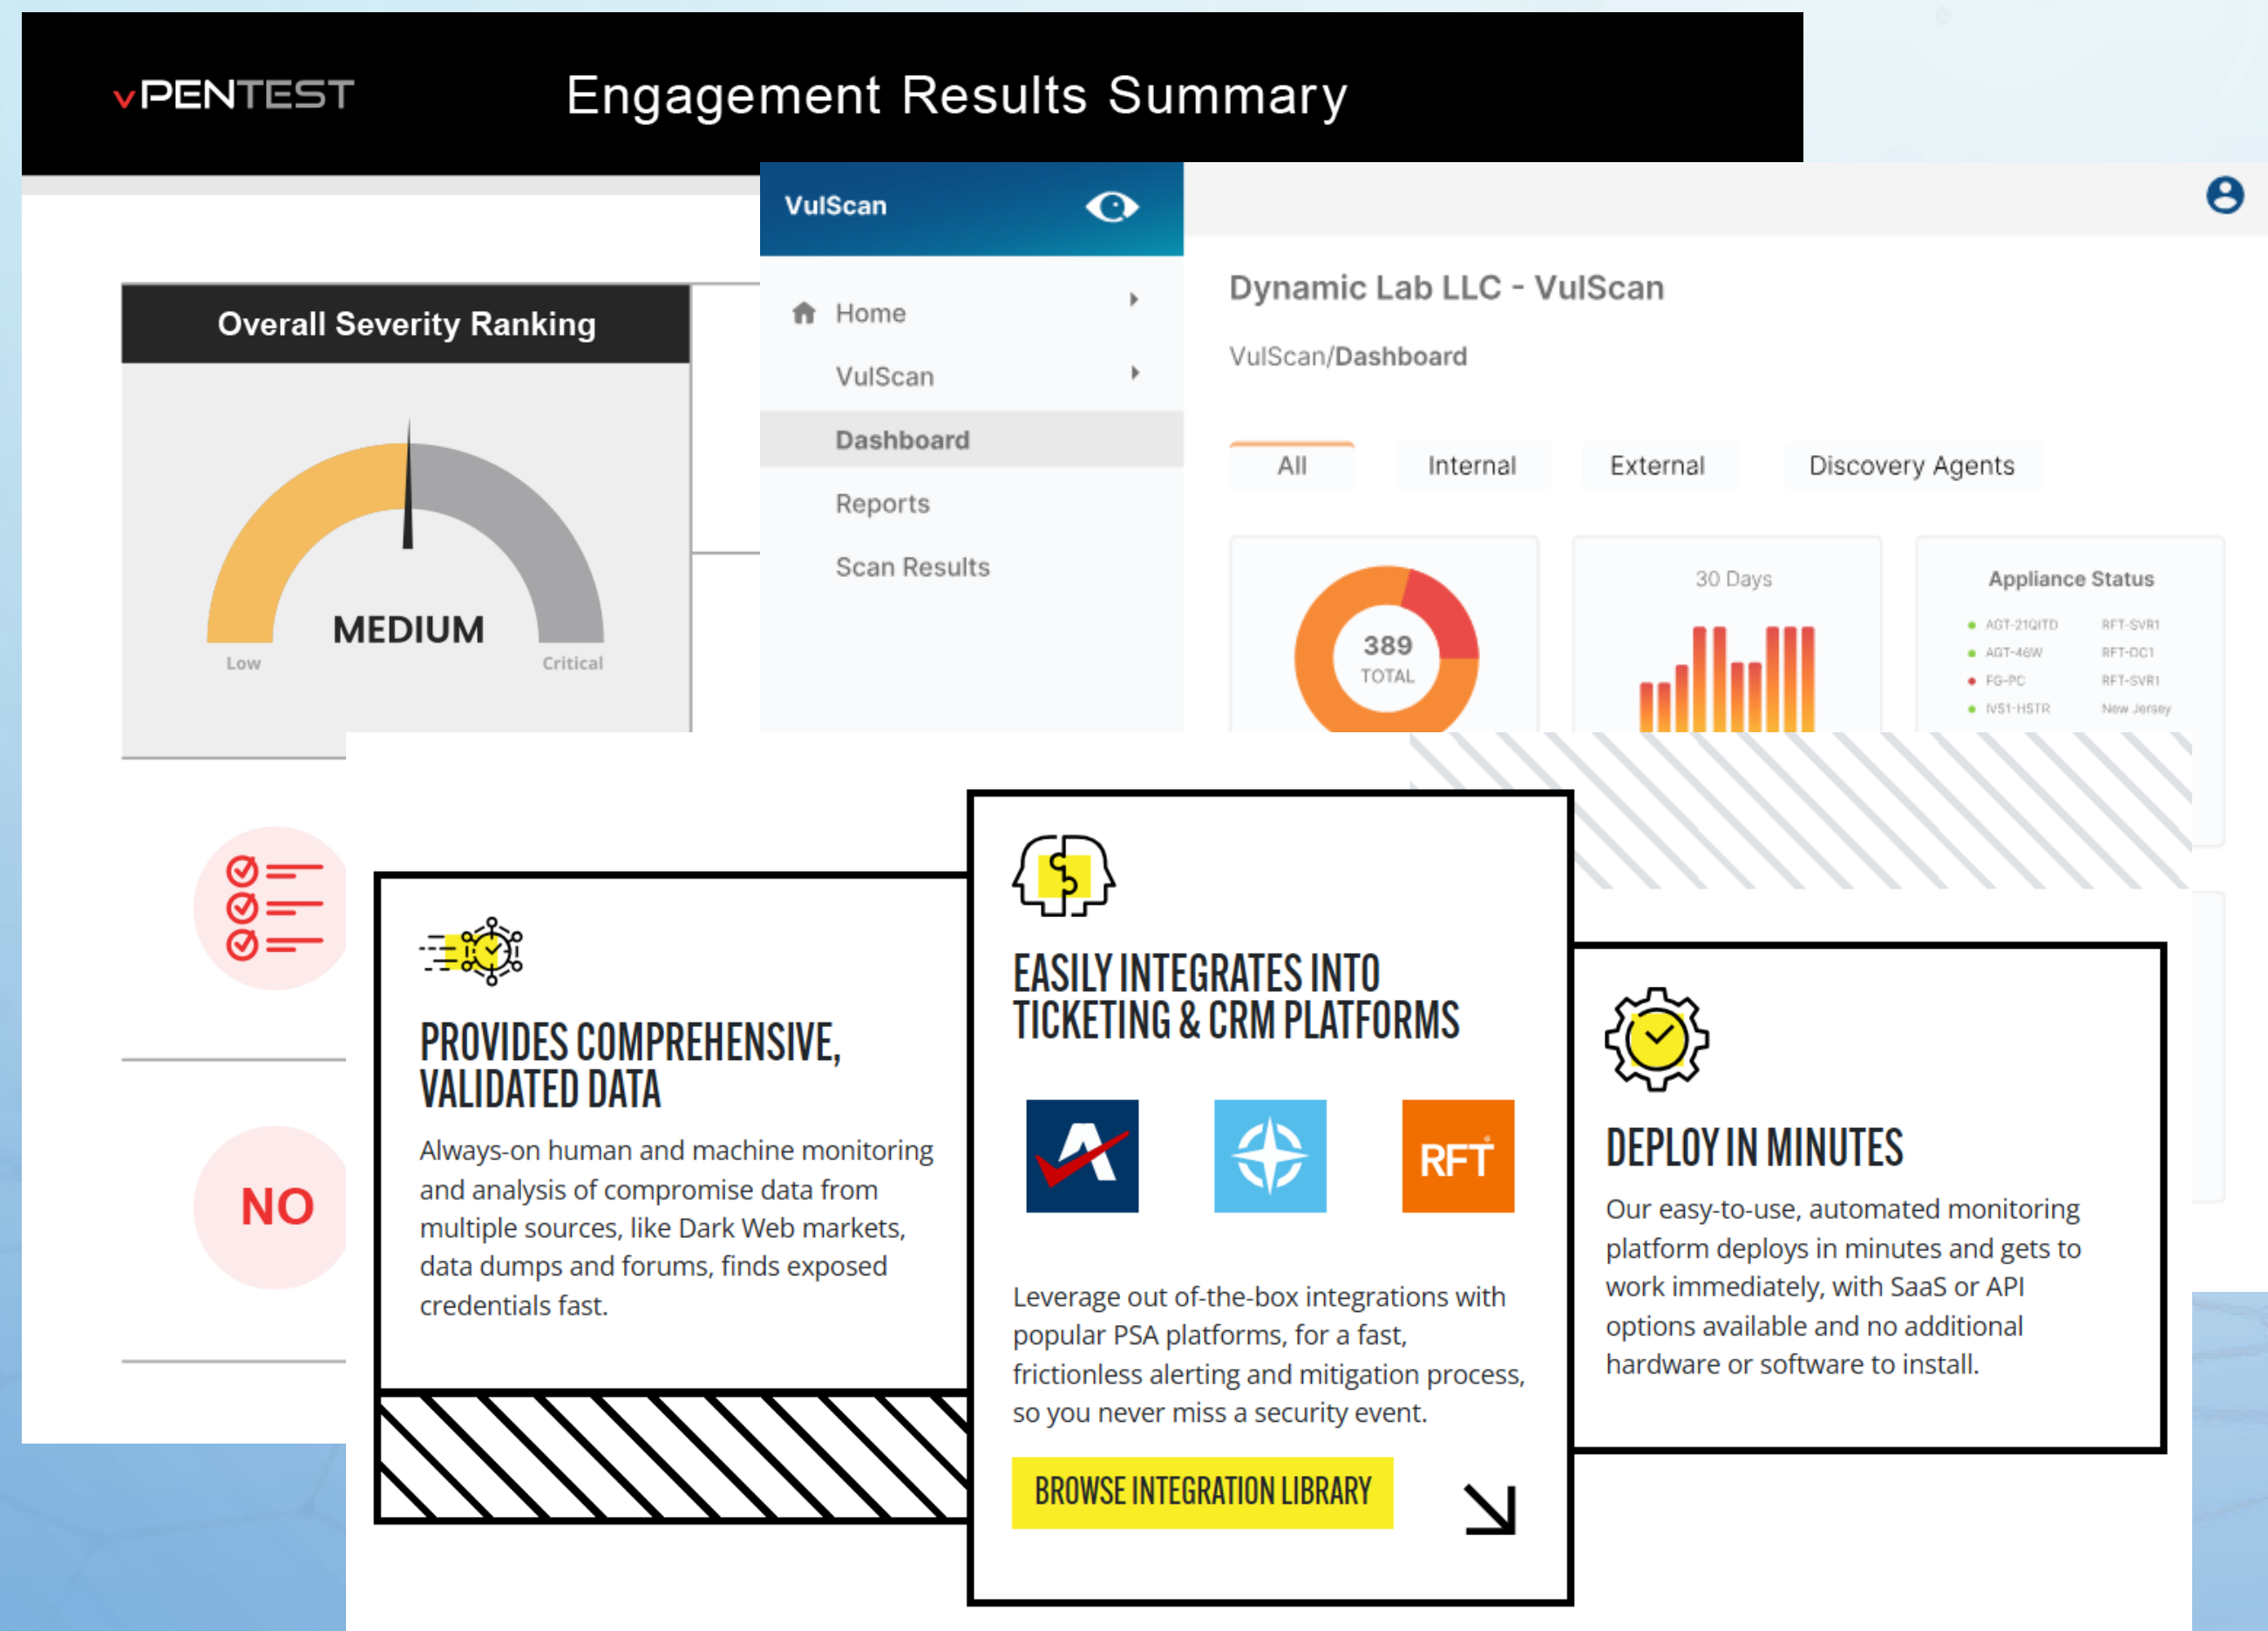

Kaseya helps MSPs and IT teams manage, secure and automate customer environments from one integrated platform.

- ▷ Remote monitoring and endpoint management
- ▷ Security, backup, compliance and IT operations
- ▷ Automation for daily service delivery
- ▷ Better visibility across customer environments
- ▷ Strong foundation for profitable MSP services

Cyberthreat Protection for MSPs

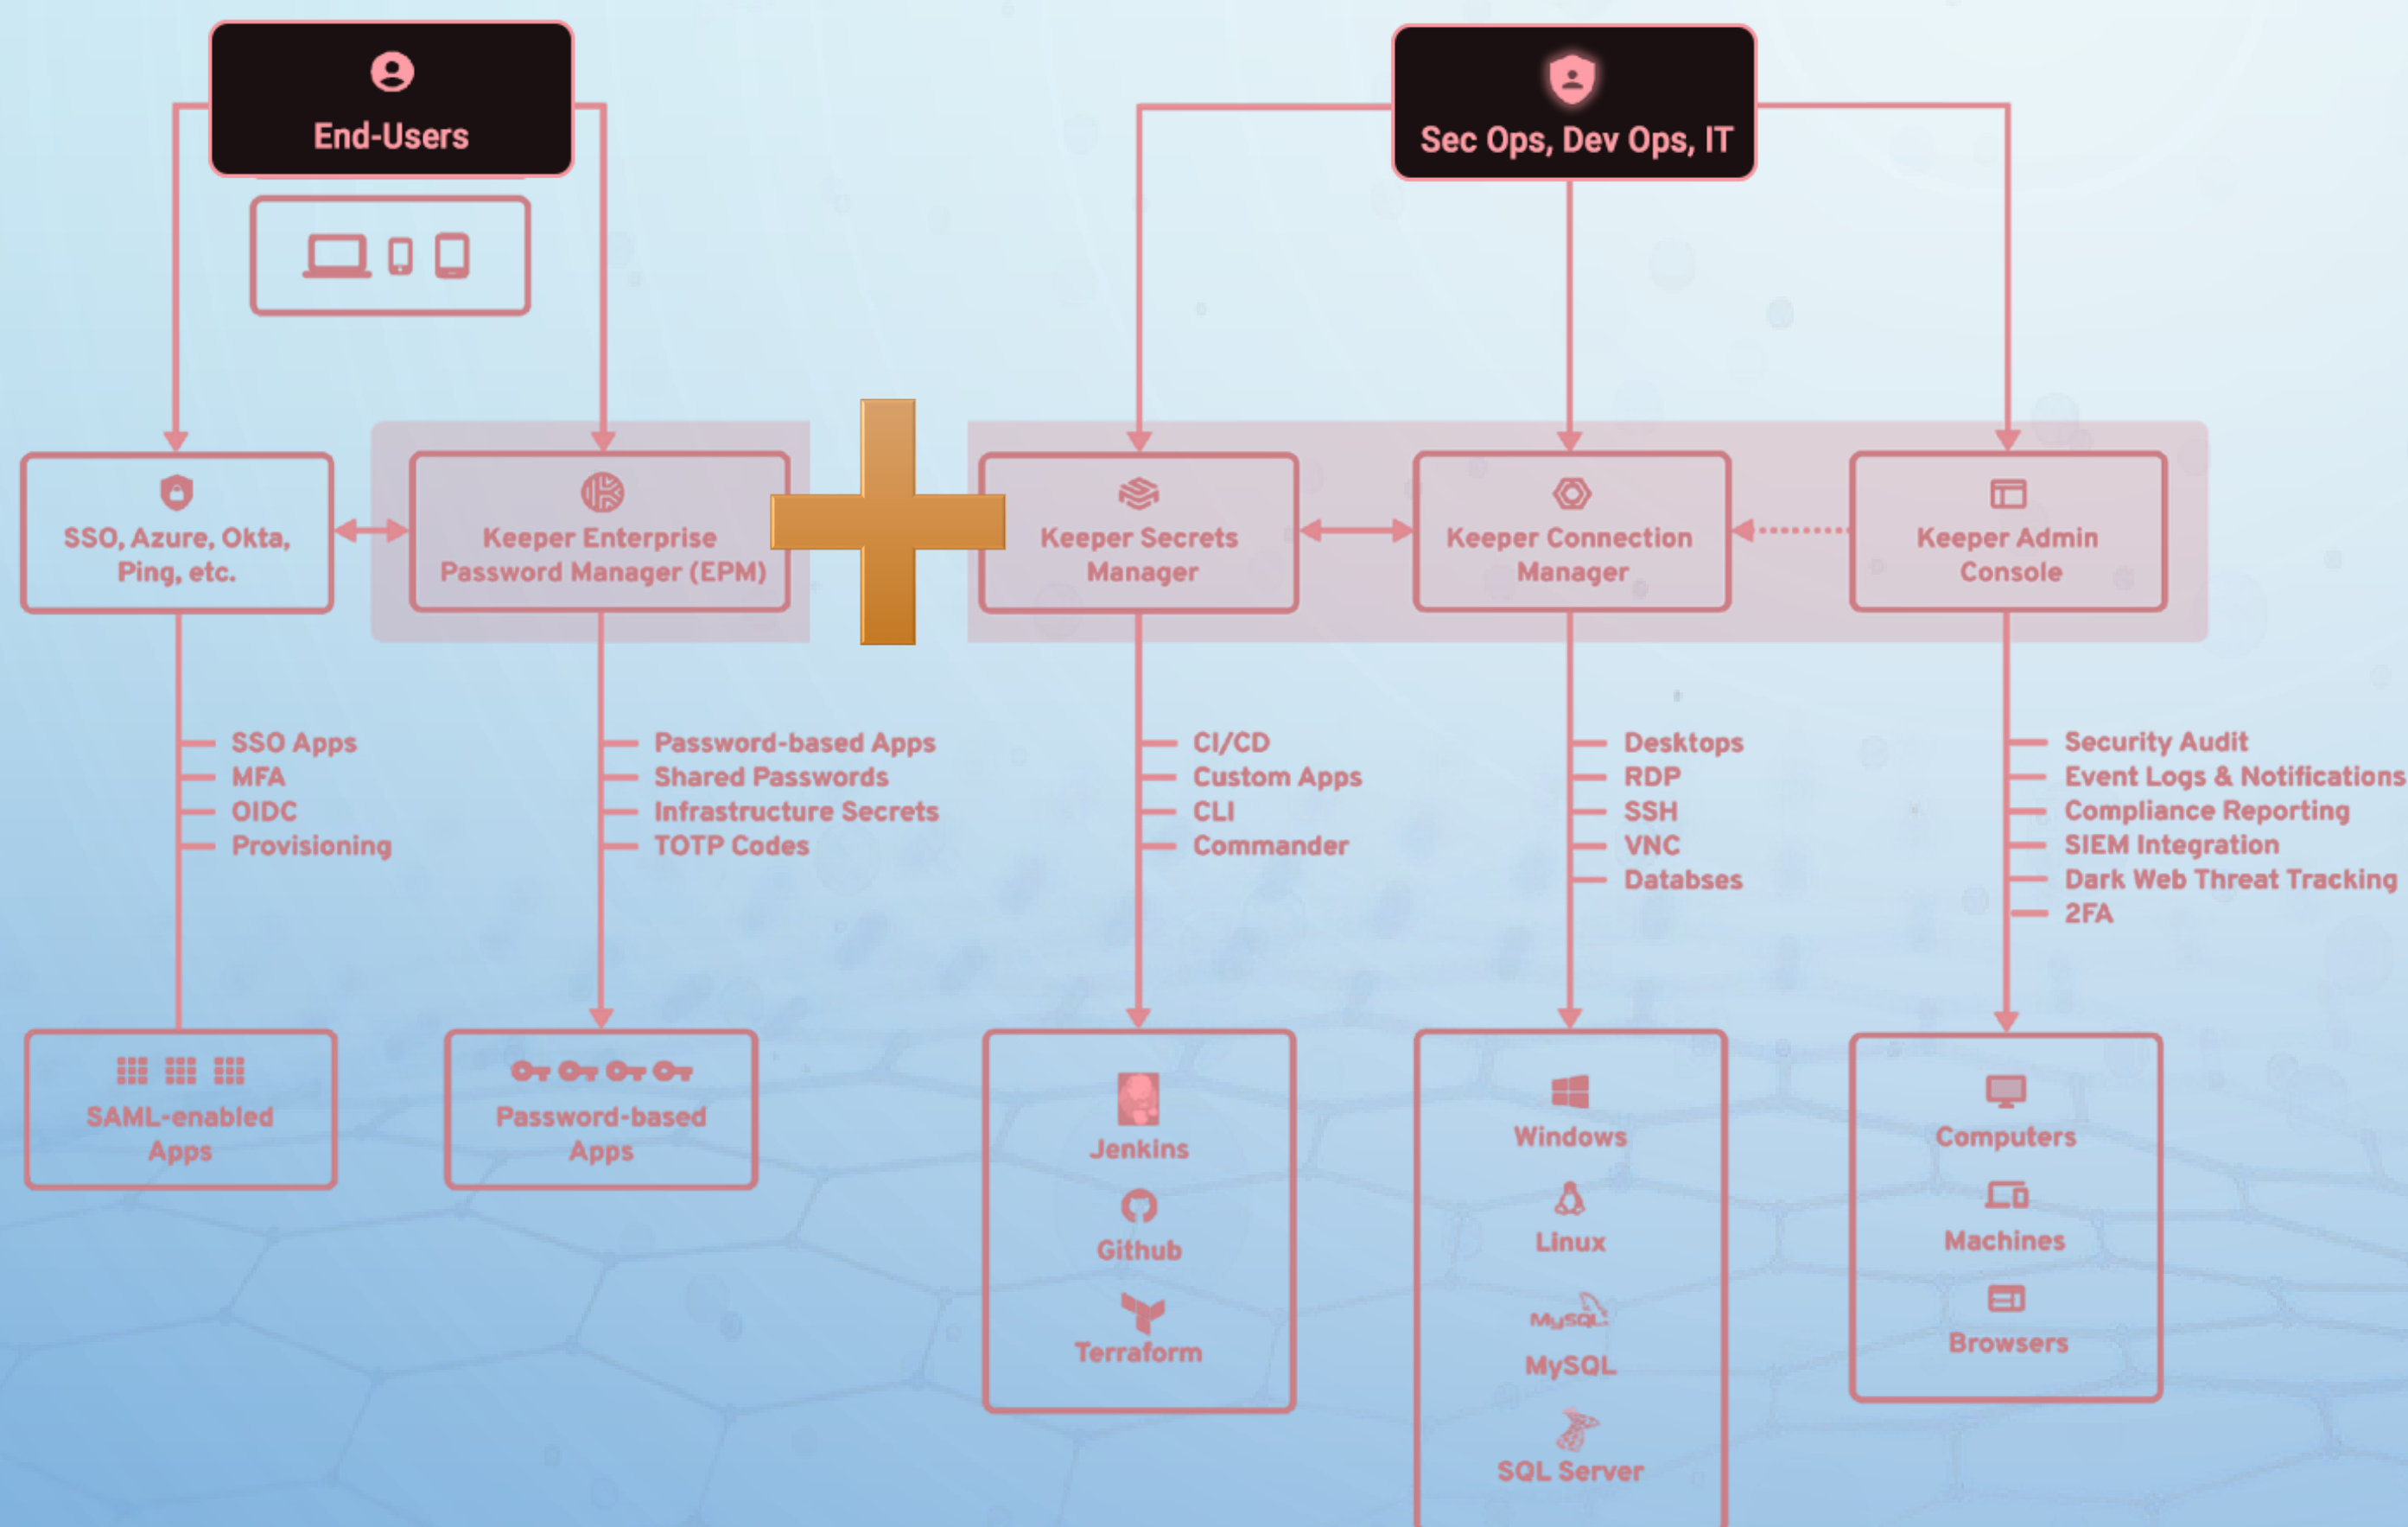

MSP
OFFENSIVE

Kaseya gives MSPs practical security tools to detect risk, prove value and expand recurring cybersecurity services.

- ▶ Automated network penetration testing
- ▶ Vulnerability scanning and prioritization
- ▶ Dark web credential monitoring
- ▶ Cyber hygiene improvement for customers
- ▶ Simple packaging for MSP security services

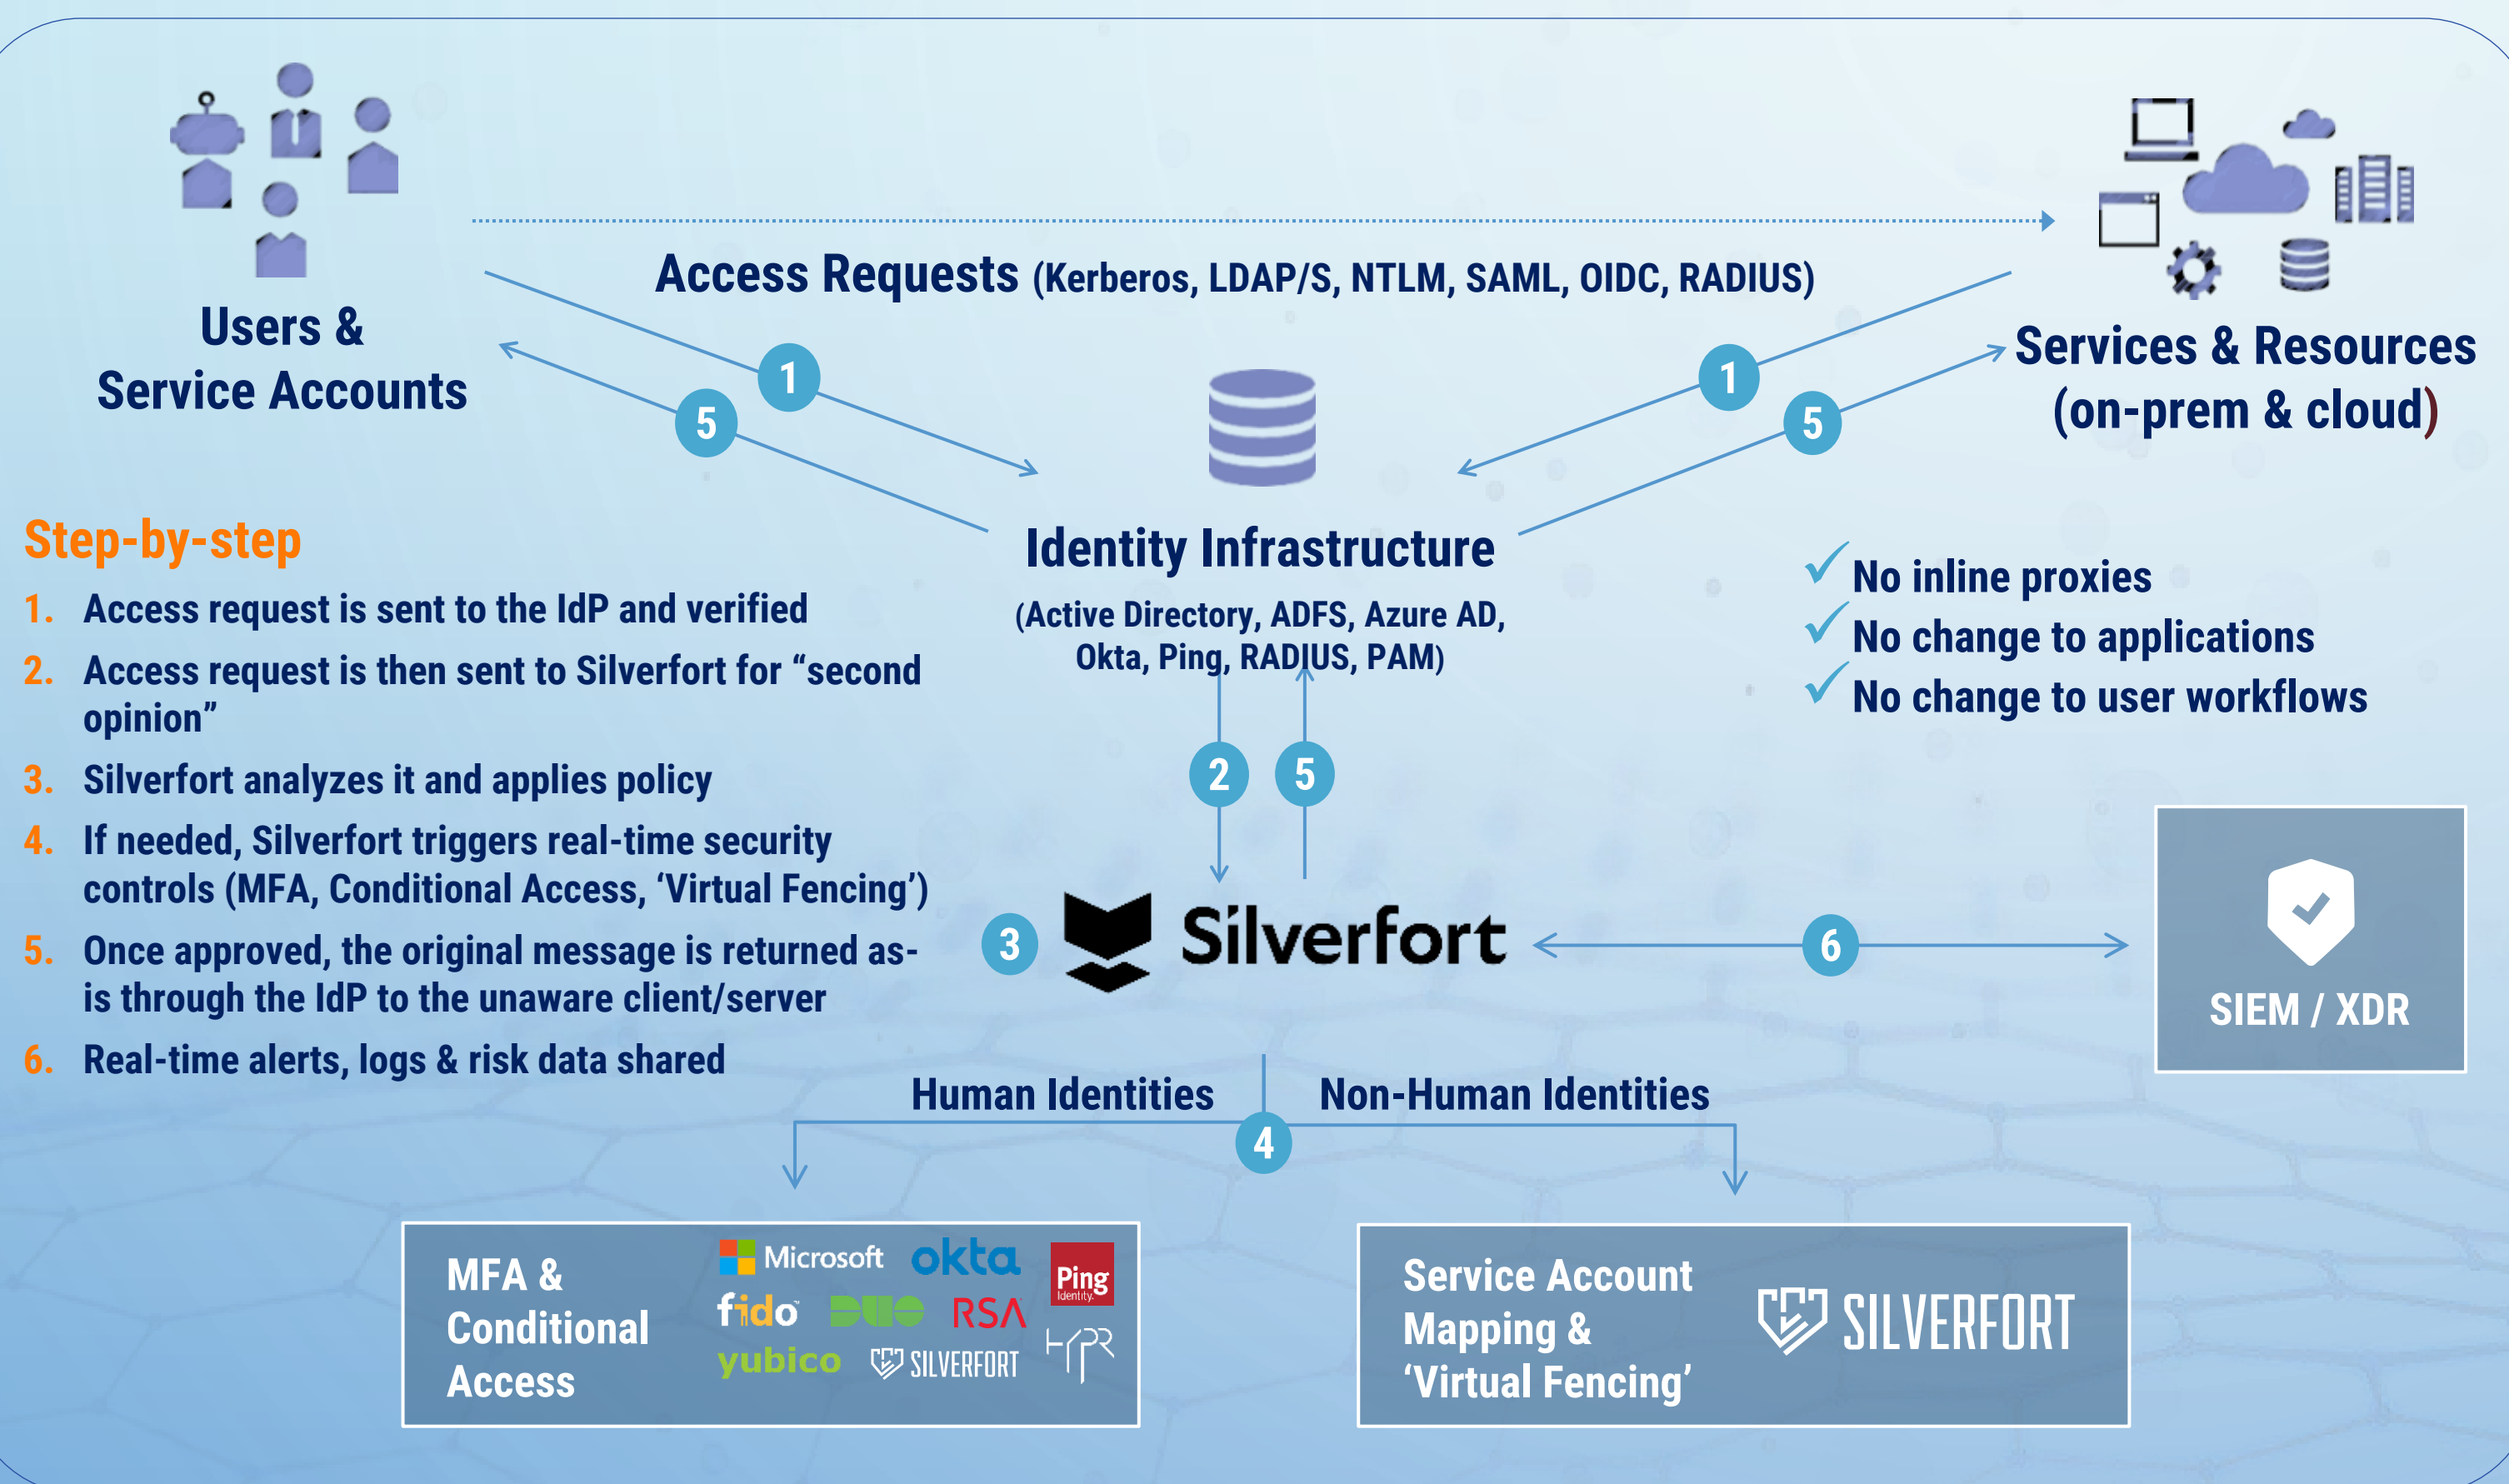

Next-Gen Password Management Solution

Keeper protects passwords, secrets and privileged access with a Zero Trust platform that is simple to deploy and easy to manage.

- ▷ Password, secrets and privileged access protection
- ▷ Zero Trust and Zero Knowledge architecture
- ▷ Unified administration and modern user experience
- ▷ Strong auditing, visibility and compliance
- ▷ Fast deployment across users, teams and devices

Identity Security Platform

Silverfort extends identity protection across every access request, including legacy systems, service accounts and non-human identities.

- ▷ Protect human and non-human identities
- ▷ Extend MFA and conditional access everywhere
- ▷ Secure legacy and unmanaged systems
- ▷ Map and control service account activity
- ▷ Integrate with existing IAM and security tools

Application Security Testing

MSP
OFFENSIVE

Invicti helps organizations continuously find and fix web application and API vulnerabilities before they become business risk.

- ▶ Automated web application and API security testing
- ▶ Accurate, actionable vulnerability findings
- ▶ Scalable testing for complex environments
- ▶ Integration with DevSecOps workflows
- ▶ Stronger security before production exposure

Link Load Balancing, WiFi & SDWAN

MSP
5G MOBILITY

Peplink keeps organizations connected with resilient SD-WAN, wireless, cellular and satellite-ready networking solutions.

- ▷ WAN load balancing and automatic failover
- ▷ SpeedFusion bonding across multiple links
- ▷ Cellular, broadband and Starlink connectivity
- ▷ Enterprise mobility and remote site support
- ▷ Simplified deployment and management

Backup & Recovery

Top 3 Reasons

to Choose NAKIVO vs. Competitors

Fast

 **2X** faster backup

- ✓ Instant recovery for anything
- ✓ Better performance on NAS

Affordable

 **50%** lower TCO

- ✓ Perpetual licensing
- ✓ Trade-in savings

Top-Rated

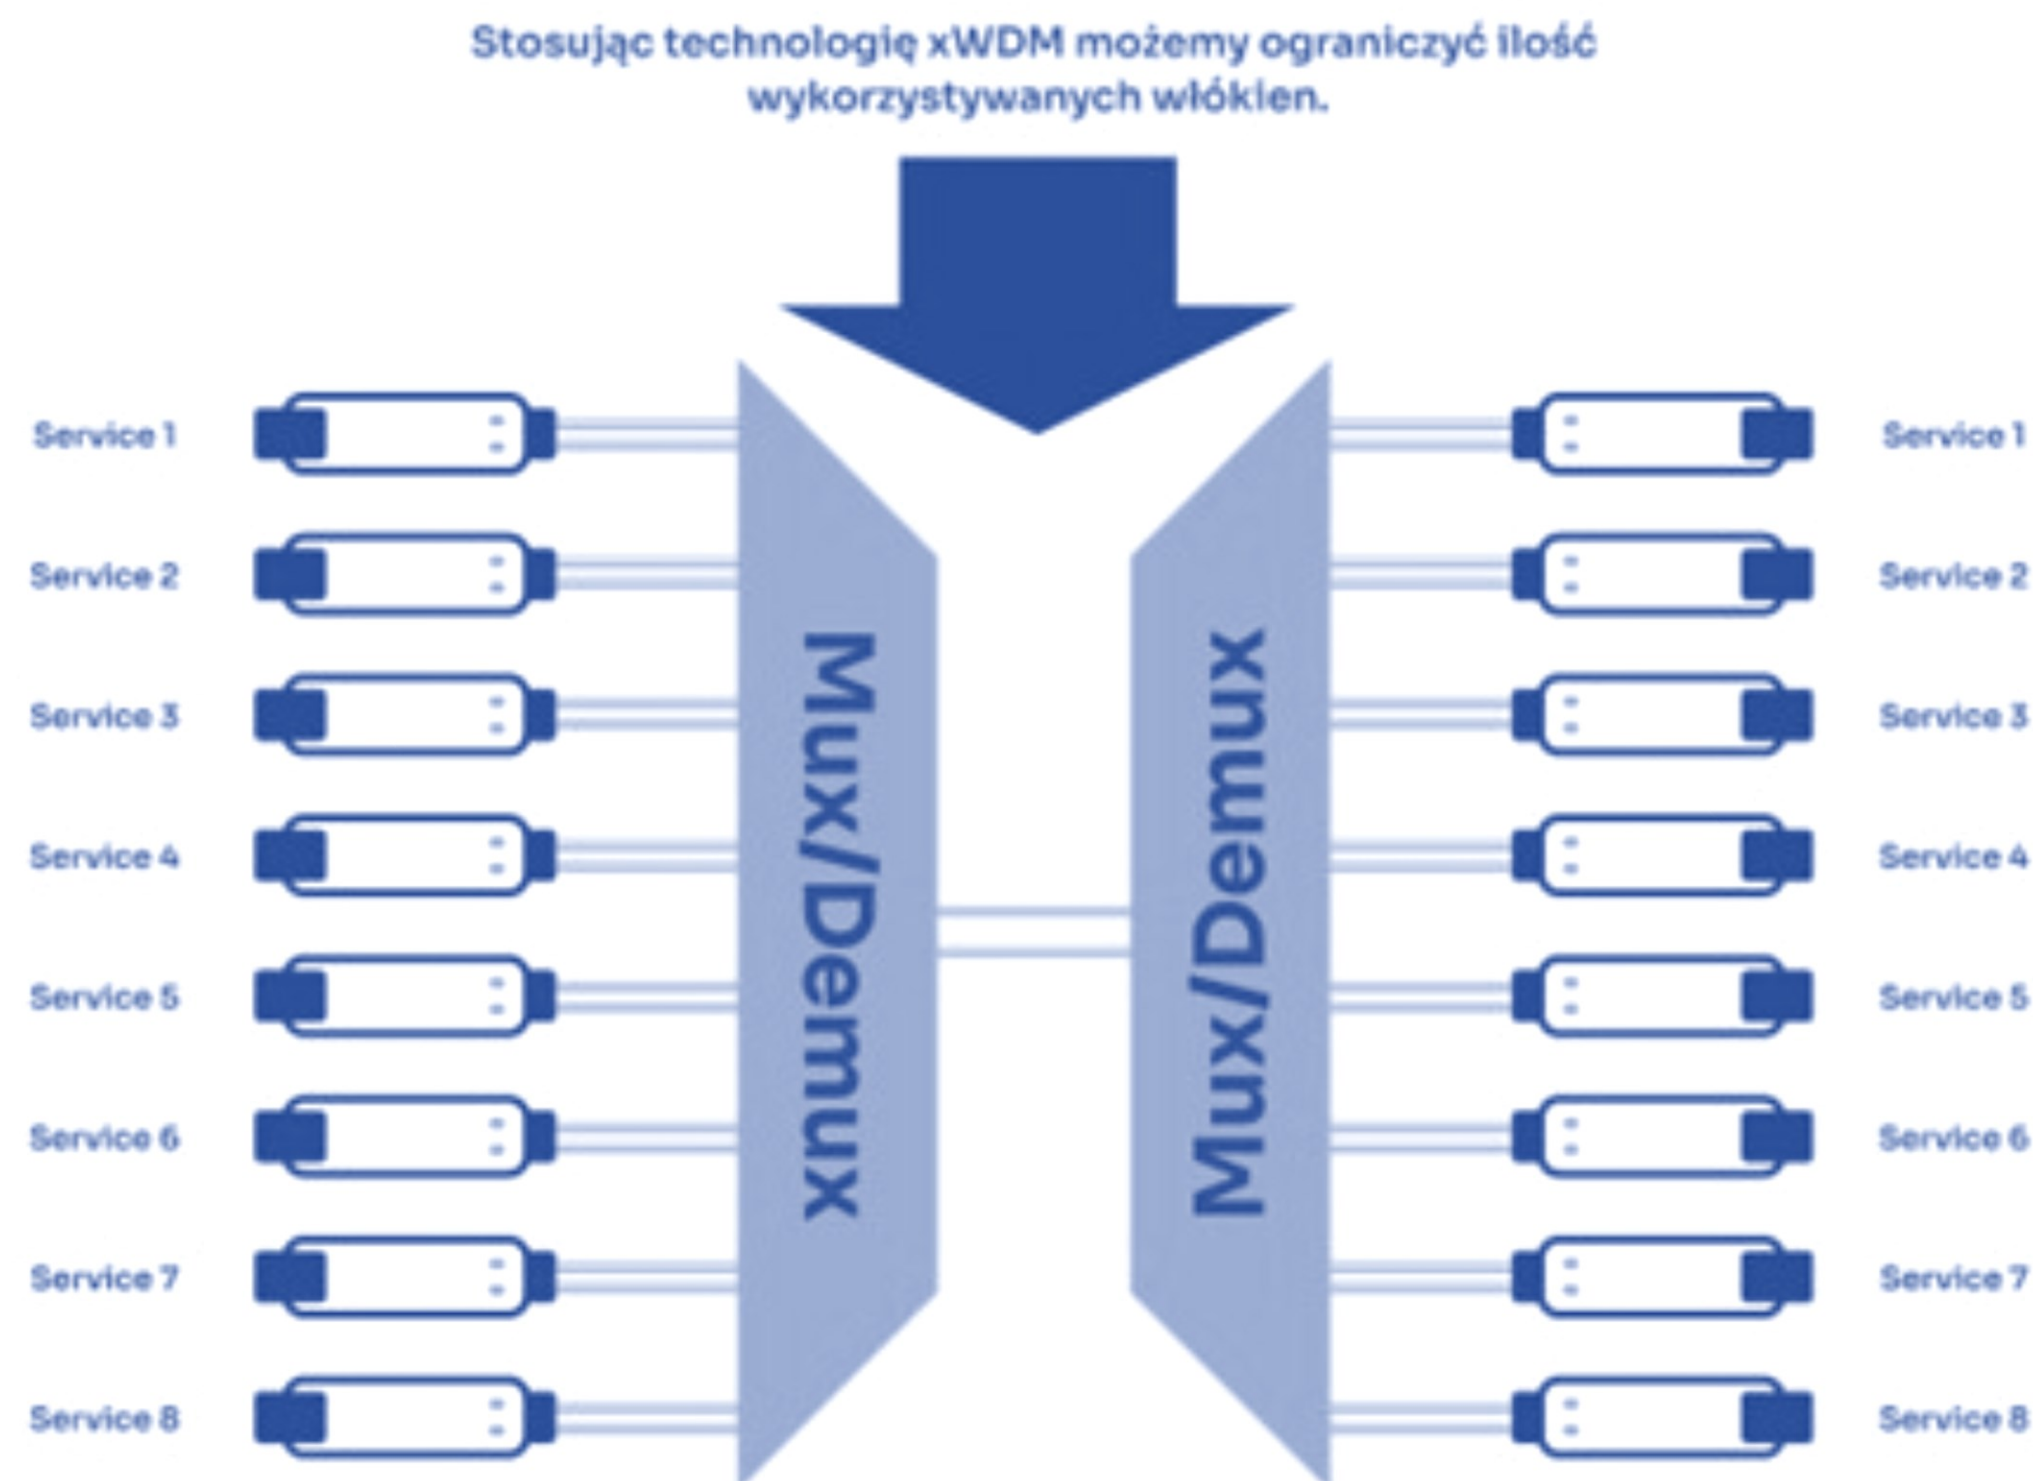

4.8 average rating 

- ✓ Recognized by industry analysts
- ✓ 98% satisfaction with support

NAKIVO delivers fast, reliable and cost-effective backup and recovery for virtual, physical, cloud and SaaS environments.

- ▷ Backup for virtual, physical, cloud and SaaS workloads
- ▷ Fast backup, replication and recovery
- ▷ Simple deployment and administration
- ▷ Ransomware resilience and data protection
- ▷ Small footprint for efficient operations

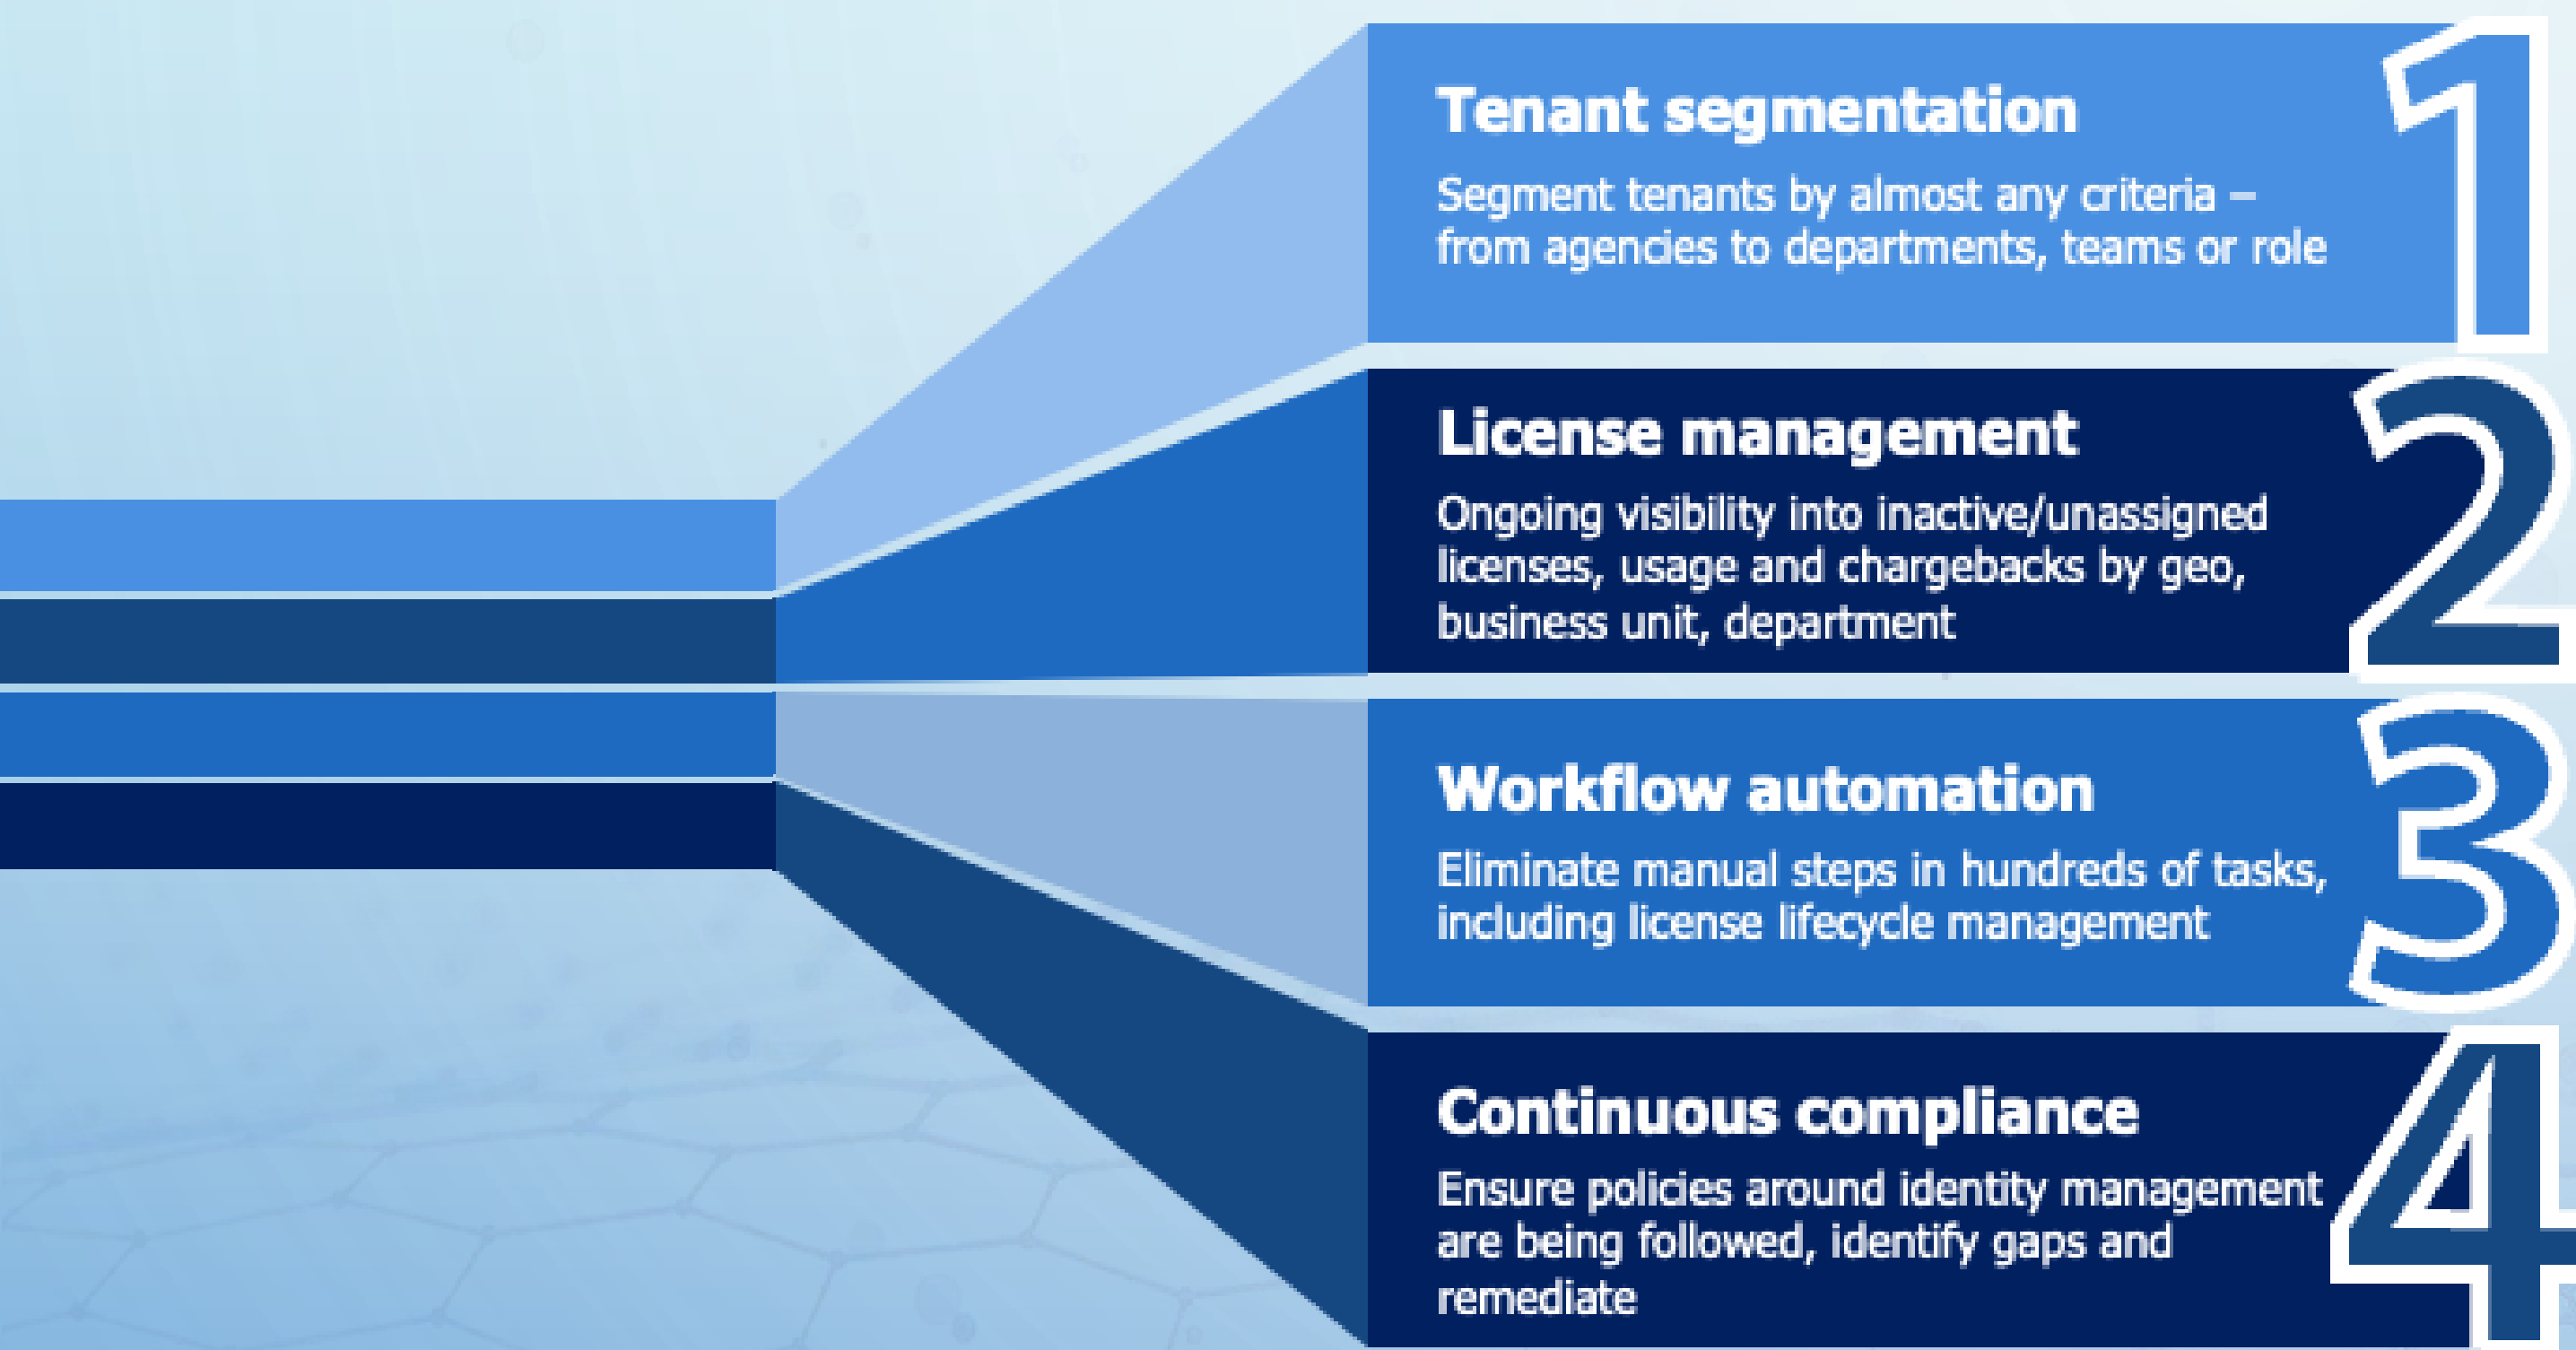

Optical Networking

Salumanus helps organizations modernize optical networks with flexible, scalable and efficient transmission infrastructure.

- ▷ Optical network modernization
- ▷ Flexible and scalable transmission designs
- ▷ Improved reliability and performance
- ▷ Lower operational complexity
- ▷ Future-ready connectivity infrastructure

Microsoft 365 Governance

CoreView and **Simeon Cloud** help organizations govern, secure and manage Microsoft 365 environments at scale.

- ▷ Microsoft 365 visibility and control
- ▷ Configuration baselines and automation
- ▷ Multi-tenant management for MSPs
- ▷ Continuous compliance monitoring
- ▷ Reduced configuration drift and manual work

Document Security

SealPath protects sensitive documents wherever they go, giving organizations control even after files are shared.

- ▷ Protect confidential documents anywhere
- ▷ Control view, edit, print and sharing rights
- ▷ Monitor document access and distribution
- ▷ Change policies after files are shared
- ▷ Revoke access in real time

Email Archiving

All versions of
Exchange Server

All IMAP or POP3
e-mail servers

Microsoft Office 365
and G Suite

PST, EML and other
e-mail files

MDaemon, IceWarp
and Kerio Connect

E-mail clients such as
Outlook, Thunderbird etc.

MailStore keeps business email secure, searchable and available for the long term, supporting compliance and continuity.

- ▷ Archive email from Microsoft 365, Exchange, IMAP/POP3 and PST
- ▷ Preserve business-critical communication
- ▷ Reduce storage through deduplication
- ▷ Give users fast access to archived emails
- ▷ Support compliance and long-term availability

PKI Solutions & Identity Services

GlobalSign secures digital trust with certificates, PKI and identity services for users, devices, applications and documents.

- ▷ Trusted SSL/TLS and digital certificates
- ▷ Digital signing and timestamping
- ▷ User, machine and device authentication
- ▷ Code signing for software integrity
- ▷ Secure digital identity for business communications

Tiered Backup Storage

The Future of Backup Storage:

Tiered Backup Storage

System scales to a
2PB full backup -

Largest
in the industry

Over 400TB/hr. ingest rate
at 2PB full backup -

Fastest
in the industry

ExaGrid improves backup performance, restore speed and ransomware resilience with scalable tiered backup storage.

Restores as fast as disk,

20X

faster than
dedupe appliances

Backup
window
that is **fixed**
length as
data grows

Disk-cache Landing Zone
(performance tier)
for the fastest backups and restores

**Long-term
Retention Repository**
(retention tier)
for low-cost long-term deduplicated retention

Backups as fast as disk,
3X faster
than
dedupe appliances

25+

Ransomware
recovery

**Lowest
cost**
up front and
over time

Easy to use,
manage, and
scale

Easy remote
installation -
no onsite visit
required

- ▷ Fast backup and restore performance
- ▷ Scalable storage for growing data volumes
- ▷ Deduplication for storage efficiency
- ▷ Protected retention against ransomware
- ▷ Integration with leading backup platforms

Application Performance, Security & Availability

Array Networks helps organizations deliver secure, available and high-performing access to business-critical applications.

- ▷ Application delivery and availability
- ▷ Secure access to critical applications
- ▷ Physical, virtual, cloud and hybrid deployment
- ▷ Support for major enterprise applications
- ▷ Proven use across regulated and demanding industries
